7. Troubleshooting

If you encounter any issues with your cabinet, please refer to the following common solutions:

- **Cabinet feels unstable:** Ensure the anti-tip kit is properly installed and secured to a wall stud. Verify all assembly screws are tightened. Avoid placing excessively heavy items on upper shelves.
- **Doors do not close properly:** Check that the hinges are correctly aligned and tightened. Adjust the magnetic catches if needed.
- **Drawer sticks or is difficult to open/close:** Ensure the drawer slides are correctly installed and free of obstructions. Check for any loose screws on the drawer or its runners.
