## 1. INTRODUCTION

---

This manual provides essential instructions for the setup, operation, maintenance, and troubleshooting of your Accutime Superman Classic Logo Silver Analog Watch. Please read this manual thoroughly to ensure proper use and care of your timepiece.

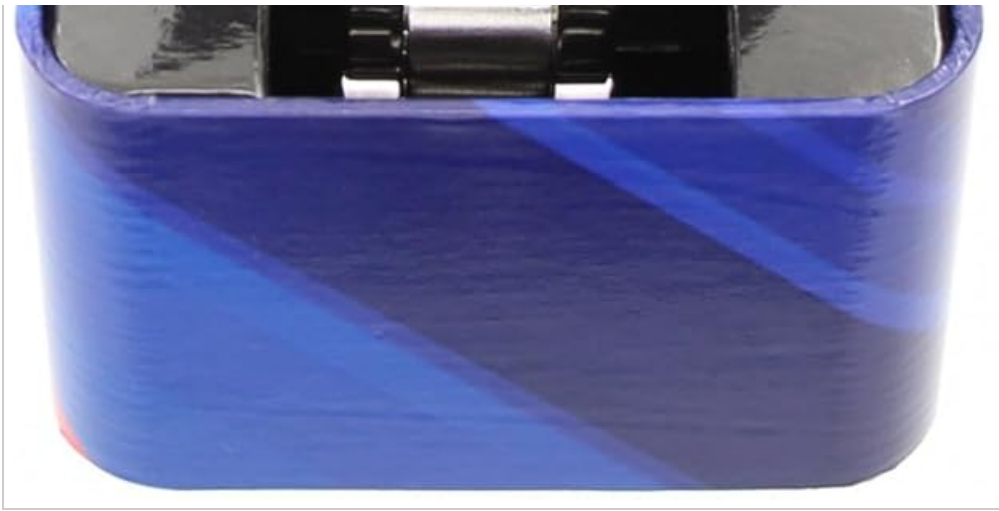

*Image 1.1: Front view of the Accutime Superman Classic Logo Silver Analog Watch. The watch features a silver-tone metal band and case, with a silver dial displaying the iconic red and yellow Superman 'S' shield logo at its center. The dial has silver-tone hour markers and hands.*

## **2. SETUP**

## 2.1 Unboxing

Carefully remove the watch from its packaging. Inspect the watch for any visible damage. Retain the packaging for future storage or if the watch needs to be returned.

*Image 2.1: The Accutime Superman Classic Logo Silver Analog Watch displayed within its blue and red themed box, featuring Superman branding. The watch is secured in a black insert inside the open box.*

## 2.2 Setting the Time

1. Locate the crown (the small knob on the side of the watch case).
2. Gently pull the crown outwards to the time-setting position. You may feel a slight click.
3. Turn the crown clockwise or counter-clockwise to move the hour and minute hands until the desired time is displayed.
4. Once the time is set, push the crown back into its original position against the watch case. This will start the watch movement.

## 2.3 Adjusting the Metal Band

The metal band can be adjusted to fit your wrist. This typically involves removing or adding links. Due to the specialized tools required, it is recommended to have this adjustment performed by a professional jeweler or watch repair service to avoid damaging the band or clasp.

## 3. OPERATING YOUR WATCH

---

### 3.1 Basic Timekeeping

Your Accutime Superman watch is an analog timepiece. The hour hand indicates the hour, and the minute hand indicates the minute. The watch operates continuously once the crown is pushed in and the battery is functional.

## 4. MAINTENANCE AND CARE

---

### 4.1 Cleaning

To maintain the appearance of your watch, wipe the case and band with a soft, dry cloth. For metal bands, a slightly damp cloth can be used, followed by immediate drying. Avoid using harsh chemicals or abrasive materials, as these can damage the finish.

### 4.2 Battery Replacement

The watch is powered by a standard watch battery. When the watch stops running, the battery may need replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure proper sealing and prevent damage to the internal components.

## 4.3 Storage

When not in use, store your watch in a dry, cool place, away from direct sunlight and extreme temperatures. The original packaging or a watch box is ideal for protection.

*Image 4.1: The closed packaging box for the Accutime Superman watch. The box is blue with diagonal stripes and features an illustration of Superman on the lid, along with the DC Comics logo.*

## 5. TROUBLESHOOTING

- **Watch not running:** Check if the crown is fully pushed in. If it is, the battery may need replacement.
- **Time is inaccurate:** Ensure the crown is fully pushed in after setting the time. If the issue persists, the battery may be low, or the watch may require servicing.
- **Band discomfort:** The metal band may need adjustment. Consult a professional jeweler for resizing.

## 6. SPECIFICATIONS

- **Model Number:** 030506638292
- **ASIN:** B0DR39JL3C
- **Brand:** Accutime
- **Clasp Type:** Buckle
- **Department:** Unisex
- **Manufacturer:** Accutime Watch Corp.

## 7. WARRANTY AND SUPPORT

---

Your Accutime watch is covered by a limited manufacturer's warranty against defects in materials and workmanship. Please refer to the warranty card included with your purchase for specific terms and conditions, or visit the official Accutime website for detailed warranty information.

For technical support or service inquiries, please contact Accutime customer service through their official website or the contact information provided with your purchase documentation.
