Maintenance

To maintain the appearance and longevity of your T4TREAM bed frame, wipe it regularly with a dry cloth. Avoid using harsh chemicals or abrasive cleaners, as these may damage the distressed painted finish. Periodically check all bolts and connections to ensure they remain tight and secure.

Troubleshooting

Wobbling or Squeaking:

- If the bed frame feels wobbly or produces squeaking noises, re-check all assembly bolts and ensure they are tightened securely.
- Ensure the bed frame is placed on a flat, even surface. Uneven flooring can cause instability.
- Verify that all wood slats are properly seated in their designated positions and are not damaged.
