Dyson 601910-01

Dyson Airwrap i.d.™ Multi-Styler and Dryer Instruction Manual

Model: 601910-01 | Brand: Dyson

1. Overview

The Dyson Airwrap i.d.™ Multi-Styler and Dryer is an advanced hair styling tool designed to dry and style hair simultaneously using the Coanda effect, minimizing heat damage. This connected multi-styler recommends a personalized curling routine based on your hair and styling profile, offering a faster and easier way to achieve consistent curls.

It is specifically engineered with six versatile attachments suitable for curly and coily hair types, providing a comprehensive solution for various styling needs.

2. What's in the Box

Your Dyson Airwrap i.d.™ Multi-Styler and Dryer package includes the following components:

- Dyson Airwrap i.d.™ multi-styler and dryer unit
- Conical barrel
- Wave+Curl diffuser
- Large round volumizing brush
- Anti-snag loop brush
- Wide-tooth comb
- Fast dryer attachment
- Filter cleaning brush
- Presentation case

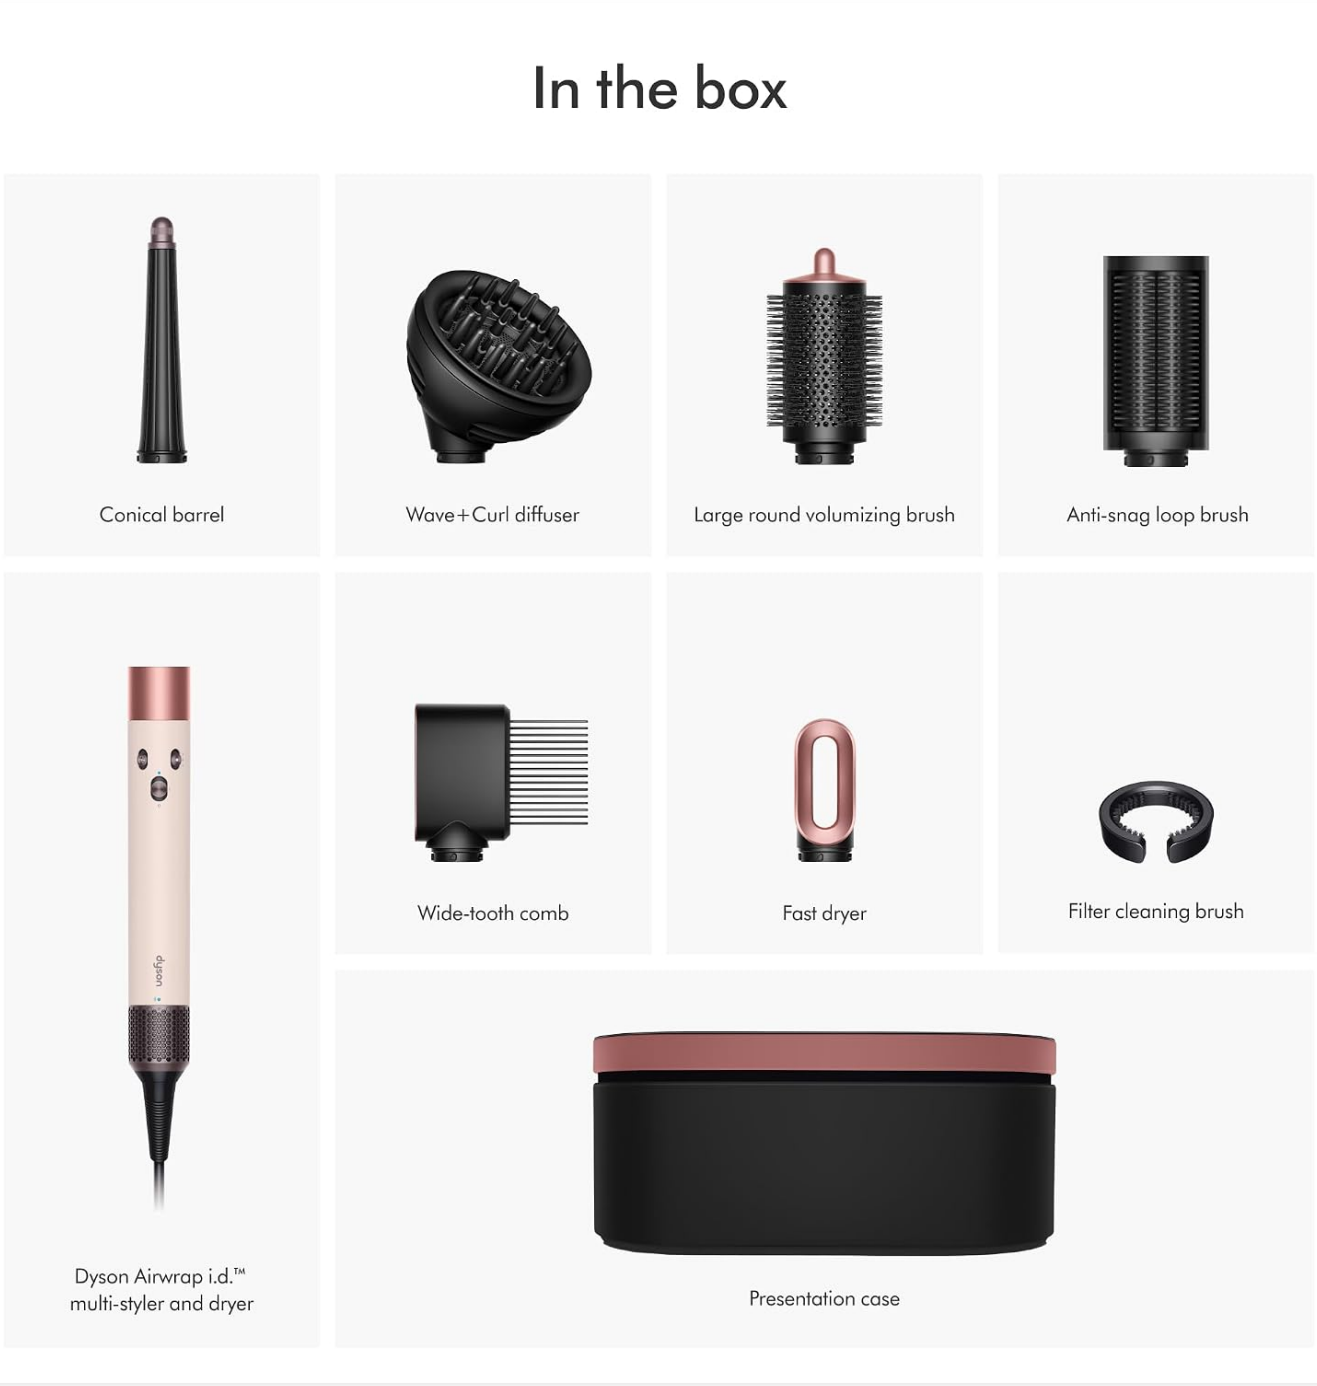

Image: All components included in the Dyson Airwrap i.d.™ Multi-Styler and Dryer package, neatly arranged.

3. Setup

3.1 Initial Preparation

- Ensure the device is unplugged before attaching or detaching any accessories.
- Select the appropriate attachment for your desired styling outcome.
- For best results, start with freshly washed hair that is damp, not soaking wet. Use the Fast dryer attachment to take hair from damp to about 80% dry before styling with other attachments.

3.2 Connecting to the MyDyson™ App

The Dyson Airwrap i.d.™ is a connected multi-styler that can be paired with the MyDyson™ app for personalized styling routines and settings. Follow these steps to connect:

1. Download the MyDyson™ app from your device's app store.
2. Ensure Bluetooth is enabled on your mobile device.
3. Open the MyDyson™ app and follow the on-screen instructions to add your Airwrap i.d.™ device. You may need to hold your mobile device close to the Airwrap unit for pairing.
4. Set up your personalized hair profile within the app. This allows the Airwrap i.d.™ to tailor its settings to match your specific hair type and styling preferences.

4. Operating Instructions

4.1 Powering On and Basic Controls

- Plug the device into a suitable power outlet.

- Power on your Dyson Airwrap i.d.™ by sliding the thumb up on the power button.
- Adjust airflow and temperature settings using the dedicated buttons on the handle. The device offers multiple heat and speed settings, including a cold shot function to set your style.

4.2 Styling with Attachments

The Dyson Airwrap i.d.™ utilizes the Coanda effect to attract and wrap hair, styling without extreme heat. Here are general guidelines for using key attachments:

- **Fast Dryer:** Use to quickly dry hair from wet to damp (about 80% dry) before styling.
- **Conical Barrel:** For defined curls. Hair is automatically attracted to the barrel and wrapped. Hold for a few seconds, then use the cold shot to set the curl before releasing. The conical barrel can be adjusted for left or right-side curling by rotating the tip.
- **Smoothing Brush:** To smooth hair and reduce frizz. Use on damp hair, guiding the brush through sections.
- **Volumizing Brush:** For adding volume and shape. Use on damp hair, lifting from the roots.
- **Wide-tooth Comb:** Designed for curly and coily hair to lengthen and shape.
- **Wave+Curl Diffuser:** For enhancing natural waves and curls.

5. Key Technologies and Features

The Dyson Airwrap i.d.™ incorporates advanced technology to deliver efficient and hair-friendly styling:

- **Coanda Effect:** This aerodynamic phenomenon attracts hair to the barrel or brush, wrapping it automatically. It styles hair using air, not extreme heat, preventing heat damage.
- **Intelligent Heat Control:** Measures air temperature over 40 times a second to regulate heat, ensuring it never exceeds 150°C (302°F).
- **Dyson Digital Motor V9:** Powers the Coanda effect, spinning at up to 110,000rpm, generating the pressure needed to create the Coanda effect.
- **Personalized Styling:** Through the MyDyson™ app, the device can recommend and adapt settings for a

personalized curling routine based on your hair and styling profile.

6. Maintenance

Regular maintenance ensures optimal performance and longevity of your Dyson Airwrap i.d.™:

- **Filter Cleaning:** The filter should be cleaned regularly to prevent blockages and maintain airflow. Use the provided filter cleaning brush to gently remove any hair or dust buildup. A dirty filter can lead to reduced performance or the device stopping.
- **Attachment Cleaning:** Wipe down attachments with a damp cloth after use to remove any product residue. Ensure they are completely dry before storing.
- **Storage:** Store your Airwrap and its attachments in the provided presentation case to protect them from dust and damage.

7. Troubleshooting

If you encounter issues with your Dyson Airwrap i.d.™, refer to the table below for common problems and their solutions:

Problem	Possible Cause	Solution
Device stops working or has reduced airflow.	Blocked filter.	Clean the filter thoroughly using the provided filter cleaning brush. Ensure no hair or dust remains.

Problem	Possible Cause	Solution
Device not turning on.	No power, or internal fault.	Check power connection. If the issue persists after cleaning the filter, contact Dyson support.
Curls do not hold or are not defined.	Hair too wet/dry, incorrect technique, or not using cold shot.	Ensure hair is damp (80% dry). Use proper technique as described in operating instructions. Always use the cold shot to set curls.
Difficulty connecting to MyDyson™ app.	Bluetooth off, app issue, or device not in pairing mode.	Ensure Bluetooth is on. Restart the app and your device. Follow in-app pairing instructions carefully.

For issues not listed here or if solutions do not resolve the problem, please contact Dyson Customer Support.
