Troubleshooting

If you encounter any issues with your dresser, please refer to the following common troubleshooting tips:

Problem	Possible Cause	Solution
Dresser is wobbly/unstable.	Loose screws or uneven surface.	Ensure all screws are tightened. Adjust the adjustable feet (if applicable) or move to a level surface.
Drawers do not slide smoothly.	Drawer not properly inserted or overloaded.	Remove and re-insert the drawer, ensuring it is correctly aligned. Reduce the weight of contents if overloaded.
Wheels are not locking.	Paddles not fully pressed down.	Ensure the locking paddles on each wheel are fully engaged by pressing them down firmly.
