**realhide CB70W**

# Instruction Manual

## 2025 UPGRADED 5GHz WiFi HIDDEN SPY CAMERA

Model: CB70W | Brand: realhide

### 1. Product Overview

The realhide 2025 Upgraded 5GHz WiFi Hidden Spy Camera is a sleek, ultra-compact indoor surveillance solution designed for real-time monitoring of your home, pets, or office. It features 4K Ultra HD video, smart motion detection with real-time alerts, and intelligent night vision. This camera supports both 2.4GHz and 5GHz WiFi networks for effortless connectivity and offers flexible video storage options including cloud and local SD card storage.

### 3. Key Features

- **Wireless Mini WiFi Security Camera:** Ultra-compact design for hassle-free indoor surveillance with simple WiFi connectivity.
- **Smart Motion Detection, Real-Time Alerts:** Advanced motion detection technology sends instant alerts to your mobile device upon movement.
- **4K Ultra HD with Smart Night Vision:** Guarantees crystal-clear, high-resolution footage, capturing details up to 15 feet even in complete darkness.
- **Support 5GHz Networks:** Compatible with both 2.4GHz and 5GHz WiFi networks for effortless connection.
- **Longer Battery Life Support:** Powered by a 2000mAh battery, it enters sleep mode when no motion is detected to conserve power.
- **Flexible Video Storage & Playback:** Offers optional cloud storage and local storage via an SD card (up to 256GB, not included).

## 4. Setup Guide

To set up your realhide 5GHz WiFi Camera, follow these steps:

1. **Install the O-KAM Pro App:** Download and install the 'O-KAM Pro' application on your smartphone. This is crucial for the 5GHz WiFi version; do not use the Ubox app.
2. **Register an Account:** Open the app and follow the on-screen instructions to register a new user account.
3. **Power On the Camera:** Turn on your camera. Ensure it is charged or connected to a power source.
4. **Connect to WiFi:** In the O-KAM Pro app, initiate the device discovery process. Once the camera is recognized, select your 5GHz or 2.4GHz WiFi network and enter the password to connect.
5. **Placement:** The mini camera is easy to install and can be placed discreetly anywhere indoors, such as on a shelf, desk, or mounted to a wall or ceiling.

## Easy to use

The image shows a three-step setup process for the O-KAM PRO app. Step 1: Install APP and register. Step 2: Turn on Bluetooth and WiFi, wait for recognition. Step 3: Set WiFi, click next to connect. The app interface shows a 'Homepage' with a 'Connect' button and a 'Beginners guide' video. The final screen shows a live view of a living room with a play button overlay.

**Step 1**  
Install APP and register

**Step 2**  
Turn on and , wait for recognition

**Step 3**  
Set WiFi, click next to connect

## 5. Operating Instructions

Once your camera is set up and connected to the O-KAM Pro app, you can access its full range of features:

- **Live View:** Open the app to view real-time footage from your camera. You can select HD or SD quality.
- **Motion Detection:** Enable or disable motion detection. When enabled, the camera will automatically record and send alerts to your device upon detecting movement.

- **Night Vision:** Activate or deactivate the smart night vision feature for clear recording in low-light or no-light conditions. Note that some models may require manual toggling between day and night vision.
- **Recording & Playback:** Access recorded events through the app. Recordings are saved to your chosen storage method (SD card or cloud).
- **Remote Shutdown:** The app may offer an option to remotely shut down the camera to conserve battery life.

Image: A smartphone screen displaying the motion detection feature of the camera, highlighting its ability to identify and track moving objects like pets.

## 6. Storage Options

Your realhide camera offers two primary storage solutions for your video footage:

- **Micro SD Card Storage:** Insert a Micro SD card (up to 256GB, not included) into the camera for local storage. This allows you to access recordings directly from the card via the app.
- **Cloud Storage:** Optional cloud storage is available through the O-KAM Pro app. This is a paid service, but you may be offered a free trial. You can cancel your subscription at any time.

Image: An infographic detailing the two storage options: cloud storage with subscription details and micro SD card storage up to 256GB.

## 7. Maintenance

To ensure optimal performance and longevity of your camera:

- **Battery Care:** The 2000mAh battery is rechargeable. To maximize battery life, allow the camera to enter sleep mode when no motion is detected. Recharge as needed using the provided charging cable.
- **Cleaning:** Gently wipe the camera lens and body with a soft, dry cloth to remove dust or smudges. Avoid using harsh chemicals or abrasive materials.
- **Firmware Updates:** Periodically check the O-KAM Pro app for any available firmware updates to ensure your camera has the latest features and security enhancements.

## 8. Troubleshooting

If you encounter issues with your realhide camera, consider the following:

- **Connectivity Issues:** Ensure your WiFi network is stable and within range. Verify that you are connecting to either a 2.4GHz or 5GHz network as supported. If changing WiFi routers, the camera may need to be reinitialized.
- **App Permissions:** Confirm that the O-KAM Pro app has all necessary permissions enabled on your smartphone for proper functionality.
- **Motion Detection Inconsistency:** If motion detection is inconsistent, try toggling the motion detection setting off and on within the app, or adjust sensitivity levels. Note that continuous recording may drain the battery faster.
- **Night Vision Not Switching:** Some models may require manual toggling of night vision. Check the app settings to ensure it's not stuck in one mode.
- **SD Card Recording:** Ensure an SD card is properly inserted. The app may default to cloud options; look for settings to view local SD card recordings.
- **Charging Cable Interference:** If using the included bracket, ensure it does not obstruct the charging port when connecting a power cable.

## 9. Specifications

<b>Feature</b>	<b>Detail</b>
Model Name	Wireless Security Camera
Item Model Number	CB70W
Indoor/Outdoor Usage	Indoor
Power Source	Battery Powered (2000mAh)
Connectivity Protocol	Wi-Fi (2.4GHz & 5GHz)
