Aoxun 10'x12' Hardtop Gazebo

Aoxun 10'x12' Hardtop Gazebo with LED Lights Instruction Manual

Model: 10'x12' Hardtop Gazebo
Brand: Aoxun

Introduction Safety Information Setup Operation Maintenance Troubleshooting Specifications Warranty & Support

1. Introduction

This manual provides comprehensive instructions for the assembly, safe operation, and proper maintenance of your Aoxun 10'x12' Hardtop Gazebo. Please read all instructions carefully before beginning assembly or use to ensure optimal performance and longevity of your product.

Key Features

- **Double Galvanized Steel Roof:** Provides effective heat insulation, promotes ventilation, and offers resistance against rust, fading, snow, and wind.
- **Integrated Netting and Curtains:** Features zippered netting for insect protection and ventilation, alongside curtains with binding belts for privacy and warmth.
- **Spacious Design:** Measuring 10' L x 12' W x 9.6' H, the gazebo covers 120 square feet, offering ample space for various outdoor activities.
- **Sturdy Aluminum Frame:** Constructed with thick powder-coated aluminum for strong load-bearing capacity and enhanced wind resistance. Includes 4 ground piles and expansion screws for added stability.
- **Outdoor String Lights:** Equipped with energy-efficient LED string lights (15 sockets, 16 shatterproof LEDs plus a spare) with an IP65 waterproof rating, suitable for all weather conditions and compatible with dimmer switches (sold separately).

2. Safety Information

Please adhere to the following safety guidelines to prevent injury or damage to the product:

- Always follow assembly instructions carefully and ensure all components are securely fastened.
- Use caution when handling electrical components, especially during installation of the LED lights.

- Secure the gazebo to a stable foundation using the provided ground piles and expansion screws to prevent tipping, especially in windy conditions.
- Do not operate or remain under the gazebo in high winds or heavy rain. Disassemble or secure loose components during severe weather.
- Keep children and pets away from the gazebo during assembly and disassembly to avoid accidents.
- Regularly inspect the gazebo for any signs of wear, damage, or loose connections. Address issues promptly.

3. Setup and Assembly

The Aoxun Hardtop Gazebo is designed for straightforward installation. We recommend that three to four people assist with the assembly, which typically takes two to four hours. All necessary hardware and clear instructions are included.

Preparation

1. **Unpack and Organize:** Carefully unpack all boxes and lay out all parts and hardware. Verify that all components are present according to the parts list in your instruction booklet.
2. **Tools Required:** A drill driver with the proper hex bit is highly recommended to save time. Set the drill to a low setting to avoid stripping screws. Two ladders are also recommended for roof assembly.
3. **Site Selection:** Choose a level and stable area for your gazebo. Ensure adequate clearance around the structure.

Assembly Steps

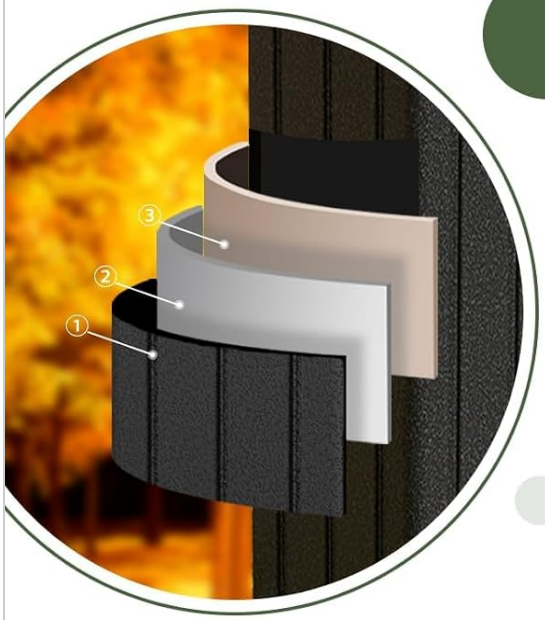

1. **Assemble the Frame:** Begin by connecting the main support beams to the posts. Do not fully tighten all screws until the entire frame is assembled to allow for adjustments.
2. **Install Roof Supports:** Attach the initial roof pieces and cross beams. It may be easier to assemble these on the ground and then lift them into place with assistance.
3. **Attach Roof Panels:** This step requires careful coordination. Ensure roof panels are oriented correctly by comparing screw hole placement with the manual's diagrams. Have one person hold panels in place from below while another secures them. Do not fully tighten screws until all roof panels are in place to allow for minor adjustments.
4. **Secure Roof Trim:** Install the trim pieces around the lower part of the roof. These typically snap into place before being screwed down.
5. **Install Netting and Curtains:** Attach the mosquito netting and privacy curtains to the designated tracks. The netting features zippers for easy opening and closing.
6. **Anchor the Gazebo:** Use the provided ground piles and expansion screws to firmly anchor the gazebo to your chosen surface. This is crucial for stability and wind resistance.
7. **Install LED String Lights:** Hang the LED string lights using the integrated 'J' hooks on the roof structure. Ensure all connections are secure and waterproof.

Sturdy Aluminum Frame

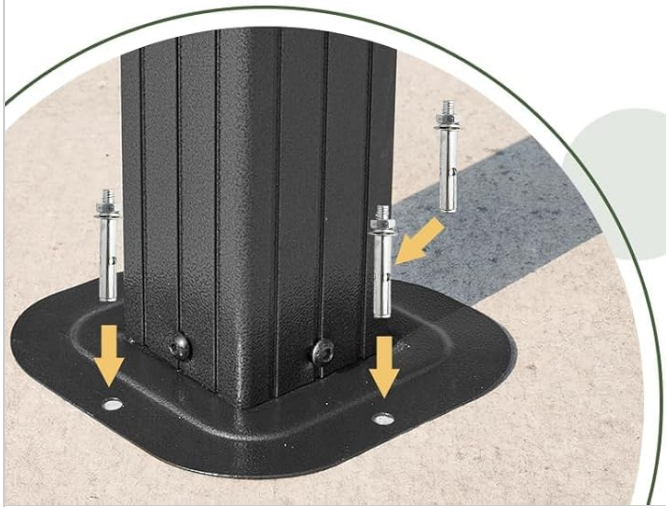

Thick Powder Coating

The thick powder-coated aluminum frame is resistant to rust and corrosion and can be used for a long time

Solid Triangular Structure

The four columns are constructed with the strongest tripod structure toensure the sturdy top cover is durable

Anchoring Frame

Anchiring bracket with drilled holes for easy attachment of any type of floor and secure mounting

4. Operation

Using the Netting and Curtains

- The gazebo features a dual-track system for both mosquito netting and privacy curtains.
- To open or close the netting, simply use the integrated zippers. This allows for flexible ventilation and insect protection.
- The curtains can be drawn for privacy or tied back using the binding belts to create an open-air environment.

LED String Lights

- The included LED string lights provide ambient lighting. Connect them to a suitable power source.
- For enhanced lighting control, the lights are compatible with dimmer switches (sold separately).
- The IP65 waterproof rating ensures durability in various weather conditions.

Ceiling Hooks

- The gazebo roof is equipped with multiple hooks: two 'J' hooks and one 'U' hook.
- The 'U' hook is suitable for hanging a fan, while the 'J' hooks are ideal for decorative items or additional lighting.

5. Maintenance

Cleaning

- **Frame:** Clean the aluminum frame with a soft cloth, mild soap, and water. Avoid abrasive cleaners or harsh chemicals that could damage the powder coating.
- **Roof:** The galvanized steel roof can be cleaned with water and a soft brush to remove debris. The slope drainage system helps prevent water accumulation.
- **Netting and Curtains:** These can typically be spot cleaned with mild soap and water. Refer to any specific care labels if available.

Seasonal Care

- While the gazebo is designed to withstand various weather conditions, including snow and wind, it is advisable to clear heavy snow accumulation from the roof to prevent excessive stress.

- During periods of extreme weather, such as hurricanes or blizzards, consider disassembling the gazebo or securing it with additional anchors if possible.

6. Troubleshooting

Common Issues and Solutions

- **Parts Not Aligning During Assembly:** Ensure all screws are loosely fastened during initial assembly of the frame and roof panels. This allows for minor adjustments to align holes before fully tightening.
- **Missing or Damaged Parts:** If any parts are missing or damaged upon arrival, please contact Aoxun customer service immediately for assistance.
- **Gazebo Instability:** Verify that the gazebo is anchored securely to a stable surface using all provided ground piles and expansion screws. Re-check all frame connections for tightness.

- **Water Accumulation on Roof:** The double roof design includes a slope drainage system. Ensure that the drainage channels are clear of debris to allow water to run off efficiently.
- **Insect Entry Despite Netting:** While the netting provides significant protection, ensure all zippers are fully closed and the netting is properly installed without gaps.

7. Specifications

Feature	Detail
Brand	Aoxun
Model	10'x12' Hardtop Gazebo
Material	Aluminum Frame, Galvanized Steel Roof
Style	Modern
Product Dimensions (L x W x H)	143.7" x 118.1" x 116.1"
Coverage Area	120 sq ft
Water Resistance Level	Water Resistant
Ultraviolet Light Protection	25
Assembly Required	Yes
Color	Gray
Occupancy	10 Person
LED String Lights	15 sockets, 16 shatterproof LEDs (plus 1 spare), IP65 waterproof
