MAINTENANCE

- **Cleaning:** Wipe the bed frame with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Inspection:** Periodically inspect all parts for wear, damage, or loose connections. Tighten any loose screws or bolts immediately.
- **Wood Care:** As the bed is made from pine wood and engineered wood, avoid prolonged exposure to direct sunlight or extreme humidity to prevent warping or discoloration.

TROUBLESHOOTING

Common Issues and Solutions:

- **Bed feels wobbly or unstable:** Check all connection points and ensure screws and bolts are fully tightened. If the issue persists, disassemble and reassemble carefully, ensuring all parts are correctly aligned.
- **Difficulty with mattress placement:** Ensure you are using a full-size mattress. The design does not require a box spring; the mattress rests directly on the floor within the frame.
- **Parts do not fit:** Double-check the part numbers against the Installation Manual. Ensure you are not forcing

parts together. If a part is genuinely defective, contact customer support for a replacement.
