## 1. PRODUCT OVERVIEW

The NUOTIAN 10" Wireless CarPlay Screen (Model NT-1026) is a portable car multimedia player designed to enhance your driving experience. It offers seamless integration with Apple CarPlay and Android Auto, providing access to navigation, music, calls, and more directly on its responsive 1600x600P HD touchscreen. This device also features front and rear dual cameras for recording, various audio output options, and mirror link functionality for extended entertainment.

## 2. SETUP AND INSTALLATION

### 2.1 Package Contents

Before beginning installation, ensure all components are present:

- NUOTIAN 10" Wireless CarPlay Screen
- Adjustable Adhesive Mount
- Windshield Suction Cup Mount
- Car Charger with USB-C Cable
- HD Backup Camera with Cable
- 64GB High-Speed TF Card (pre-installed)
- 3.5mm AUX Cable
- Small Screwdriver and Trim Removal Tool
- User Manual

### 2.2 Mounting the Device

The device offers versatile mounting options for various vehicles (cars, trucks, RVs). Choose between the adjustable adhesive mount for dashboard installation or the windshield suction cup mount.

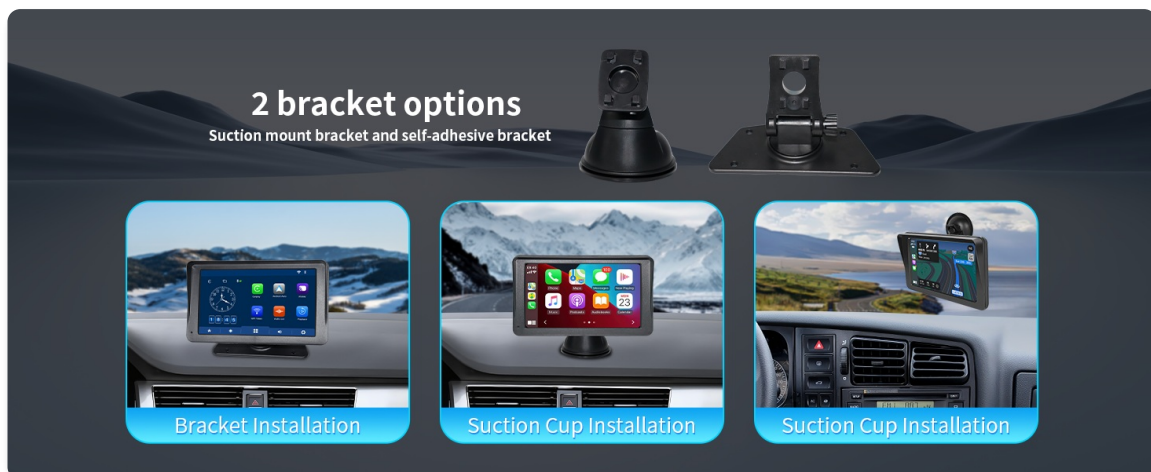

Image: Illustration showing two types of mounting brackets: a suction cup mount and a self-adhesive dashboard mount.

1. **Attach Bracket:** Secure the chosen mount to the back of the CarPlay screen.
2. **Positioning:** Select a suitable location on your dashboard or windshield that does not obstruct your view or interfere with driving controls.
3. **Secure Mount:** For the adhesive mount, ensure the surface is clean and dry before applying. For the suction cup mount, press firmly and engage the locking mechanism.

### 2.3 Power Connection

Connect the provided USB-C power cable to the device and plug the car charger into your vehicle's 12V cigarette lighter socket. The device operates within a DC 7V–32V range.

### 2.4 Rear Camera Installation

The HD backup camera features a 170° ultra-wide, waterproof design. Connect the camera cable to the designated AV-IN port on the CarPlay screen. Route the cable discreetly to the rear of your vehicle and mount the camera above your license plate or another suitable location. The camera automatically activates when reversing.

## 3. OPERATING INSTRUCTIONS

### 3.1 Initial Setup

Upon first power-on, the device will guide you through initial setup steps, including language selection and date/time configuration. Follow the on-screen prompts.

### 3.2 Wireless CarPlay & Android Auto

The NUOTIAN screen supports both wireless Apple CarPlay and Android Auto. To connect your smartphone:

1. Ensure Bluetooth is enabled on your smartphone.
2. On the CarPlay screen, navigate to the CarPlay or Android Auto icon and tap it.
3. On your smartphone, search for Bluetooth devices and select the device named **T93\_e6aff0**.
4. Confirm pairing on both devices. Once connected, your phone's interface will mirror on the CarPlay screen.

### 3.3 Mirror Link Functionality

The 1600 x 600P HD touchscreen supports mirror link for both Android and iOS smartphones. This allows you to display your phone's screen directly on the CarPlay unit, perfect for watching movies or syncing apps like YouTube, TikTok, Netflix, and GPS during long trips.

## 3.4 Audio Output Modes

Enjoy superior sound quality through multiple audio options:

- **Bluetooth:** Connect directly to your car's audio system for hands-free calls and music.
- **Built-in Speakers:** Use the device's integrated speakers for audio output.
- **AUX:** Connect via the 3.5mm AUX cable to your car's auxiliary input.
- **FM Transmitter:** Transmit audio to your car's FM radio by tuning both devices to the same frequency.

### 3.5 Dual Camera Recording (DVR)

The system supports loop recording and HD capture with its front (2K) and rear (1080P) cameras. The pre-installed 64GB TF card stores recordings. Key features include:

- **Loop Recording:** Continuously records, overwriting the oldest files when the card is full.
- **G-Sensor:** Automatically detects collisions and locks the current recording to prevent overwriting.
- **Parking Monitor:** Activates recording for 15 seconds upon detecting vibrations when the engine is off (requires compatible hardware).

Image: Diagram showing the front and rear dual cameras, highlighting features like 2K dash cam, 1080P backup camera, and day/night recording capabilities.

### 3.6 Voice Control

Utilize voice commands for hands-free operation, including making calls, sending messages, and navigating, enhancing safety while driving.

Image: The CarPlay screen displaying options for hands-free calls, maps, and music, with voice commands like "Hey, Siri, call Mia" and "Hey, Google, navigate to the park."

### 3.7 Screen Timed Eye Care Feature

The device includes a screen timed eye care feature that allows you to schedule nighttime screen brightness, reducing eye strain during night driving.

## 4. MAINTENANCE

- **Formatting TF Card:** Regularly format the TF card to ensure optimal recording performance and free up space. This can be done via the device settings.

- **Software Updates:** Check for available software updates in the settings menu to ensure your device has the latest features and performance improvements.
- **Factory Reset:** If you encounter persistent issues, a factory reset option is available in the settings to restore the device to its original state.

## 5. TROUBLESHOOTING

- **Connection Issues:** If your phone fails to connect, ensure Bluetooth is on and the correct device (T93\_e6aff0) is selected. If CarPlay is already connected to another device, disconnect it first.
- **Recording Problems:** Verify the TF card is properly inserted and formatted. Check loop recording and G-sensor settings.
- **Audio Output:** Ensure the correct audio output mode (Bluetooth, Speaker, FM, AUX) is selected and configured properly.

## 6. SPECIFICATIONS
