

zmart ATORCH DL24

zmart ATORCH DL24 150W 20A DC Power USB Tester Electronic Load User Manual

Model: ATORCH DL24 | Brand: zmart

1. INTRODUCTION

This manual provides instructions for the zmart ATORCH DL24 DC Power USB Tester. It covers product features, safety guidelines, setup, operation, and app connectivity. The device supports a test voltage range of 2-200V and an operating current of 0.2-20A, with a maximum discharge power of 150W. Integrated safety features include overcurrent, overheat, and overpower protection. Users are advised to adjust parameters carefully, especially when setting discharge power, to comply with energy conservation principles. App download links for Android and iOS are provided for enhanced functionality.

2. PRODUCT FEATURES

- Wide Test Voltage Range: 2V to 200V.
- Adjustable Operating Current: 0.2A to 20A.
- Maximum Discharge Power: Up to 150W (Voltage * Current).
- Built-in Safety Protections: Overcurrent, Overheat, and Overpower.
- Multiple Operating Modes: Constant Current (CC), Constant Resistance (CR), Constant Power (CP), Constant Voltage (CV).
- Data Monitoring: Displays Voltage, Current, Power, Resistance, Energy, Capacity, and Timing.
- App Connectivity: Supports Android and iOS for remote control and data logging.
- External Temperature Probe Support.

3. SAFETY PRECAUTIONS

The DL24 features built-in safety protection functions for overcurrent, overheat, and overpower. If a protection interface pops up, please adjust the parameters carefully. Ensure that the discharge power is set within the maximum limit. When starting for the first time, adjust the preset values slowly and smoothly to match the maximum discharge power. The actual operating current is limited by the maximum power; please adjust the current according to the law of energy conservation. The provided power supply is a DC12V US standard. An EU adapter is also included. If this power supply is not compatible with your country's electrical standards, it is recommended not to purchase the product to avoid potential issues.

3.1 Protection Reminders

Image: Protection Reminders for ATORCH DL24. This image displays the visual warnings for various protection states:

Overload Protection: Indicates when power exceeds 185W.

Overcurrent Protection: Indicates when current exceeds 21A.

Overheat Protection: Indicates when temperature exceeds 100°C.

4. PRODUCT OVERVIEW AND COMPONENTS

Android APP ステートメント:

一部の携帯電話はGoogle PlayのAPP(E-test)と互換性がないため、互換性がない場合は、弊社が提供するAPPをダウンロードしてください。

Android アプリ: https://www.mediafire.com/file/0jjio43c0vuu1wx/U_Meter-Phone_mobile.apk/file
Samsungの携帯電話をお使いの場合は、アプリをインストールしてテストしてください。重要な注意: オンラインのときは、必ずGPS測位許可をオンにしてください。

購入する前に、ダウンロードして使用して、中国語と英語を切り替えることができるかどうかを確認してください。そうでない場合は、不要な紛争を避けるために購入してください。ありがとうございます!

各部の紹介

ファンは動作温度55°Cで起動し、45°Cまたは電力が10Wを超えると停止します。

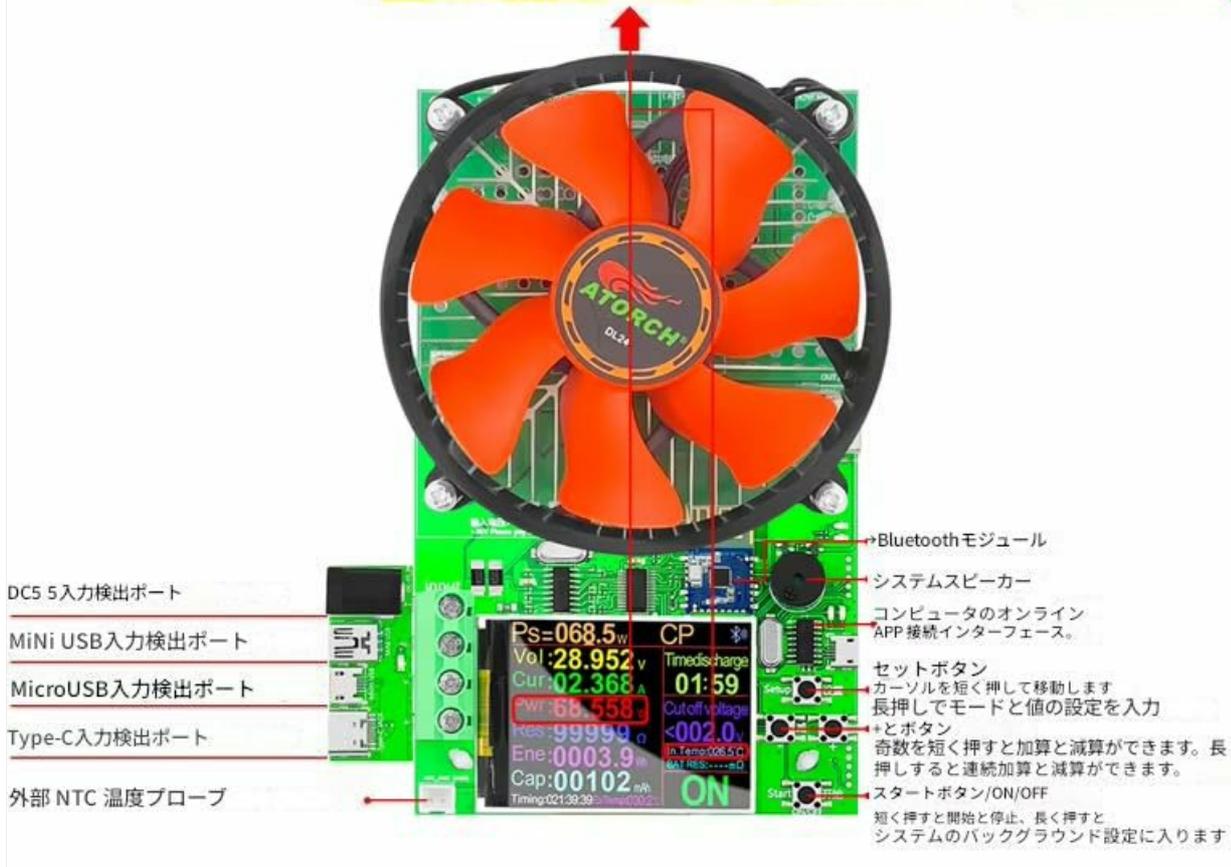

Image: Detailed view of the ATORCH DL24 components and controls.

Fan: Operates when the temperature reaches 55°C and stops when power exceeds 10W or temperature drops below 45°C.

Input/Output Ports: Includes DC5, Mini USB, Micro USB, and Type-C ports.

External NTC Temperature Probe: For accurate temperature monitoring.

Bluetooth Module: For app connectivity.

System Speaker: Provides audio feedback.

Computer Online APP Interface: For PC software connection.

Set Button: Short press to move the cursor, long press to set values.

Plus/Minus Buttons: Short press to adjust values, long press for continuous adjustment.

Start/Stop Button: Short press to start/stop discharge, long press to enter background settings.

5. SETUP AND CONNECTION

5.1 Power Supply Connection

製品の電源供給図

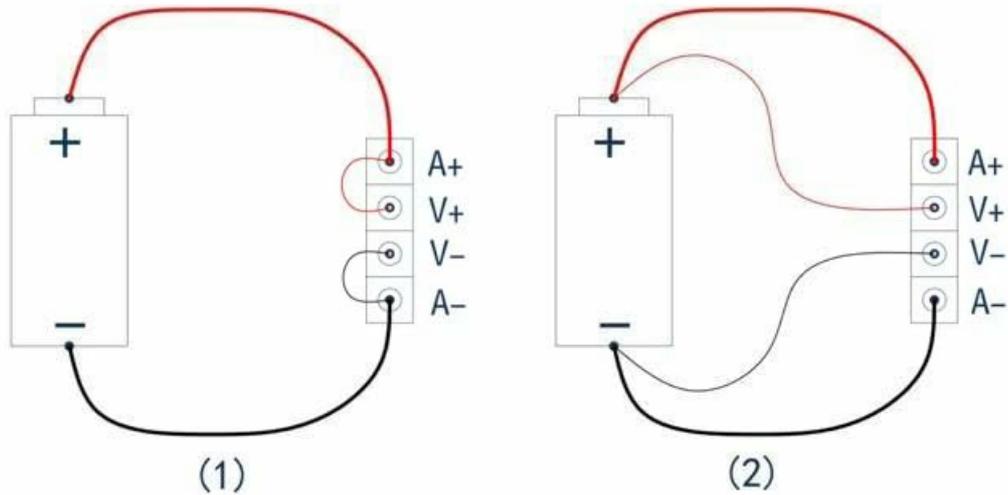

製品の表示には電力が必要です

Image: Power Supply Diagram. The device requires a DC12V power input for its display and operation. Connect the DC12V power adapter to the input jack as shown.

5.2 Electronic Load Wiring

電子負荷装置配線図

(1) 2線配線方式：この方法は比較的簡単で便利です。

注意：2つの端子[A+]と[A-]に接続する必要があります。

(2) 4線配線方式：電圧測定に影響しない

電線の電圧降下によって電圧を測定します。

数量もより正確で、ある程度の回路基盤を持つバイヤーにはこの方法を使うことをお勧めします！

Image: Electronic Load Wiring Diagram. This diagram illustrates two methods for connecting the electronic load:

1. **2-Wire Connection Method:** This method is simple and convenient. It requires connecting to the two main terminals [A+] and [A-].
2. **4-Wire Connection Method:** This method measures voltage without being affected by voltage drop in the wiring, providing higher accuracy. It is recommended for users who require precise measurements and have some basic circuit knowledge.

6. OPERATION

6.1 Screen Modes

起動画面

Image: ATORCH DL24 Screen Modes. The device supports various operating modes, including Constant Current (CC), Constant Resistance (CR), Constant Power (CP), and Constant Voltage (CV). The screen displays real-time data such as Voltage (Vol), Current (Cur), Power (Pwr), Resistance (Res), Energy (Ene), Capacity (Cap), and Timing. It also shows cutoff voltage settings, Bluetooth status, external temperature, and battery resistance.

6.2 App Installation and Connection

The ATORCH DL24 can be controlled and monitored via a mobile application. Follow these steps to install and connect the app:

1. **Download User Manual and PC Software:** Access the user manual and PC software installation guide from this link: <http://www.mediafire.com/folder/m09i9bjv8703d/DL24-DL24P>
2. **Download Android App:**
 - Direct download link: https://www.mediafire.com/file/0jio43c0vuu1wx/U_Meter-Phone_mobile.apk/file
 - Search for "E-test" on Google Play Store.
3. **Download iOS App:** Search for "E_test" on the iPhone App Store.

DL24/DL24P カラーディスプレイ Bluetooth デジタル制御曲線 バージョン 負荷試験装置 アプリ接続方法

1. DL24/DL24PをUSB充電器に差し込み、

Bluetooth インジケーターが点灯します。

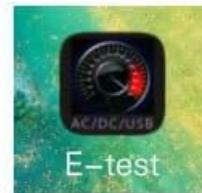

DL24

2. モバイルアプリソフトウェアをダウンロードしてください。Android 5.0 以上のみをサポートします。

<https://www.mediafire.com/folder/31bc15uhq8odb/E-meter>

次に、E-meter APP ソフトウェアを携帯電話にインストールします。

3. 携帯電話のBluetoothをオンにし、携帯電話でE-testアプリを開きます。

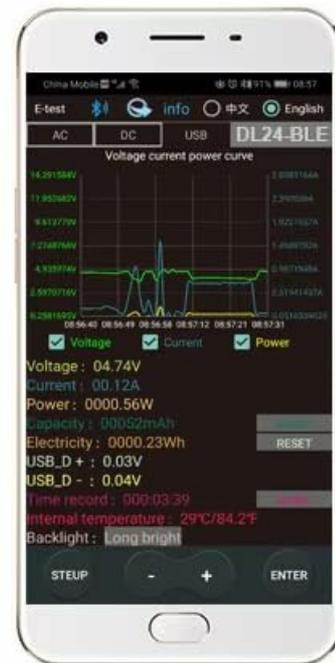

1

USBテスターの電源がオンになると、Bluetoothインジケーターが点滅します。E-test App ソフトウェアアイコンをオンにして、Bluetoothをオンにします。

2

アプリの左上隅にある Bluetooth アイコンをクリックすると、USB テスター モデル DL24-BLE を選択するためのメニューがポップアップ表示され、アプリのメインインターフェイスに戻ります。

3

測定中は、右上隅に現在オンラインになっているモデルが表示されます。DL24-BLE 左上隅の Bluetooth アイコンが青色に変わり、測定がオンライン通信中であることを示します。

Image: ATORCH DL24 App Connection Method. This image details the steps for connecting the DL24/DL24P to the mobile app:

1. Insert the DL24/DL24P into a USB charger; the Bluetooth indicator will light up.
2. Download the mobile app software (Android 5.0 and above supported). Install the E-meter app on your mobile phone.
3. Turn on Bluetooth on your mobile phone and open the E-test app.

4. When the USB tester is powered on, the Bluetooth indicator lights up, and the software app icon shows 'ON'.
5. Click the Bluetooth icon in the upper left corner of the app, select 'DL24-BLE', and the app's main interface will appear.
6. During measurement, the Bluetooth icon in the upper left corner of the DL24-BLE will turn blue, indicating an active online connection and measurement.

6.3 Granting App Permissions

E-TestアプリでBluetoothシンボルを見つける方法

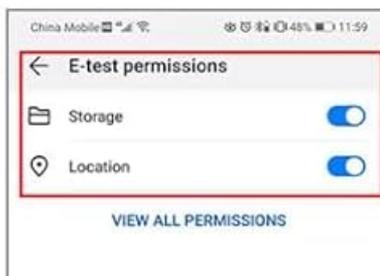

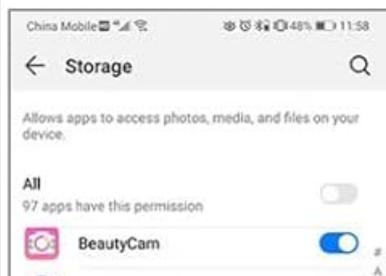

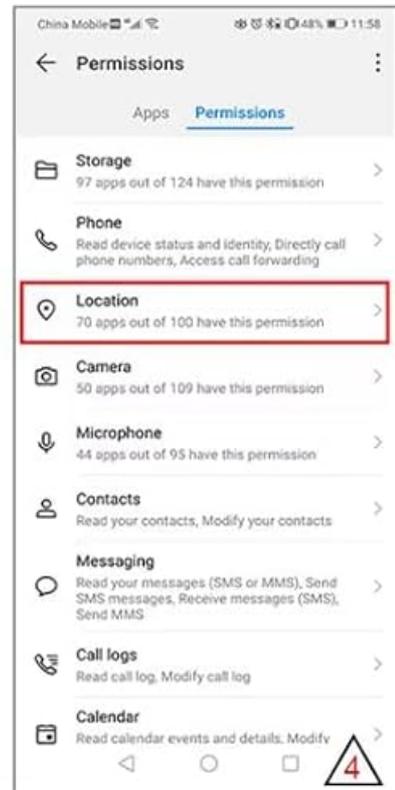

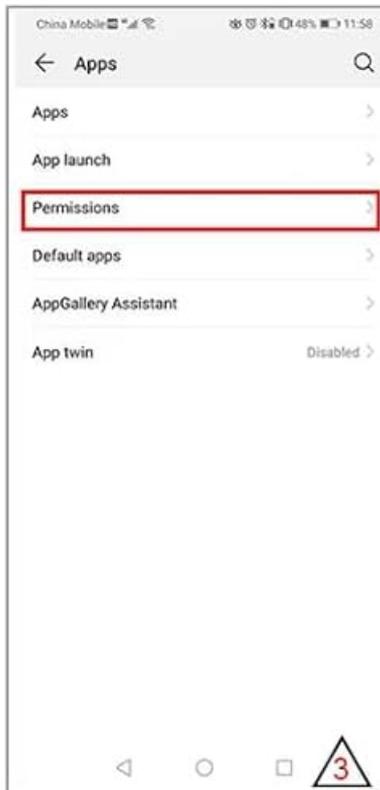

この操作手順は、同社のすべての Bluetooth 製品 (UD18/DT24/DL24/AT3010/DPT3010/T18 など) に適用されます。

携帯電話を開き、「設定」>>「アプリを探す」>>「権限を管理」>>「位置情報」>>「E-testアプリ」>>ストレージ情報と位置情報を見つける>>権限を許可するを開く、Eテストリストで Bluetooth シンボルを見つけることができます。

電話の設定を開いてください

クリック設定

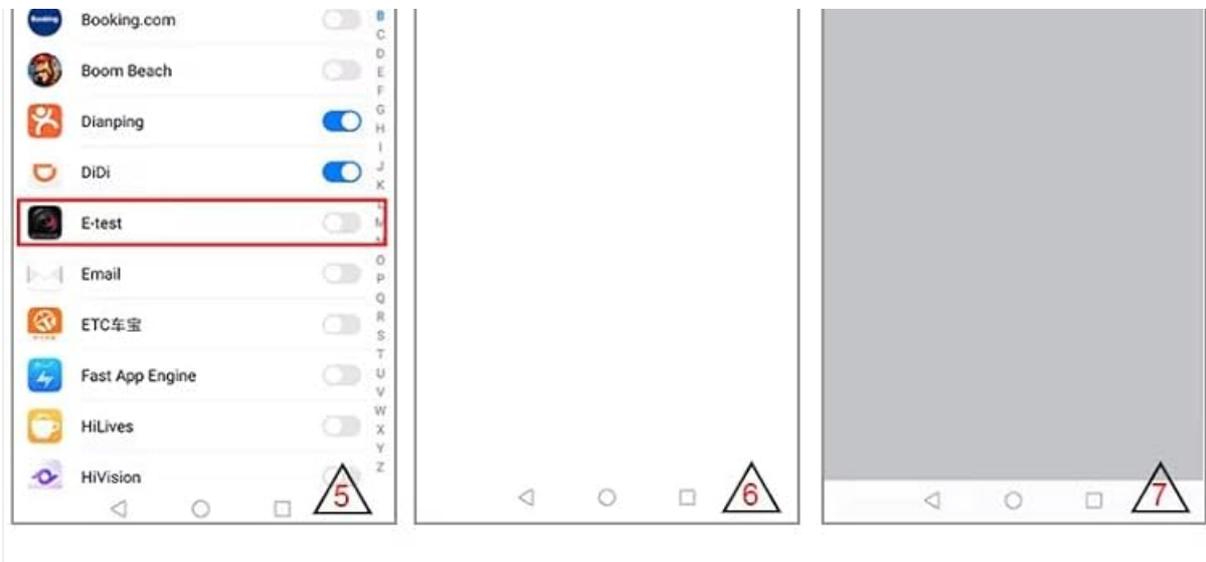

Image: E-Test App Permissions for Android. This image illustrates how to grant necessary permissions for the E-Test app on an Android device. This method is also applicable to other compatible products from the same company.

To ensure proper functionality, especially for location-based features, you may need to grant specific permissions to the E-Test app. Navigate to your phone's settings and follow these general steps:

Open **Phone Settings**.

Go to **Apps** (or Applications).

Select **Manage Apps** (or App Management).

Find and select the **E-Test** app.

Go to **Permissions**.

Enable necessary permissions, such as **Location Information**, by allowing access.
