1. Device Does Not Power On

- Ensure the battery is sufficiently charged. Connect the power adapter and wait a few minutes before attempting to power on.

- Press and hold the power button for 10-15 seconds to perform a hard reset.

2. Screen Remains Black After Update

- If the screen turns black after a Windows update, do not immediately force power off. Wait for at least 30 minutes to an hour, as the update might still be processing in the background.
- If the issue persists, try connecting the tablet to an external monitor via the full-function USB-C port to see if there is display output.
- Perform a hard reset by holding the power button until the device shuts down, then restart.

3. Poor Battery Life

- Adjust screen brightness to a lower setting.
- Close unnecessary background applications.
- Disable Wi-Fi or Bluetooth when not in use.
- Ensure Windows is updated to the latest version, as updates often include power management improvements.
