## 3. SETUP AND INSTALLATION

Follow these steps to properly install your WOLFBOX X5 Dash Cam in your vehicle:

1. **Prepare the Windshield:** Clean the area on your windshield where you intend to mount the dash cam.

Apply the electrostatic sticker to the cleaned area.

2. **Mount the Dash Cam:** Attach the GPS bracket to the main dash cam unit. Secure the dash cam with the attached GPS bracket onto the electrostatic sticker on the windshield. Ensure it has a clear view of the road ahead.
3. **Connect Power:** Plug the Type-C Power Cable into the dash cam's power port (usually on the GPS bracket). Route the cable neatly along the windshield edge and down to your vehicle's 12V power outlet using the provided installation tool to tuck the cable into gaps.
4. **Install Rear Camera:** Connect the Rear Cam Cable to the main dash cam unit. Route this cable to the rear of your vehicle, tucking it along the headliner and side panels. Mount the 2.5K Rear Camera on your rear windshield using its adhesive.
5. **Initial Power-On & Wi-Fi Setup:** Plug the car charger into your vehicle's 12V outlet. The dash cam should power on automatically.

## 4. OPERATING INSTRUCTIONS

The WOLFBOX X5 offers multiple ways to control its functions:

## Touch Screen Operation

The responsive touch screen allows for intuitive navigation through menus and settings. Swipe and tap to access various features and customize your dash cam experience.

## Built-in 5.8Ghz Wi-Fi & GPS

GPS provides accurate location and speed data while connecting to the app enables high-speed data transmission.
