Table 2: Troubleshooting Guide

Problem	Possible Cause	Solution

Parts do not align during assembly	Screws overtightened prematurely; Misaligned components.	Loosen all screws slightly, realign components, then tighten all screws evenly. Ensure not to overtighten until all parts are in place.
Surface scratches or marks	Sharp objects; Abrasive cleaning materials.	Use protective pads under items. Clean with soft cloths and non-abrasive cleaners. Minor scratches may be concealed with furniture polish matching the wood finish.
