

AVAPOW A37A & AP6

AVAPOW A37A & AP6 Car Battery Jump Starter User Manual

Models: A37A, AP6

1. INTRODUCTION

Thank you for choosing the AVAPOW A37A or AP6 Car Battery Jump Starter. This device is designed to provide a reliable and safe solution for starting vehicles with dead batteries, and the AP6 model also includes an integrated air compressor for tire inflation. This manual provides essential information for the safe and effective use, maintenance, and troubleshooting of your jump starter. Please read it thoroughly before operation and retain it for future reference.

2. SAFETY INFORMATION

Always observe the following safety precautions to prevent injury or damage to the device or vehicle:

- Read all instructions before use.
- Do not operate the jump starter if it is damaged or has been dropped.
- Ensure the clamps are connected to the correct battery terminals (red to positive, black to negative). Reverse polarity can cause damage.
- Do not allow the red and black clamps to touch each other, as this can cause sparks or short circuits.
- Keep the jump starter away from children.
- Do not expose the device to rain or extreme temperatures.
- Do not attempt to jump start a frozen battery.
- Wear eye protection and gloves when operating the device.
- Ensure the vehicle is in park (automatic) or neutral (manual) with the parking brake engaged before attempting to jump start.
- Disconnect the clamps from the vehicle battery within 30 seconds after the vehicle starts.

3. PACKAGE CONTENTS

Verify that all items are present in your package:

- AVAPOW A37A or AP6 Jump Starter Unit

- Smart Jumper Clamps
- USB-C Charging Cable
- User Manual
- Storage Bag
- For AP6 model: Air Hose with Nozzle Adapters

5. SETUP

5.1 Charging the Jump Starter

Before initial use, fully charge the jump starter. It is recommended to charge the device every 3-6 months to maintain battery health, even when not in use.

1. Connect the provided USB-C charging cable to the USB-C IN/OUT port on the jump starter.
2. Connect the other end of the USB-C cable to a 60W USB-C wall charger (not included).
3. The LCD screen will display the charging progress. A full charge typically takes about 1.5 hours from 0% to 100% with a 60W charger.

6. OPERATING INSTRUCTIONS

6.1 Jump Starting a Vehicle

Ensure the jump starter is at least 50% charged before attempting to jump start a vehicle.

1. Turn off the vehicle's ignition and all accessories.
2. Connect the red (+) clamp to the positive (+) terminal of the vehicle's battery.
3. Connect the black (-) clamp to the negative (-) terminal of the vehicle's battery.
4. Plug the smart jumper cable connector into the jump starter's port. The jump starter's screen should indicate 'READY'.
5. Start the vehicle. If the vehicle does not start immediately, wait 30 seconds and try again. If it still doesn't start, press and hold the 'BOOST' button on the jump starter for 3 seconds, then try starting the vehicle.
6. Once the vehicle starts, disconnect the smart jumper cable connector from the jump starter.
7. Remove the black (-) clamp from the vehicle's battery, then remove the red (+) clamp.

START YOUR CAR BATTERIES IN SECONDS

If cannot start the car, please long press the "BOOST" button to start your car.

6.2 Using the Air Compressor (AP6 Model Only)

The AP6 model includes a 150 PSI digital air compressor for inflating tires and other inflatables.

1. Connect the air hose to the air compressor port on the AP6 unit.
2. Attach the appropriate nozzle adapter to the air hose and secure it to the tire valve or inflatable.
3. Turn on the AP6 unit. The LCD screen will display the current pressure.
4. Use the '+' and '-' buttons to set the desired pressure.
5. Press the 'PUMP' button to start inflation. The compressor will automatically stop once the preset pressure is reached.
6. Disconnect the air hose and store it properly.

Image 6.2: The AVAPOW AP6 jump starter actively inflating a car tire, showing the digital display with pressure readings and auto-stop function.

6.3 Using as a Portable Power Bank

The jump starter can charge various electronic devices via its USB output ports.

1. Connect your device's charging cable to one of the USB output ports (USB1 Out, USB2 Out, or USB-C In/Out).
2. The jump starter will automatically begin charging your device.
3. The USB-C port supports 60W Power Delivery for fast charging compatible laptops and devices.

Image 6.3: The AVAPOW AP6 jump starter functioning as a portable power bank, charging a tablet and a smartphone simultaneously via its multiple output ports.

6.4 Using the Emergency Light

The integrated LED light provides illumination for various situations.

1. Press the light button once for constant flashlight mode.
2. Press again for SOS signal mode.
3. Press a third time for strobe light mode.
4. Press a fourth time to turn off the light.

7. MAINTENANCE

- **Charging:** Recharge the jump starter every 3-6 months, even if not used, to prolong battery life.
- **Cleaning:** Wipe the unit with a dry, soft cloth. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Store the device in a cool, dry place, away from direct sunlight and extreme temperatures. Ensure it is fully charged before long-term storage.
- **Clamps:** Inspect the jumper clamps for any damage or corrosion before each use.

8. TROUBLESHOOTING

Refer to the table below for common issues and their solutions.

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Vehicle does not start	Low charge on jump starter; incorrect clamp connection; vehicle battery severely discharged.	Ensure jump starter is fully charged. Check clamp connections for correct polarity. Use 'BOOST' function if necessary.
Jump starter not charging	Faulty cable or charger; port damage.	Try a different USB-C cable and a compatible 60W wall charger. Contact customer support if issue persists.
Air compressor not working (AP6)	Hose not connected properly; low jump starter battery; incorrect pressure setting.	Ensure air hose is securely connected. Check jump starter battery level. Verify pressure setting.
LCD screen error message	Internal fault; extreme temperature.	Refer to the specific error code in the manual (if provided by manufacturer) or contact customer support. Ensure operating within recommended temperature range.

9. SPECIFICATIONS

- **Peak Current:** 4000A
- **Engine Compatibility (A37A):** Up to 10.0L Gas / 10.0L Diesel
- **Engine Compatibility (AP6):** Up to 8.0L Gas / 8.0L Diesel
- **Jump Starts per Charge (A37A):** Up to 60
- **Jump Starts per Charge (AP6):** Up to 50
- **USB-C Input/Output:** 5V-3A, 9V-3A, 12V-3A, 15V-3A, 20V-3A (Max 60W PD)
- **USB1 Output:** 5V-3A, 9V-2A, 12V-1.5A
- **USB2 Output:** 5V-3A, 9V-2A, 12V-1.5A
- **DC Output:** 12-16.8V-10A
- **Air Compressor (AP6 only):** 150 PSI Digital Compressor with Auto Shut-off
- **Emergency Light:** 600 Lumens (Flashlight, SOS, Strobe)
- **Standby Time:** Approximately 24 months

10. WARRANTY AND SUPPORT

AVAPOW products are designed for reliability and performance. For warranty information, technical support, or any questions regarding your AVAPOW jump starter, please refer to the warranty card included in your package or visit the official AVAPOW website. You may also contact AVAPOW customer service directly for assistance.
