### PawHut D51-443V00ND

# PawHut Hamster Cage Instruction Manual

Model: D51-443V00ND

## INTRODUCTION

---

This manual provides essential instructions for the assembly, operation, and maintenance of your PawHut Hamster Cage, Model D51-443V00ND. Please read these instructions carefully before assembly and use to ensure the safety and well-being of your pet and the longevity of the product. This cage is designed for dwarf hamsters, gerbils, Syrian hamsters, and rats.

## SAFETY INFORMATION

---

- Always supervise children when they are interacting with the pet and the cage.
- Ensure all parts are securely fastened during assembly to prevent injury to your pet.
- Place the cage on a stable, level surface away from direct sunlight, drafts, and extreme temperatures.
- Regularly inspect the cage for any damage or loose parts that could pose a hazard.
- Keep small children and other pets away from the cage during cleaning or when the doors are open.
- The wooden components are not treated to be waterproof. Use a protective liner on the bottom to prevent urine absorption and facilitate cleaning.

## PACKAGE CONTENTS

---

Before beginning assembly, please verify that all components listed below are present and undamaged:

- Wooden cage panels
- Metal mesh top panels

- Stand frame
- Wheels (4, with 2 lockable)
- Ramps (multiple)
- Shelf
- Water bottle
- House/Hideout
- Seesaw
- Assembly hardware (screws, connectors, etc.)
- Instruction manual

## SETUP INSTRUCTIONS

---

Assembly is required for this product. Follow the numbered steps carefully. It is recommended to have a second person assist with assembly.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches. Identify each component using the provided parts list.
2. **Assemble the Stand:** Connect the metal frame pieces of the stand according to the diagrams. Attach the four wheels to the bottom of the stand, ensuring the two lockable wheels are positioned at the front for easy access.
3. **Construct the Cage Base:** Assemble the wooden base panels of the cage. Ensure all connections are tight and secure.
4. **Install Internal Levels and Ramps:** Place the internal shelf and ramps as indicated in the diagrams. These provide multiple levels for your pet to explore.
5. **Attach Top Panels:** Secure the metal mesh top panels to the wooden frame. Ensure the latches are properly installed for secure closure.
6. **Place Accessories:** Position the house/hideout, seesaw, and water bottle inside the cage. The water bottle typically attaches to the mesh or a designated opening.
7. **Secure Cage to Stand:** Carefully lift the assembled cage and place it onto the stand, ensuring it is stable and centered.

## OPERATING INSTRUCTIONS

Once assembled, your PawHut Hamster Cage is ready for your pet. Follow these guidelines for optimal use:

- **Bedding:** Place a generous layer of appropriate bedding material (e.g., paper-based, aspen shavings) on the bottom level. Ensure it is deep enough for burrowing.
- **Food and Water:** Fill the provided water bottle with fresh water daily. Place a food bowl with appropriate pet food in an easily accessible area.
- **Pet Introduction:** Gently introduce your pet to its new habitat. Allow them time to explore and get accustomed to their surroundings.
- **Access and Observation:** The clear front panel and mesh top allow for easy observation of your pet without disturbance. The top doors provide convenient access for feeding, cleaning, and interaction.
- **Mobility:** Use the four smooth-rolling wheels to easily move the cage around your home. Engage the brakes on the two lockable wheels when the cage is in its desired position to prevent accidental movement.

## MAINTENANCE

Regular cleaning and maintenance are crucial for your pet's health and the cage's longevity:

- **Daily Cleaning:** Remove soiled bedding and replenish food and water daily.
- **Weekly Deep Clean:** Remove all bedding, accessories, and your pet. Wipe down all surfaces with a pet-safe cleaner. Rinse thoroughly and allow to dry completely before returning your pet and fresh bedding.
- **Wood Care:** The cage is made of natural fir wood. To protect the wood from moisture and pet waste, it is highly recommended to use a waterproof liner or protective coating on the bottom surfaces where bedding is placed. Avoid harsh chemical cleaners on wooden parts.
- **Accessory Cleaning:** Clean the water bottle, food bowl, house, and seesaw regularly with warm, soapy water and rinse well.

## TROUBLESHOOTING

- **Gaps in Flooring:** If small gaps appear in the wooden flooring, especially near the back panel, these can be sealed with pet-safe wood sealant or by adding a small wooden strip to prevent bedding from

falling through. Ensure any sealant is fully cured and non-toxic before pet reintroduction.

- **Unstable Doors:** If doors are not aligned or do not close properly after assembly, check that all screws are tightened and that the frame is square. Adjust hinges or latches as needed.
- **Wood Absorption:** Natural wood can absorb pet waste. As mentioned in maintenance, use a protective liner (e.g., plastic sheet, linoleum) on the bottom of the cage to prevent odors and damage.
- **Difficulty Moving:** If the cage is difficult to move, ensure the wheel brakes are disengaged. Check wheels for any obstructions or debris.
