Havit KB254GCM Wireless Keyboard Mouse Set User Manual

Model: KB254GCM

Introduction

Thank you for choosing the Havit KB254GCM Wireless Keyboard Mouse Set. This set provides a comfortable and efficient input solution for your computer. Featuring advanced 2.4GHz wireless technology, it offers a stable connection up to 10 meters. The keyboard boasts a sleek design with multimedia functions, while the mouse is designed for both right and left-handed users and supports adjustable DPI settings.

Safety Information

- Keep the device away from water, moisture, and extreme temperatures.
- Do not attempt to disassemble or repair the device yourself. Refer to qualified service personnel.
- Use only specified batteries (if applicable) and dispose of them properly.
- Avoid dropping or subjecting the device to strong impacts.

Package Contents

- Havit KB254GCM Wireless Keyboard
- Havit Wireless Mouse
- USB Wireless Receiver (usually located in the mouse battery compartment)
- User Manual

Product Overview

Figure 1: Top-down view of the Havit KB254GCM Wireless Keyboard and Mouse. This image shows the full layout of the keyboard with its round keys and the compact design of the accompanying mouse.

Figure 2: Side view illustrating the slim profile of the Havit KB254GCM Wireless Keyboard and Mouse. This highlights the ergonomic and space-saving design of the set.

Keyboard Features:

- **Round Sleek Key Structure:** Provides a comfortable typing experience.
- **Multimedia Function Keys:** Access common functions quickly (e.g., volume control, media playback).
- **Full-size Layout:** Includes a numeric keypad for enhanced productivity.

Mouse Features:

- **Ambidextrous Design:** Suitable for both right and left-handed users.
- **Adjustable DPI:** Supports 800-1200-1600 DPI for precise cursor control.
- **4 Buttons:** Standard left/right click, scroll wheel, and DPI button.

Setup

1. Battery Installation:

The Havit KB254GCM set requires batteries (not included). Please refer to the markings on the battery compartments for correct polarity.

1. **Keyboard:** Open the battery compartment cover on the underside of the keyboard. Insert the required batteries (e.g., 2 x AAA, check device for exact type). Close the cover securely.
2. **Mouse:** Open the battery compartment cover on the underside of the mouse. Insert the required battery (e.g., 1 x AA, check

device for exact type). The USB wireless receiver is typically stored inside this compartment. Remove the receiver before closing the cover.

2. Connecting the Wireless Receiver:

1. Locate the USB wireless receiver, usually stored in the mouse's battery compartment.
2. Plug the USB wireless receiver into an available USB port on your computer.
3. Your computer should automatically detect and install the necessary drivers. This may take a few moments.

3. Powering On:

1. Ensure the power switch on the underside of both the keyboard and mouse is set to the "ON" position.
2. The keyboard and mouse should automatically connect to the receiver. If they do not connect, try moving them closer to the receiver or re-inserting the receiver.

Operating Instructions

Keyboard Usage:

- **Standard Typing:** Use the keyboard as a standard QWERTY layout keyboard for text input.
- **Multimedia Keys:** The function keys (F1-F12) often have secondary multimedia functions. These are typically activated by pressing the **Fn** key simultaneously with the desired function key. For example, **Fn + F1** might mute audio, **Fn + F2** might decrease volume, etc. Refer to the icons on the keys for specific functions.

Mouse Usage:

- **Left/Right Click:** Standard mouse button functions.
- **Scroll Wheel:** Scroll through documents and web pages. Can also function as a middle click button.
- **DPI Adjustment:** The mouse supports 800, 1200, and 1600 DPI settings. Press the DPI button (usually located behind the scroll wheel) to cycle through these sensitivities. A higher DPI means the cursor moves faster across the screen with less physical mouse movement.

The effective working distance for both the keyboard and mouse is up to 10 meters (33 feet) in an open environment. Performance may vary depending on obstacles and interference.

Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the surfaces of the keyboard and mouse. For stubborn dirt, a slightly damp cloth with mild soap can be used, ensuring no liquid enters the device. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** When not in use for extended periods, turn off the devices to conserve battery life. Store them in a cool, dry place away from direct sunlight.
- **Battery Replacement:** Replace batteries when performance degrades or the low battery indicator (if present) illuminates. Dispose of old batteries according to local regulations.

Troubleshooting

Problem	Solution

Problem	Solution
Keyboard/Mouse not responding.	1. Ensure batteries are correctly installed and not depleted. Replace if necessary. 2. Check if the power switch on both devices is in the "ON" position. 3. Ensure the USB wireless receiver is securely plugged into a working USB port on your computer. Try a different USB port. 4. Move the keyboard/mouse closer to the receiver. 5. Restart your computer.
Lag or intermittent connection.	1. Reduce the distance between the devices and the receiver. 2. Remove any large metal objects or other wireless devices that might be causing interference. 3. Ensure the receiver is not plugged into a USB hub or a port that shares bandwidth with other high-speed devices.
Mouse cursor erratic or not moving smoothly.	1. Clean the optical sensor on the underside of the mouse. 2. Use the mouse on a clean, non-reflective, and uniform surface (e.g., a mouse pad). 3. Adjust the DPI setting using the DPI button on the mouse.
