

Grandstream GWN7604

Grandstream GWN7604 AX3000 Wi-Fi 6 Access Point User Manual

Your guide to setting up, operating, and maintaining your Grandstream GWN7604 Access Point.

1. PRODUCT OVERVIEW

The Grandstream GWN7604 is a compact and powerful Wi-Fi 6 Access Point designed to provide reliable, high-speed wireless connectivity. It is suitable for small businesses, hotels, and home offices, ensuring seamless performance even in high-density environments. This device features dual-band Wi-Fi and advanced MU-MIMO technology, along with four Gigabit Ethernet ports, including one PoE/PoE+ uplink port and two Power Sourcing Equipment (PSE) ports for flexible connectivity.

Key Features

- 3Gbps aggregate wireless throughput with 4x Gigabit ports.
- Up to 100 meters coverage range.
- Self power adaptation upon auto-detection of PoE/PoE+ and PSE.
- Anti-hacking secure boot and critical data/control lockdown via digital signatures, unique security certificate/random default password per device.
- Supports up to 256 concurrent Wi-Fi client devices.

Package Contents

- GWN7604 Access Point
- Mounting Kits
- Quick Installation Guide

Figure 1: Front view of the Grandstream GWN7604 AX3000 Wi-Fi 6 Access Point. The device is white and rectangular, featuring the 'GRANDSTREAM' logo and 'Wi-Fi 6' branding, with a small LED indicator light at the top.

2. SETUP GUIDE

2.1 Physical Installation

The GWN7604 can be mounted on a wall or ceiling using the provided mounting kits. Ensure the chosen location provides optimal Wi-Fi coverage and is within reach of a Power over Ethernet (PoE) source or a suitable power adapter (not included).

1. Select a central location for best signal distribution.
2. Use the mounting bracket as a template to mark drilling points.
3. Secure the mounting bracket to the surface.

4. Attach the GWN7604 Access Point to the secured bracket.

2.2 Powering On

The GWN7604 supports PoE/PoE+ for power. Connect an Ethernet cable from a PoE/PoE+ enabled switch or injector to the uplink port on the GWN7604. The device will power on automatically. A power adapter is not included with this model.

2.3 Initial Configuration

To configure the GWN7604, connect a computer to the same network segment as the Access Point. The device will obtain an IP address via DHCP by default. You can discover its IP address using the Grandstream GWN Discovery Tool or by checking your DHCP server's lease table. Access the web interface by entering the IP address into a web browser.

- Open a web browser and enter the GWN7604's IP address.
- Log in using the default credentials (typically found in the Quick Installation Guide or on the device label).
- Follow the on-screen prompts to set up your Wi-Fi network (SSID, password, security type).

3. OPERATING INSTRUCTIONS

3.1 Network Configuration

Once logged into the web interface, you can configure various network settings:

- **SSID Management:** Create multiple Wi-Fi networks (SSIDs) for different purposes (e.g., staff, guest).
- **Security Settings:** Configure WPA2/WPA3 encryption for secure wireless access.
- **VLAN Tagging:** Assign VLANs to SSIDs for network segmentation.
- **Radio Settings:** Adjust channel, bandwidth, and transmit power for optimal performance.

3.2 Client Device Connection

To connect a client device (smartphone, laptop, tablet) to the GWN7604 Wi-Fi network:

1. On your device, scan for available Wi-Fi networks.
2. Select the SSID you configured for the GWN7604.
3. Enter the Wi-Fi password when prompted.
4. Your device should now be connected to the network.

3.3 Advanced Features

The GWN7604 offers advanced features to enhance network performance and security:

- **Quality of Service (QoS):** Prioritize network traffic for critical applications (e.g., VoIP, video conferencing).
- **Guest Network:** Create isolated networks for guests with limited access.
- **Band Steering:** Automatically guide dual-band clients to the less congested 5GHz band.
- **Load Balancing:** Distribute client connections across multiple access points to prevent overload.

4. MAINTENANCE

4.1 Firmware Updates

Regularly updating the firmware ensures optimal performance, security, and access to new features. Grandstream releases firmware updates periodically.

1. Visit the Grandstream website to check for the latest firmware version for the GWN7604.
2. Download the firmware file.
3. Access the GWN7604 web interface and navigate to the firmware upgrade section.
4. Upload the downloaded firmware file and initiate the upgrade process. Do not power off the device during the upgrade.

4.2 Regular Checks

Perform routine checks to ensure the Access Point is functioning correctly:

- Monitor the LED indicators for normal operation status.
- Check the system logs in the web interface for any errors or warnings.
- Ensure the physical connections are secure and free from damage.

5. TROUBLESHOOTING

5.1 Common Issues and Solutions

- **No Power:**
Ensure the Ethernet cable is securely connected to a PoE/PoE+ source. Verify the PoE source is active and providing power.
- **No Wi-Fi Signal:**
Check if the GWN7604 is powered on. Verify that the Wi-Fi radio is enabled in the web interface. Ensure the SSID is broadcasted and not hidden.
- **Slow Wi-Fi Speeds:**
Check for channel interference using a Wi-Fi analyzer and switch to a less congested channel. Ensure client devices are within optimal range. Verify firmware is up to date.
- **Cannot Access Web Interface:**
Confirm your computer is on the same network segment as the GWN7604. Verify the IP address is correct. Try resetting the device to factory defaults (refer to the Quick Installation Guide for the reset procedure).
- **Client Devices Cannot Connect:**
Double-check the Wi-Fi password. Ensure the maximum number of concurrent clients (256) has not been exceeded. Verify security settings are compatible with client devices.

6. SPECIFICATIONS

Feature	Detail
Model Number	GWN7604
Brand	Grandstream
Wireless Standard	802.11a, 802.11ac, 802.11ax (Wi-Fi 6), 802.11b, 802.11n

Frequency Band Class	Quad-Band
Aggregate Wireless Throughput	3Gbps
Ethernet Ports	4x Gigabit ports (1x PoE/PoE+ Uplink, 2x PSE)
Coverage Range	Up to 100 meters
Concurrent Clients	Up to 256
Special Feature	QoS (Quality of Service)
Power Input	PoE/PoE+ (Power Adapter Not Included)
Operating System	ZyNOS
Item Weight	12.6 ounces
Package Dimensions	6.73 x 5.51 x 1.3 inches

7. WARRANTY AND SUPPORT

Grandstream products typically come with a limited manufacturer's warranty. Please refer to the warranty card included with your product or visit the official Grandstream website for detailed warranty terms and conditions specific to the GWN7604.

For technical support, additional documentation, or to download the latest firmware, please visit the official Grandstream support portal:

GWN76xx Firmware Release Notes

IMPORTANT UPGRADING NOTE

- [60802022] 1.0.23.14 for GWN762K and GWN762S has been released to fix the same SSH security bug in 9150022 releases. Affected models are highly suggested to upgrade to the latest firmware.
- [61500021] 1.0.23.6 for GWN760760DLR/7610760760DLR/76104760DLR and 1.0.23.13 for GWN760760DLR/76105760DLR/7610 has been released. An SSH security bug has been fixed since this version. Affected models are highly suggested to upgrade to the latest firm ware.
- [71500021] [GWN7610 / GWN7600 / GWN760LR] Please upgrade to 1.0.19.29 for security fix against NULFI/fragbbs.
- [61400021] [GWN760LR / GWN7600 / GWN760S / GWN760LR / GWN7610S] Please upgrade to 1.0.19.29 for security fix against NULFI/fragbbs.
- [31400020] [All APs 1.0.15.x] (Due to the security enhancement, unless **Legacy TLS Compatibility** (only available on 1.0.15.x or higher version) is enabled, master AP on 1.0.15.4 or higher firm ware will not compatible with slave AP on firm ware lower than 1.0.15.4. Master AP on firm ware lower than 1.0.15.4 will also not be compatible with slave AP on firm ware 1.0.15.4 or higher. Cloud and GWN Manager will still support both firm ware.
- [31400020] [All APs 1.0.15.x] (Do not use 1.0.15.x AP firm ware with GWN7600 1.0.9.x or lower version.
- [12402018] [All APs 1.0.8.17] In order to enable your AP's capability of connecting GWN Cloud EU server, AP needs to be upgraded to 1.0.8.17 or above.
- [61500018] [GWN7600/760DLR 1.0.8.41] Starting from 1.0.8.x, GWN7600 and GWN760DLR will share same firmware file name: gwn7600main. As a result, when GWN76002L upgrades from pre-1.0.8.x to latest firmware, it will still restore firmware with name gwn7600main, and when GWN760DLR upgrades from 1.0.8.x or post-1.0.8.x to other firm ware, it will restore firm ware with name gwn7600main. So, when your GWN760DLR upgrades from pre-1.0.8.x firm ware, you will need to manually modify the target firm ware name to gwn7600main.
- [10800017] [All APs 1.0.5.15] For firm ware 1.0.5.15, GWN7610 and 1.0.5.13 GWN7600A GWN760DLR, this is only for GWN7610GWN7600GWN760DLR master deployment. All users
