2. SAFETY INFORMATION

Please read and adhere to the following safety guidelines before using the product:

- May cause skin irritation. Avoid direct contact with eyes and mouth.
- Do not ingest. If swallowed, seek immediate medical attention.
- Keep out of reach of children and pets.
- Use in a well-ventilated area to prevent excessive inhalation.
- If pregnant or nursing, consult a healthcare provider before use.
- Store in a cool, dry place away from direct sunlight and heat.

3. USAGE INSTRUCTIONS

3.1 Setup and Operating

The Ethlauff Hotel Collection Diffuser Oils are versatile and can be used in various applications. Always follow the specific instructions for your chosen method.

For Diffusers:

- Ensure your diffuser is clean and filled with the appropriate amount of water (if applicable, for ultrasonic diffusers).
- Add 3-5 drops of your chosen Ethlauff Hotel Collection oil directly into the diffuser's water reservoir or oil pad (for nebulizing diffusers).
- Adjust the number of drops based on your desired scent intensity and the size of the room.
- Operate the diffuser according to its manufacturer's instructions.

For Soap Making and Candle Crafting:

- Incorporate the fragrance oils into your soap or candle base according to standard recipe guidelines.
- Perform a small test batch to ensure desired scent strength, compatibility with your base materials, and to observe any potential reactions (e.g., clumping in cold process soap).
- These oils are primarily fragrance oils and may not be suitable for all cold process soap recipes without prior testing.

Topical Application (Diluted):

- Always dilute with a carrier oil (e.g., jojoba, almond, coconut oil) before applying to skin. A common dilution ratio is 1-2 drops of fragrance oil per teaspoon of carrier oil.
- Perform a patch test on a small, inconspicuous area of skin (e.g., inner forearm) to check for sensitivity or allergic reactions before widespread use.

4. VERSATILE APPLICATIONS

Beyond diffusers, these fragrance oils can enhance various aspects of your daily life:

- **Car Air Freshener:** Add a few drops to a car diffuser or an absorbent material.
- **Laundry:** Add a few drops to wool dryer balls or a washcloth during the drying cycle for scented clothes.
- **DIY Projects:** Ideal for creating custom bath salts, body lotions, hair oils, perfumes, and other scented crafts.
- **Room Spray:** Mix with water and a dispersing agent in a spray bottle for an instant room freshener.

7. TROUBLESHOOTING

Scent Longevity:

If the scent dissipates quickly when used in a diffuser, consider increasing the number of drops used or using a diffuser with a stronger output. Ensure the room is not overly ventilated, as this can reduce the perceived presence of the scent. Factors like room size, air circulation, and diffuser type can affect how long a scent lasts.

Soap Making Compatibility:

Some fragrance oils may react differently with various soap bases (e.g., cold process, melt and pour). If you experience issues such as clumping, discoloration, or scent fading, it is recommended to adjust the oil concentration or test with a different soap base. These oils are primarily designed for fragrance and may not be suitable for all cold process soap recipes without prior testing.

Skin Irritation:

If skin irritation occurs after topical application, discontinue use immediately. Always dilute with a carrier oil and perform a patch test on a small area of skin before widespread use to check for sensitivity.
