cleaners that may damage the finish.

- **Hardware Check:** Periodically check all screws, bolts, and fasteners to ensure they are tight. Retighten if necessary to maintain structural integrity.
- **Slat Inspection:** Regularly inspect the bed slats for any signs of damage or wear. Replace any broken or weakened slats immediately to prevent mattress sagging or collapse.
- **Guardrail Integrity:** Ensure guardrails remain firmly attached and are not loose or damaged. They are crucial for safety on upper bunks.
- **Environmental Conditions:** Avoid placing the bed in direct sunlight or near heat sources, which can cause wood to dry out or warp. Maintain a stable room temperature and humidity.
