Blütezeit ME-RM-VS-FBA

Blütezeit 300-916MHz Universal Remote Control with Visor Clip Instruction Manual

Introduction

This manual provides instructions for the Blütezeit 300-916MHz Universal Remote Control with Visor Clip, model ME-RM-VS-FBA. This remote is designed for broad compatibility with Blütezeit gate openers (excluding the ME-MJ series) and many third-party gate systems that operate within the 300-916MHz frequency range. Please note that it is not compatible with custom-coded systems. Always consult your gate opener's seller or manual to confirm compatibility before attempting to pair.

Key features of this remote control include:

- **Wide Compatibility:** Works with most 300-916MHz gate and garage door systems.
- **Convenient Visor Clip:** Easily attaches to your car's sun visor for quick access.
- **Durable Construction:** Made with high-quality ABS material and a sturdy metal clip for long-lasting performance.
- **Easy Programming:** Simple setup process for quick pairing.
- **Enhanced Security:** Features rolling code technology to help prevent unauthorized access.

Setup: Programming the Remote

The Blütezeit universal remote control utilizes a one-to-one copy function for straightforward programming. Follow these general steps to pair your new remote with an existing one:

1. **Clear Existing Codes (if necessary):** If your remote has been previously programmed or you wish to reset it, press and hold the two outermost buttons simultaneously until the indicator light flashes rapidly, then turns off. This clears any stored codes.
2. **Prepare for Cloning:** Place your original, working remote control and the new Blütezeit universal remote side-by-side, ensuring they are close enough for signal transmission.
3. **Initiate Copying:** Press and hold the desired button on your original remote. Simultaneously, press and hold the corresponding button on the new Blütezeit remote that you wish to program.
4. **Confirm Successful Copy:** Continue holding both buttons. The indicator light on the new Blütezeit remote will first

flash slowly, then rapidly, and finally remain solid or turn off, indicating successful code copying.

5. **Repeat for Other Buttons:** Release both buttons. Repeat steps 3 and 4 for any other buttons you wish to program on the new remote.
6. **Test Functionality:** After programming, test the new remote control with your gate or garage door opener to ensure it functions correctly.

If you encounter difficulties, ensure both remotes have fresh batteries and are within close proximity. Some gate openers may require specific programming procedures; refer to your gate opener's manual for detailed instructions.

Operating the Remote

Once your Blütezeit universal remote control is successfully programmed, operating your gate or garage door opener is simple:

- **Activation:** Press the corresponding button on the remote that you programmed for your specific gate or garage door function (e.g., open, close, stop).
- **Visor Clip Use:** The included visor clip allows you to securely attach the remote to your car's sun visor. This keeps

the remote easily accessible and prevents it from being misplaced while driving.

- **Range:** Ensure you are within the operational range of your gate or garage door opener for reliable signal transmission.

Maintenance

Proper maintenance ensures the longevity and reliable performance of your Blütezeit universal remote control.

- **Battery Replacement:** The remote control requires one 3V C battery (not included). Replace the battery when the remote's indicator light dims, the operational range decreases, or the remote becomes unresponsive. To replace, carefully open the remote casing, remove the old battery, and insert a new 3V C battery, ensuring correct polarity.
- **Cleaning:** Clean the remote's exterior with a soft, dry cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the casing or internal components.
- **Storage:** Store the remote in a dry place, away from extreme temperatures and direct sunlight, when not in use.

Troubleshooting

If you experience issues with your Blütezeit universal remote control, consider the following troubleshooting steps:

- **Remote Not Responding:**
  - Check the battery. A low or dead battery is a common cause of unresponsiveness.
  - Ensure you are within the effective range of your gate or garage door opener.
  - Verify that the remote is correctly programmed. If unsure, attempt to re-program it following the 'Setup' instructions.
- **Limited Operational Range:**
  - Replace the battery with a fresh one.
  - Check for any physical obstructions between the remote and the receiver of your gate opener.
  - Ensure there are no strong radio frequency interference sources nearby.
- **Difficulty Pairing/Cloning:**

- Confirm that your original remote is functioning correctly and emitting a strong signal.
- Ensure the new remote's existing codes are cleared before attempting to clone.
- Verify that your gate opener system operates within the 300-916MHz frequency range and is not a custom-coded system.
- Refer to your gate opener's specific manual for any unique programming requirements.

If these steps do not resolve the issue, please contact Blütezeit customer support for further assistance.

Specifications

Feature	Detail
Manufacturer	Blütezeit
Model Number	ME-RM-VS-FBA
Item Weight	1.06 ounces
Product Dimensions	2.76 x 1.38 x 1.18 inches
Batteries Required	1 C battery (3V)
Color	Black & Silver
Style	Universal (Except MJ Series)
Special Features	Universal Compatibility, Visor Clip

Warranty

The Blütezeit 300-916MHz Universal Remote Control with Visor Clip is covered by a**1-Year Warranty** from the date of purchase. This warranty covers manufacturing defects under normal use. It does not cover damage resulting from misuse, accidents, unauthorized modifications, or improper battery installation. Please retain your proof of purchase for warranty claims.
