# Merkury Multicolor LED Jellyfish Lamp User Manual

Model: MI-ML075-999W

## INTRODUCTION

Welcome to the captivating world of the Merkury Multicolor LED Jellyfish Lamp. This unique mood light is designed to bring a tranquil and mesmerizing underwater ambiance to any room. Featuring two artificial jellyfish that gracefully move within the illuminated tank, it offers a soothing visual experience with its vibrant, color-changing LED lights. Please read this manual carefully before operating your new Jellyfish Lamp to ensure proper setup, use, and maintenance.

## WHAT'S IN THE BOX

Upon unpacking, please verify that all components are present and in good condition:

- Merkury Multicolor LED Jellyfish Lamp Unit
- USB Power Cable
- Wall Adapter
- Two Artificial Jellyfish (pre-installed or separate, depending on packaging)

Image: The Merkurs Multicolor LED Jellyfish Lamp, showcasing its design and the artificial jellyfish within. The lamp features a clear cylindrical tank on a black base with control buttons.

## SETUP INSTRUCTIONS

1. **Placement:** Place the Jellyfish Lamp on a stable, flat surface away from direct sunlight, heat sources, or areas with excessive vibration. Ensure there is enough space around the lamp for proper air circulation.
2. **Filling the Tank (if applicable):** If the jellyfish are not pre-installed or the tank is empty, carefully fill the tank with distilled water up to the indicated fill line. Avoid overfilling.  
*Note: Using distilled water helps prevent mineral buildup and keeps the water clear.*
3. **Inserting Jellyfish (if applicable):** Gently place the artificial jellyfish into the water. If they float at the top, use a thin, non-abrasive stick to gently push them down and release any trapped air bubbles from their tentacles. This may take a few minutes.
4. **Power Connection:**
  - Insert the small end of the USB power cable into the USB port located on the back or side of the lamp base.
  - Connect the larger end of the USB cable to the provided wall adapter.
  - Plug the wall adapter into a standard electrical outlet.

*Alternatively, you can connect the USB cable to any compatible USB power source (e.g., computer USB port, power bank) for operation.*

---

## OPERATING INSTRUCTIONS

The Merkury Jellyfish Lamp features intuitive controls for easy operation.

1. **Power On/Off:** Locate the power button ( ) on the lamp base. Press it once to turn the lamp on. Press it again to turn the lamp off.
2. **Changing Light Modes:** Locate the light mode button (\*) on the lamp base.
  - Press the light mode button repeatedly to cycle through various color modes and effects.
  - Modes may include solid colors (red, green, blue, etc.), color-changing transitions, and pulsating effects.
3. **Jellyfish Movement:** The jellyfish will begin to move and float naturally within the tank once the lamp is powered on and the internal pump activates. Allow a few minutes for the jellyfish to settle into their natural movement patterns.

---

## MAINTENANCE

Proper maintenance will ensure the longevity and optimal performance of your Jellyfish Lamp.

- **Cleaning the Exterior:** Wipe the exterior of the lamp with a soft, damp cloth. Do not use abrasive cleaners or solvents, as they may damage the finish.
- **Water Replacement:** It is recommended to replace the water in the tank every 1-2 months, or if the water appears cloudy.
  - a. Unplug the lamp from the power source.
  - b. Carefully remove the top cover.
  - c. Pour out the old water into a sink.
  - d. Rinse the inside of the tank with distilled water.
  - e. Refill with fresh distilled water up to the fill line.
  - f. Reinsert the jellyfish (if removed) and replace the top cover securely.
- **Jellyfish Cleaning:** If the artificial jellyfish appear dirty, gently rinse them under clean water. Do not use soap or detergents.

- **Storage:** If storing the lamp for an extended period, empty the water from the tank and allow all components to dry completely before packing. Store in a cool, dry place.

## TROUBLESHOOTING

If you encounter any issues with your Merkury Jellyfish Lamp, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Lamp does not turn on.	No power connection; faulty adapter/cable.	Ensure the USB cable is securely connected to both the lamp and the power source. Try a different USB port or wall outlet. Verify the wall adapter is functioning.
Jellyfish are not moving or floating properly.	Trapped air bubbles; insufficient water; jellyfish stuck.	Gently push jellyfish down to release air bubbles. Ensure water level is at the fill line. Gently dislodge any stuck jellyfish with a non-abrasive stick.
Water appears cloudy or dirty.	Mineral buildup; algae growth; dirty water.	Replace the water with fresh distilled water as per maintenance instructions. Clean the tank if necessary.
Lamp is leaking water.	Tank not sealed properly; crack in tank; overfilling.	Ensure the top cover is securely fastened. Check for any visible cracks in the tank. Do not overfill the tank beyond the indicated line. If leaking persists, discontinue use and contact customer support.

## SPECIFICATIONS

Feature	Detail
Model Name	Multicolor Jellyfish
Model Number	MI-ML075-999W
Dimensions (D x W x H)	3.25"D x 3.25"W x 9"H
Item Weight	0.77 Pounds (12.3 ounces)
Power Source	USB (5 Volts)
Light Source Type	RGB LED
Material	Acrylic, Plastic
Control Method	Touch Button
Included Components	Jellyfish Lamp, Wall Adapter
