isinlive H7126 Replacement Filter User Manual

For GoveeLife H7126 Mini Air Purifier

1. PRODUCT OVERVIEW

The isinlive H7126 Replacement Filter is specifically designed for use with the GoveeLife H7126 Mini Air Purifier. This 3-in-1 H13 True HEPA filter is engineered to maintain the optimal performance of your air purifier, ensuring cleaner and fresher air in your environment. It is crucial to verify your air purifier model (H7126) to ensure compatibility, as this filter is not suitable for the H7120 Air Purifier.

1.1. 3-in-1 Filtration System

This replacement filter features a comprehensive 3-stage filtration system to capture various airborne particles and odors:

- **Pre-Filter:** Captures larger particles such as hair, lint, and fibers.
- **H13 True HEPA Filter:** Effectively traps 99.97% of airborne particles as small as 0.3 microns, including dust, pollen, and pet dander.
- **Activated Carbon Filter:** Absorbs cooking odors, smoke, volatile organic compounds (VOCs), and other harmful gases.

3 Layers of HEPA Filtration

Activated Carbon Filter:

Cooking odors, smoke,
VOCs, and harmful gases

HEPA Filter:

PM 2.5 and any other 0.3 micron particles

Pre-Filter:

Hair, lint, and fibers

1.2. High-Efficiency Design

The H7126-RF filter incorporates a premium non-woven fabric layer and activated carbon, utilizing advanced low energy consumption and low-density structure technology. This design ensures lower wind resistance, higher efficiency, and reduced pressure for maximum filtration capability.

High-Efficiency Filtration System

Attaches PM 0.3 and
any other 0.1 micron particles

2. INSTALLATION INSTRUCTIONS

Follow these steps to replace the filter in your GoveeLife H7126 Mini Air Purifier:

1. **Step 1:** Flip the air purifier upside down and rotate the bottom cover counter-clockwise to unlock it.
2. **Step 2:** Carefully remove the bottom cover and the used filter from the purifier.
3. **Step 3:** Remove the new H7126 replacement filter from its plastic packaging. Insert the new filter into the purifier, ensuring it is seated correctly.
4. **Step 4:** Reattach the bottom cover by aligning it and rotating clockwise until it locks securely into position.
5. **Step 5:** After replacing the filter, plug in the air purifier. The filter replacement indicator light will turn red when a replacement is needed. To reset the indicator, press and hold the power button for 3 seconds. The indicator light will flash three times, confirming a successful reset.

Easy to Install

1. Flip upside down and rotate the bottom.

2. Take out the bottom cover and the used filter.

3. Remove the plastic bag of the new filter and install it.

4. Press and hold for 3 seconds to reset the filter check indicator.

3. OPERATION

The GoveeLife H7126 Mini Air Purifier, when equipped with the isinlive H7126 Replacement Filter, offers user-friendly operation. The control panel is located on the top of the unit and features touch-sensitive buttons.

3.1. Power On/Off

Lightly touch the power button on the control panel to turn the air purifier on or off. The unit is designed to be quiet, especially on lower settings, making it suitable for use in bedrooms or quiet environments.

3.2. Fan Speed Adjustment

Adjust the fan speed by touching the fan speed button. Multiple speed settings are available to suit your preference and air purification needs. Higher speeds provide faster air purification but may produce more noise.

3.3. Timer Function

Utilize the timer function to set the air purifier to operate for a specific duration (e.g., 2, 4, 6, or 8 hours). This feature allows for automated operation, conserving energy and ensuring air purification only when needed.

4. MAINTENANCE

Regular maintenance of your H7126 replacement filter is essential for optimal air purifier performance and air quality.

4.1. Filter Replacement Frequency

It is recommended to replace the H7126 HEPA filter every 6-8 months. This duration may vary depending on the air quality in your area and the frequency of air purifier use. The air purifier will indicate when a filter replacement is due by illuminating the filter replacement indicator light.

4.2. Filter Care

While the filter is designed for replacement, you may gently vacuum the pre-filter layer to remove larger dust and pet hair buildup between replacements to extend its efficiency. Do not wash the HEPA or activated carbon layers.

5. TROUBLESHOOTING

If you encounter issues with your GoveeLife H7126 Mini Air Purifier or isinlive H7126 Replacement Filter, consider the following:

- **Purifier Not Turning On:** Ensure the unit is properly plugged into a working power outlet. Check if the top cover is securely clicked into place, as the purifier has a safety feature that prevents operation if not properly assembled.
- **Reduced Airflow or Odors:** This often indicates a clogged filter. Check the filter replacement indicator light. If it's red, replace the filter as per the installation instructions. Even if not red, consider replacing the filter if air quality issues persist, especially in environments with high pollution or pet dander.
- **Filter Replacement Indicator Remains On After Replacement:** Remember to reset the filter indicator by pressing and holding the power button for 3 seconds after installing a new filter.
