## Water Drainage:

The unit has an internal plate that catches water and evaporates it automatically. In very humid conditions, manual drainage may be required. A drain hose is provided for this purpose.

## 5. TROUBLESHOOTING

This section provides general guidance for common issues. For detailed troubleshooting steps, please refer to the full User Manual PDF linked in the Support section.

- **Unit not cooling effectively:** Check if the exhaust hose is properly installed and sealed. Ensure the air filter is clean. Verify that the room size is within the recommended cooling area (up to 350 sq. ft.).
- **Unit is noisy:** Ensure the unit is placed on a flat, stable surface. Check for any obstructions around the air intake or exhaust.
- **Water leakage:** If the unit is leaking water, ensure the drain plug is securely closed. In high humidity, the internal reservoir might fill up, requiring manual drainage.
- **Smart control issues:** Verify Wi-Fi connectivity and ensure the SmartHome app is updated. Re-pair with Alexa or Google Assistant if necessary.
