Schylling NeeDoh Nice Cube

Schylling NeeDoh Nice Cube Instruction Manual

Brand: Schylling | Model: NeeDoh Nice Cube

Introduction

The Schylling NeeDoh Nice Cube is a sensory squeeze toy designed to provide tactile stimulation and stress relief. Its unique material offers a satisfying squish and stretch experience, returning to its original cube shape after manipulation. This manual provides essential information for the proper use and care of your NeeDoh Nice Cube.

Key Features:

- Provides a satisfying squish and stretch sensation.
- Features a super solid squish that offers resistance.
- Designed to return to its original 2.25-inch cube shape.
- Available in various eye-catching colors.

Setup

The NeeDoh Nice Cube requires no assembly or batteries. Simply remove the product from its packaging. It is ready for immediate use.

Operating Instructions

To use your NeeDoh Nice Cube, simply hold it in your hand and apply pressure. You can:

- **Squish:** Compress the cube firmly to experience its solid yet pliable texture.
- **Squeeze:** Apply gentle pressure to deform the cube, observing its slow return to shape.
- **Stretch:** Gently pull and stretch the material. The cube will revert to its original form.

The sensation of the squish can vary; it feels soft when squished slowly and firmer when squished quickly. This toy is suitable for use at home, work, or during travel as a quiet sensory activity.

Maintenance and Care

To ensure the longevity and cleanliness of your NeeDoh Nice Cube, follow these guidelines:

- **Cleaning:** If the cube collects dust or appears cloudy, it can be cleaned with mild soap and water. Rinse thoroughly and air dry.
- **Temperature:** The cube's texture may become firmer in colder temperatures. Playing with it will warm it up, making it softer and more pliable.
- **Storage:** Store the cube in a clean, dry place away from direct sunlight or extreme temperatures.

Troubleshooting

- **Cube feels too hard:** If the cube feels unusually firm, it may be due to cold temperatures. Warm it up by holding it in your hands or gently working it until it softens.

- **Surface is sticky or dusty:** The material may attract dust or debris over time. Refer to the 'Maintenance and Care' section for cleaning instructions.
- **Damage (rips/leaks):** While designed to be durable, excessive force or sharp objects can cause damage. If a rip occurs, the internal material may begin to leak. Discontinue use if the product is damaged to prevent further leakage or ingestion of contents.
