SETUP

Unpacking

1. Carefully remove the tower fan and all accessories from the packaging.
2. Check for any damage during transit. If any damage is found, do not use the product and contact customer support.
3. Ensure all components are present: Tower Fan Unit, Remote Control, User Manual.

Assembly

The VCK 13" Tower Fan typically comes pre-assembled. No tools are required for setup. Simply ensure the base is securely attached if it was detached for packaging.

Placement

- Place the fan on a firm, level surface.
- Ensure there is adequate space around the fan for optimal airflow and oscillation (e.g., not directly against a wall).
- Keep the fan away from curtains or other objects that could obstruct the air intake or outlet.
- Position the fan near a standard 120V AC power outlet.

OPERATING INSTRUCTIONS

Control Panel

The fan features an intuitive touch control panel located on the top of the unit.

MAINTENANCE

Cleaning

1. Always unplug the fan from the power outlet before cleaning.
2. Use a soft, damp cloth to wipe the exterior surfaces of the fan. Do not use abrasive cleaners or solvents.
3. For dust accumulation in the air intake/outlet grilles, use a vacuum cleaner with a brush attachment or compressed air to gently remove dust.
4. Do not allow water to drip into the interior of the fan.

Storage

- If storing the fan for an extended period, clean it thoroughly.
- Store the fan in its original packaging or a suitable box to protect it from dust and damage.
- Store in a cool, dry place.

TROUBLESHOOTING

If you encounter issues with your VCK Tower Fan, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Fan does not turn on.	No power supply; Power button not pressed.	Ensure the fan is plugged into a working outlet. Press the power button on the unit or remote.
Weak airflow.	Air intake/outlet blocked; Fan speed too low.	Check for obstructions and clear them. Increase the fan speed setting.
Fan is noisy.	Fan not on a level surface; Internal dust accumulation.	Place the fan on a stable, level surface. Clean the air grilles as per maintenance instructions.
Remote control not working.	Battery depleted; Obstruction between remote and fan.	Replace the CR2025 battery. Ensure no objects are blocking the signal path.

If the problem persists after trying these solutions, please contact VCK customer support.
