Techkey Bluetooth Adapter 5.3 USB Mini EDR Dongle Instruction Manual

Model: Bluetooth Adapter 5.3 USB Mini EDR Dongle

1. INTRODUCTION

This manual provides comprehensive instructions for the setup and operation of your Techkey Bluetooth Adapter 5.3 USB Mini EDR Dongle. This device enables Bluetooth connectivity for your desktop or laptop computer, allowing you to connect various Bluetooth-enabled peripherals.

The adapter features Bluetooth 5.3 + EDR technology, offering enhanced anti-interference capabilities, improved stability, and reduced transmission efficiency loss in the 2.4 GHz frequency band. It supports a transmission rate of up to 3Mbps and a range of up to 30 meters in open areas. Its ultra-small, compact design ensures it can be easily carried and used without obstructing adjacent USB ports.

System Compatibility: This adapter is designed for Plug & Play functionality and supports Windows 11, Windows 10, and Windows 8.1 operating systems. It is backward compatible with Bluetooth 5.2/4.2/4.0/3.0/2.1. **Please note:** This adapter does not support Mac, Linux, Unraid, TV, car stereo systems, PS4, or Xbox consoles.

2. SETUP AND INSTALLATION

2.1. Disabling Built-in Bluetooth (If Applicable)

If your computer has a built-in Bluetooth module, it is recommended to disable it before installing the Techkey Bluetooth Adapter to prevent conflicts and ensure optimal performance. Follow these steps:

2. In the "Computer Management" window, click on "Device Manager" in the left pane.
3. Expand the "Bluetooth" category. You will see a list of Bluetooth devices.
4. Locate your computer's built-in Bluetooth adapter (e.g., "Intel Wireless Bluetooth"). Right-click on it and select "Disable device". **Important:** Be sure to **disable** it, not uninstall it. A computer cannot use two Bluetooth adapters simultaneously.
5. Confirm the action if prompted.
