1. SAFETY INFORMATION

Please read and understand all instructions before beginning assembly and use. Failure to follow these instructions may result in injury or damage to the product.

- Keep all small parts and packaging materials away from children.
- Assemble the bed frame on a soft, clean surface (e.g., carpet) to prevent scratches.
- Ensure all bolts and screws are securely tightened before use. Periodically check and re-tighten as necessary.
- Do not use power tools for assembly as this may overtighten or strip screws.
- Do not stand or jump on the bed frame.
- The maximum weight capacity for this King size bed frame is 800 lbs. Do not exceed this limit.
- Use only the recommended mattress size for this bed frame.

2. PACKAGE CONTENTS

Before assembly, verify that all components are present and undamaged. If any parts are missing or damaged, please contact customer support.

Image: An exploded view showing all individual components of the bed frame, including the headboard, footboard, side rails, center support, and metal slats.

Parts List:

- A: Headboard (1)
- B: Footboard (1)
- C: Side Rails (2)
- D: Center Support Beam (1)
- E: Metal Slats (13)
- F: Support Legs (various sizes, quantity as per diagram)
- G: Hardware Pack (bolts, washers, Allen wrench)

Note: The exact quantity and type of hardware may vary slightly. Refer to the included assembly diagram for precise details.

3. SETUP AND ASSEMBLY

Assembly typically takes two adults approximately 30 minutes. Ensure you have enough space and all parts are laid out before starting.

1. **Unpack and Identify:** Carefully unpack all components and lay them out on a soft, clean surface. Identify each part using the parts list and diagrams.
2. **Attach Side Rails to Headboard:** Connect the side rails (C) to the headboard (A) using the provided bolts and an Allen wrench. Do not fully tighten bolts yet.
3. **Attach Side Rails to Footboard:** Connect the other end of the side rails (C) to the footboard (B) using the provided bolts. Ensure the curved upholstered sections face outwards. Do not fully tighten bolts yet.
4. **Install Center Support Beam:** Attach the center support beam (D) to the designated brackets on the headboard and footboard. Secure with bolts.
5. **Attach Support Legs:** Screw the support legs (F) into the pre-drilled holes on the center support beam and side rails. Adjust for even height.
6. **Tighten All Connections:** Once the main frame is assembled, go back and securely tighten all bolts using the Allen wrench. Do not overtighten.
7. **Place Metal Slats:** Lay the metal slats (E) across the side rails, ensuring they are evenly spaced and fit into the designated slots or supports.
8. **Final Check:** Gently shake the frame to ensure stability. If any wobbling occurs, re-check all connections and tighten as needed.

4. OPERATING INSTRUCTIONS

This bed frame is designed for standard King size mattresses. No box spring is required due to the heavy-duty metal slat support system.

- **Mattress Placement:** Carefully place your King size mattress directly onto the metal slats.
- **Weight Capacity:** The bed frame is designed to support a maximum weight of 800 lbs (including mattress and occupants).
- **Underbed Storage:** The frame provides 8 inches of clearance from the floor, offering ample space for underbed storage containers.

5. MAINTENANCE AND CARE

Proper care will extend the life and appearance of your bed frame.

- **Cleaning Metal Parts:** Wipe metal surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals.
- **Cleaning Upholstered Parts:** For the fabric headboard and footboard, spot clean with a mild detergent and a clean, damp cloth. Blot dry. Do not saturate the fabric.
- **Regular Inspection:** Periodically (every 3-6 months) check all bolts and connections to ensure they remain tight. Re-tighten if necessary to prevent squeaking or instability.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight may cause the fabric upholstery to fade.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose bolts or uneven support legs.	Ensure all bolts are securely tightened. Check that all support legs are making firm contact with the floor and are evenly adjusted.
Squeaking noises.	Loose connections, friction between metal parts, or mattress movement.	Re-tighten all bolts. Apply a small amount of lubricant (e.g., silicone spray) to metal-on-metal contact points if necessary. Ensure the mattress is properly seated.
Slats are falling out.	Slats not properly seated or frame is not square.	Ensure each slat is fully inserted into its designated slot. Verify the bed frame is assembled squarely.

7. SPECIFICATIONS

King size: inch

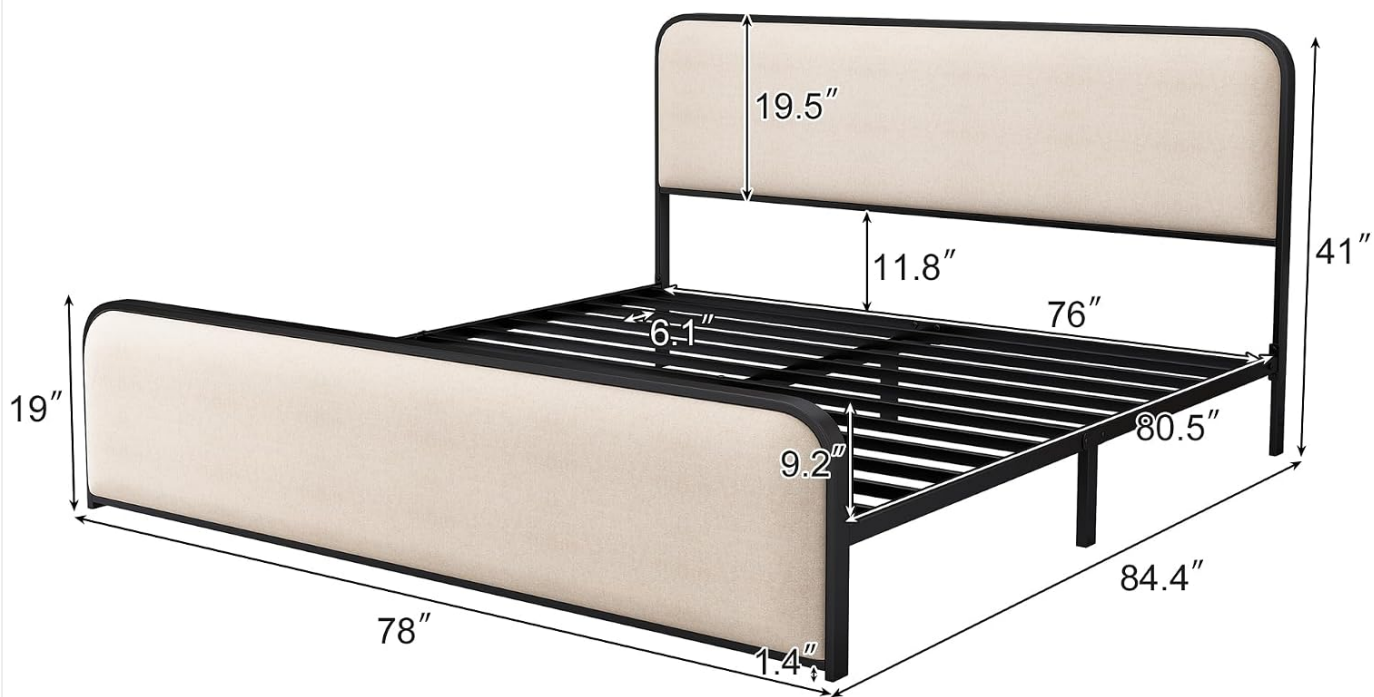

Image: A detailed diagram showing the dimensions of the King size bed frame in inches, including overall length, width, height, headboard height, and underbed clearance.

Feature	Detail
Brand	THINK 30
Model Number	N701P229016B
