## Airzeen G20 Pro

# Airzeen G20 Pro Robot Vacuum Cleaner Accessory Set Instruction Manual

Model: G20 Pro

Brand: Airzeen

## INTRODUCTION

This instruction manual provides essential information for the proper installation, maintenance, and replacement of the Airzeen G20 Pro Robot Vacuum Cleaner Accessory Set. Regular replacement and cleaning of these accessories ensure optimal performance and extend the lifespan of your Airzeen G20 Pro robot vacuum.

## WHAT'S INCLUDED

Your Airzeen G20 Pro Robot Vacuum Cleaner Accessory Set includes the following components:

- 1 x Roller Brush
- 2 x Filters
- 2 x Side Brush Pairs (4 individual brushes)
- 4 x Washable Mop Pads

## SETUP AND INSTALLATION

Before installing any accessories, ensure your Airzeen G20 Pro robot vacuum is powered off and disconnected from its charging base. Refer to your main robot vacuum manual for initial device setup.

### Installing the Roller Brush

1. Flip the robot vacuum over to access the underside.
2. Locate the roller brush cover and press the release tabs to open it.
3. Remove the old roller brush.
4. Align the ends of the new roller brush with the slots and gently press it into place.
5. Close the roller brush cover until it clicks securely.

## Installing the Side Brushes

1. Flip the robot vacuum over.
2. Locate the side brush posts.
3. Press the new side brushes onto the posts until they click into place. Ensure they are securely fastened.

## Installing the Filters

1. Open the dustbin cover on your robot vacuum.
2. Remove the old filter assembly.
3. Insert the new filter into the designated slot within the dustbin. Ensure it fits snugly.
4. Close the dustbin cover.

## Attaching the Washable Mop Pads

1. Ensure the mop pad is clean and slightly damp for optimal mopping performance.
2. Align the mop pad with the mop bracket on the underside of the robot vacuum.
3. Secure the mop pad to the bracket using the Velcro strips.
4. Attach the mop bracket with the pad to the robot vacuum until it clicks into place.

## OPERATING INSTRUCTIONS

---

Once the accessories are correctly installed, your Airzeen G20 Pro robot vacuum is ready for enhanced cleaning. For detailed operating instructions of the robot vacuum itself, including scheduling, cleaning modes, and app control, please refer to the main Airzeen G20 Pro Robot Vacuum Cleaner user manual.

The installed accessories will automatically function with the robot's cleaning cycles:

- The **roller brush** and **side brushes** work together to sweep and gather debris into the vacuum's suction inlet.
- The **filters** capture dust and allergens, ensuring cleaner air output.
- The **washable mop pads**, when attached to the water tank, will dampen the floor for mopping during designated cleaning tasks.

## MAINTENANCE

---

Regular maintenance of your accessory set is crucial for maintaining the cleaning efficiency and longevity of your Airzeen G20 Pro robot vacuum.

### Cleaning the Roller Brush

- Remove the roller brush as described in the installation section.
- Use the cleaning tool (often included with the robot vacuum) to cut and remove any hair or debris tangled around the brush.
- Wipe the brush with a dry cloth.
- **Recommended Replacement:** Every 6-12 months, or when visibly worn.

### Cleaning the Side Brushes

- Gently pull the side brushes off their posts.
- Remove any tangled hair or debris.
- If bent or damaged, soak in warm water for a few minutes to reshape.
- **Recommended Replacement:** Every 3-6 months, or when visibly worn/damaged.

### Cleaning the Filters

- Remove the filter from the dustbin.
- Tap the filter gently over a trash can to dislodge dust and debris.
- Do **not** wash the HEPA filter with water, as this can damage it.
- **Recommended Replacement:** Every 2-3 months, or when suction power noticeably decreases.

### Cleaning the Washable Mop Pads

- Remove the mop pad from the mop bracket.
- Hand wash or machine wash the mop pads with mild detergent.
- Air dry completely before reattaching to prevent mildew.
- **Recommended Replacement:** Every 3-6 months, or when cleaning effectiveness diminishes.

## TROUBLESHOOTING

If you encounter issues related to your accessory set, consider the following:

- **Reduced Suction:** Check if the filter is clogged and needs cleaning or replacement. Ensure the roller brush is free of debris.
- **Poor Mopping Performance:** Ensure the mop pad is clean and properly dampened. Verify the water tank is filled (if applicable to your robot model).
- **Brushes Not Spinning:** Remove and clean the roller and side brushes. Check for any hair or foreign objects obstructing their movement.
- **Unusual Noises:** Inspect all brushes and the filter for any foreign objects or damage. Replace any damaged parts.

## SPECIFICATIONS

| Component        | Quantity            | Material                |
|------------------|---------------------|-------------------------|
