Troubleshooting

This section addresses common issues you might encounter with your ovios Modular Sectional Sofa Couch.

Issue	Possible Cause	Solution
Modules not connecting securely.	Connectors are not properly aligned or fully engaged.	Ensure the interlocking metal connectors on the underside of each module are correctly aligned and pushed firmly into place. You may need to lift and reseat the modules.
Cushions appear flat or not fully expanded.	Cushions were vacuum-sealed for shipping and require time to expand.	Allow up to 24-48 hours for cushions to fully decompress and regain their shape after unpacking. Gently fluffing them can help accelerate the process.
Sofa feels unstable.	Modules are not properly connected or backrests are loose.	Verify all module connectors are securely fastened. Ensure backrests are fully engaged with their respective bases. Positioning the sofa against a wall can also add stability.
