KINGBIKE P-8

KINGBIKE Bike Helmet P-8 Instruction Manual

Model: P-8

1. INTRODUCTION

Thank you for choosing the KINGBIKE Bike Helmet P-8. This helmet is designed to provide protection and comfort for adult men, women, and youth during road, commute, and mountain cycling. It features a durable construction, efficient ventilation, and an integrated rechargeable rear light for enhanced safety. This helmet is certified by both CPSC and CE, ensuring it meets rigorous safety standards. It incorporates a one-piece shock-absorbing EPS foam and an advanced PC shell to offer superior shock absorption and drop resistance, providing maximum head protection.

3. SETUP

3.1 Head Size Measurement and Helmet Fitting

Proper helmet fit is crucial for safety and comfort. Follow these steps to ensure your helmet fits correctly:

1. Use a flexible measuring tape to measure the circumference of your head over your hair.
2. Position the tape about 1 inch (2.5 cm) above your eyebrows and above the top of your ears.
3. Repeat the measurement a few times to ensure accuracy and use the largest number as your head size.
4. Refer to the size chart below to choose the appropriate helmet size.

Size Chart

Suggest Size	Head Circumference
M	20.4-22.1 inches (52-56 cm)
L	22.4-23.6 inches (57-60 cm)

Once you have selected the correct size, place the helmet on your head. Use the adjustable dial at the back of the helmet to tighten or loosen the fit until it is snug but comfortable, without causing pressure points. The helmet should not move excessively when you shake your head.

SIZE ADJUSTABLE

Size Chart

Suggest Size	Label Value
M: 20.4-22.1in / 52-56cm	M:54-59cm
L: 22.4-23.6in / 57-60cm	L:59-62cm

How to measure the head size

- 1 Use a flexible measuring tape to measure the circumference of your head over the hair.
- 2 Position the tape about 1 inch above your eyebrows and above the top of your ears.
- 3 Repeat the measurement a few times and use the largest number as your head size.
- 4 Refer to the "Suggest Size" above to choose the right product based on your measurement.

3.2 Visor Attachment

The helmet comes with two detachable sun visors. To attach a visor, align the clips on the visor with the corresponding slots on the helmet and press firmly until it clicks into place. To remove, gently pull the visor away from the helmet.

4. OPERATING THE HELMET

4.1 Rear LED Light Operation

The integrated USB rechargeable LED tail light enhances visibility, especially during nighttime or low-light conditions. Ensure the light is charged before use.

- **Charging:** Connect the provided USB charging cable to the light's port and a USB power source. A full charge takes approximately 0.5 hours.
- **Power ON/OFF:** Double-click the button on the tail light to turn it on or off.
- **Change Modes:** Once the light is on, single-click the button to cycle through the three flashing

modes: steady, slow flashing, and fast flashing.

DOUBLE-CLICK
to turn the light **ON/OFF**.

IMPORTANT: This light requires a **double-click** to turn on/off.

Video: This video demonstrates the operation of the KINGBIKE helmet's tail light, including how to turn it on/off and switch between flashing modes.

5. MAINTENANCE

5.1 Cleaning the Helmet Shell

To clean the helmet's exterior, use a soft cloth dampened with mild soap and water. Avoid harsh chemicals,

abrasive cleaners, or solvents, as these can damage the helmet's finish and materials. Rinse with clean water and air dry.

5.2 Cleaning and Replacing Inner Pads

The helmet includes two sets of interchangeable soft inner pads for easy replacement and washing. To clean the pads:

1. Gently detach the inner pads from the helmet.
2. Hand wash the pads with mild soap and cool water.
3. Rinse thoroughly and allow them to air dry completely before reattaching.
4. To reattach, align the hook-and-loop fasteners on the pads with the corresponding areas inside the helmet.

6. TROUBLESHOOTING

6.1 Rear LED Light Not Functioning

- **Check Battery:** Ensure the tail light is fully charged. Connect it to the USB charging cable and allow it to charge for 0.5 hours.
- **Correct Operation:** Remember to double-click the button to turn the light on or off. A single click only changes modes once the light is active.

6.2 Helmet Feels Uncomfortable or Loose

- **Adjust Dial:** Use the adjustable dial at the back of the helmet to tighten the fit. It should be snug but not overly tight.
- **Strap Adjustment:** Ensure the chin straps are properly adjusted and buckled. The straps should form a 'V' shape below your ears.
- **Pad Placement:** Verify that the inner pads are correctly installed and evenly distributed.
- **Size Verification:** Re-measure your head circumference and compare it to the size chart to confirm you have the correct helmet size.

7. SPECIFICATIONS

Feature	Detail
Brand	KINGBIKE
Model Name	P-8
Certifications	CPSC, CE
