4. SETUP AND ASSEMBLY

Assembly of the SEDETA Farmhouse L Shaped Desk requires careful attention to detail. It is recommended that two individuals participate in the assembly process. The estimated assembly time ranges from 3 to 8 hours, depending on experience.

4.1. Before You Begin

- Verify all parts are present and undamaged. Refer to the included parts list.
- Clear a spacious area for assembly.
- Gather necessary tools: A Phillips head screwdriver is recommended. A battery-powered drill with Phillips bits can significantly speed up the process.
- Ensure the assembly surface is clean and protected to prevent scratches to the desk components.

4.2. Assembly Steps

Follow the step-by-step instructions provided in the separate assembly guide included with your product. Pay close attention to diagrams and part numbers. Ensure all wooden peg connections are secure; applying a small amount of wood glue (not included) can enhance stability.

Important: Do not overtighten screws. Ensure all holes align correctly before fastening. If holes do not align, re-check the orientation of the parts.

5. OPERATING INSTRUCTIONS

5.1. Using the Drawers

The desk features three smooth-gliding drawers. The bottom drawer is designed as a file cabinet and can accommodate Legal, Letter, and A4 size files. The upper drawers are suitable for general storage of office supplies and personal items. To open, gently pull the handle. To close, push firmly until the drawer is fully seated.

5.2. Utilizing the Hutch Storage

The top hutch provides both open shelving and enclosed cabinets. Use the open shelves for frequently accessed items or decorative displays. The cabinets offer concealed storage for a tidier appearance. Open and close cabinet doors by gently pulling or pushing the handles.

5.3. Power Outlet Usage

The integrated power strip includes 4 AC outlets and 2 USB charging ports. To activate power, press the red ON/OFF switch. Plug in your devices as needed. When not in use, it is recommended to turn off the power strip using the switch to conserve energy and for safety. There is no need to unplug appliances at all times if the switch is off.

6. MAINTENANCE

To ensure the longevity and appearance of your SEDETA desk, follow these simple maintenance guidelines:

- **Cleaning:** Dust regularly with a soft, dry cloth. For spills, wipe immediately with a damp cloth and dry thoroughly. Avoid harsh chemicals or abrasive cleaners.
- **Drawer Maintenance:** Periodically check the metal drawer glides for smooth operation. If they become stiff, a silicone-based lubricant can be applied sparingly.
- **Structural Integrity:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary, but do not overtighten.
- **Weight Distribution:** Distribute weight evenly across the desk surface and shelves. Do not exceed the maximum weight limit of 174 pounds.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Desk feels wobbly or unstable.	Loose fasteners or uneven assembly.	Ensure all screws and wooden pegs are fully tightened. Verify the desk is on a flat, level surface. Adjust leg levelers if applicable (not explicitly stated, but common for desks).
Drawers do not slide smoothly.	Misaligned drawer glides or debris in the tracks.	Check that drawer glides are properly installed and aligned. Clean tracks of any dust or debris. Apply a silicone lubricant if needed.
Power outlets are not working.	Power switch is off or circuit breaker tripped.	Ensure the red power switch on the power strip is in the ON position. Check your home's circuit breaker.
Assembly instructions are unclear or parts don't fit.	Misinterpretation of diagrams or incorrect part orientation.	Review the assembly diagrams carefully. Ensure parts are oriented correctly (e.g., front/back, top/bottom). If issues persist, contact customer support.
