3.2. Downloading the Companion App

To access all features and synchronize data, download the **FitCloudPro** app on your smartphone.

- **For Android:** Search for "FitCloudPro" on the [Google Play Store](#).
- **For iOS:** Search for "FitCloudPro" on the [Apple App Store](#).

3.3. Pairing with Your Smartphone

Follow these steps to connect your watch to the FitCloudPro app:

1. Ensure your phone's Bluetooth is enabled.
2. Open the FitCloudPro app.
3. Navigate to the 'Device' section within the app.
4. Tap 'Add Peripheral Now' or a similar option to search for your watch.
5. Select 'K69' or the corresponding device name from the list.
6. Confirm the pairing request on both your phone and the watch.

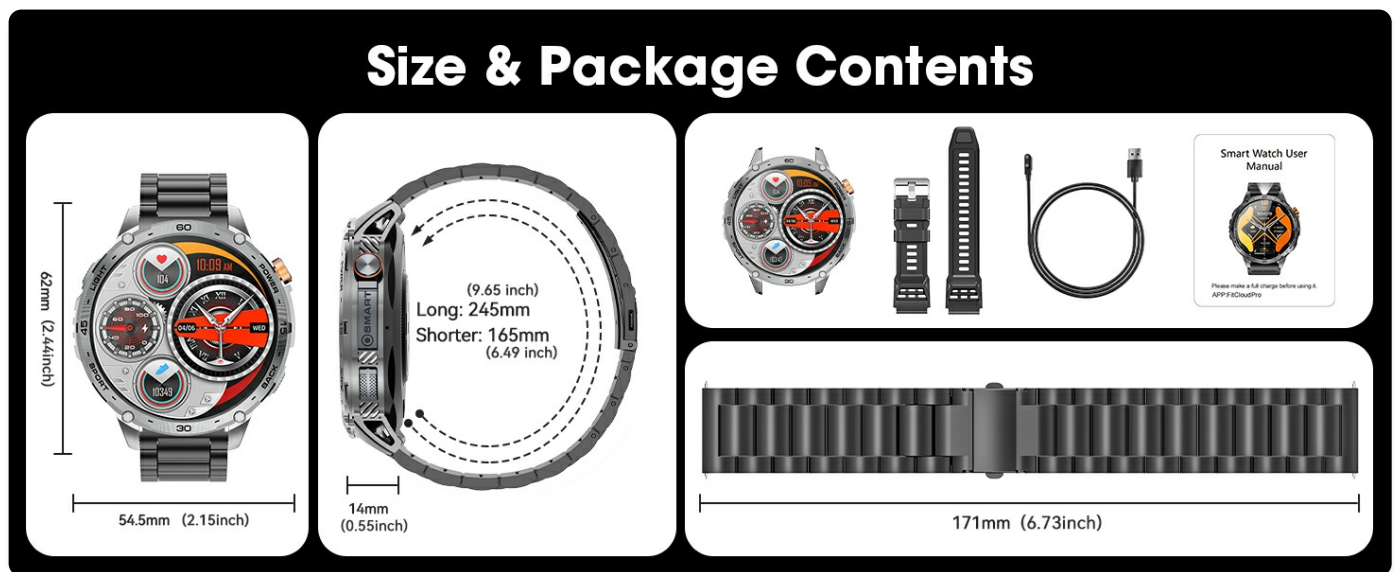

Image 3.2: Pairing Process for iOS Devices

3.4. Setting Up Notifications

To receive message and app notifications on your watch:

1. Ensure the watch is connected to your phone via Bluetooth.
2. In the FitCloudPro app, go to 'Device' and select 'Push Notifications'.
3. Enable notifications for the desired apps (e.g., SMS, Facebook, WhatsApp).
4. **For iOS:** Go to your phone's 'Settings' > 'Bluetooth' > tap the 'i' icon next to your watch > enable 'Share System Notifications'. Also, ensure 'Show Previews' is set to 'Always' or 'When Unlocked' for the specific apps in your phone's notification settings.
5. **For Android:** Grant the FitCloudPro app all necessary notification permissions in your phone's settings. Ensure the app is running in the background and is not restricted by battery optimization settings.

Q**How to get SMS messages and other social notifications?****A**

Note: This Smartwatch can not send message. Get Notifications Steps: In the App: Turn on all apps that need push notifications. On the Phone: Allow all permissions for the app and any apps that need notifications, including pop-ups, alerts, and landscape mode.

Q**How to set call audio & media audio?****A**

Scroll down on the homepage of the watch and a circle of function icons appears. Tap on the call icon, call audio and media audio will appear. turn off media audio, the watch will not receive the sound of music/video/voice playing from your cell phone.

Q**How to adjust the call volume?****A**

On the call page, click on the volume marker in the upper right corner of your avatar to increase or decrease the volume.

Q**Watch does not consistently stay connected to your phone?? Repeated connection and disconnection?****A**

This watch connects via Bluetooth. Please keep within a 10m range when using it. For Android, enable background permissions and keep the app open. For iOS, ensure the app is running in the background. If issues persist, feel free email anytime.

Q**Can't get all contacts in the watch?****A**

If the contact cannot have emoticons as well as symbols, in addition, the phone number must be preceded by a 1 in the contact, and there can be no brackets in the area code.

5. MAINTENANCE

5.1. Water Resistance (IP68)

The mingwear K69-BS1 smart watch is IP68 rated, meaning it is resistant to dust and can withstand immersion in water up to 1.5 meters for 30 minutes. It is suitable for daily use and activities like hand washing or light rain.

Important Note:

- Do not use the smart watch in hot water, saunas, or steam rooms.
- Avoid bathing or showering with the smart watch, as water pressure and temperature changes, along with steam, can compromise the waterproof seals over time.
- Do not intentionally submerge the watch in water for extended periods or at depths exceeding the specified limit.

5.2. Cleaning

Regularly clean your watch and strap to prevent skin irritation and maintain functionality. Use a soft, damp cloth to wipe the watch body and strap. Ensure the charging contacts are clean and dry before charging.

5.3. Battery Care

To prolong battery life:

- Avoid extreme temperatures.
- Charge the watch fully before long periods of inactivity.
- Do not leave the watch uncharged for extended periods.

6. TROUBLESHOOTING

If you encounter issues with your mingwear K69-BS1 smart watch, refer to the following common problems and solutions:

Problem	Solution
Watch does not consistently stay connected to your phone.	Ensure the watch is within 10 meters of your phone. For Android, enable background permissions for the FitCloudPro app and keep it running. For iOS, check Bluetooth settings and app permissions. Restart both devices if issues persist.
Cannot receive SMS or app notifications.	Verify that push notifications are enabled in the FitCloudPro app for specific applications. On your phone, ensure all necessary permissions are granted to the app, and that 'Do Not Disturb' or 'Low Power Mode' are not active. For iOS, check 'Share System Notifications' in Bluetooth settings.
Cannot get all contacts in the watch.	Contacts with special characters (emoticons, symbols) may not sync. Ensure phone numbers are preceded by '1' (if applicable for your region) and do not contain brackets in the area code.
Battery life is shorter than expected.	High usage of features like Bluetooth calling, continuous heart rate monitoring, or frequent screen activation can reduce battery life. Adjust settings to optimize power consumption. Ensure the watch is fully charged (3 hours).
Watch faces are limited or do not load.	Ensure the FitCloudPro app is updated to the latest version. Check your internet connection. Some watch faces may require specific app versions or device firmware.
