

Anker B25M2

Anker Zolo Magnetic Wireless Charger (Model B25M2) Instruction Manual

Qi2 Certified 15W MagSafe-Compatible Wireless Charging Pad

INTRODUCTION

Thank you for choosing the Anker Zolo Magnetic Wireless Charger. This manual provides essential information for the safe and efficient use of your new wireless charging pad. Please read it thoroughly before operation and retain it for future reference.

Image: Two Anker Zolo Magnetic Wireless Chargers, black, with integrated USB-C cables.

WHAT'S IN THE BOX

- Anker Zolo Magnetic Wireless Charger (Model B25M2) with integrated 5 ft (1.5m) USB-C cable
- Cable tie (for cable management)
- User Guide & Safety Sheet

Note: A USB-C power adapter (wall charger) is not included and must be purchased separately. For optimal 15W fast charging, a 20W or higher USB-C power adapter is recommended.

SETUP

1. **Prepare Power Adapter:** Ensure you have a compatible USB-C power adapter. For 15W fast charging, use a 20W or higher output adapter.

2. **Connect Charger:** Plug the USB-C connector of the Anker Zolo Magnetic Wireless Charger into your power adapter.
3. **Connect to Power Outlet:** Plug the power adapter into a wall outlet.
4. **Cable Management:** Use the included cable tie to neatly manage any excess cable length.

Only For iPhone And AirPods

Reminder:

Use a 20W or Higher USB-C
Charger (Not Included)

USB-C

USB-A

Laptop

Note: We do not recommend connecting this charging pad to a laptop, as the laptop's low power output may reduce charging speed and affect device operation.

Not Compatible with Google Pixel 10 Series

Image: The Anker Zolo Magnetic Wireless Charger with its USB-C cable connected to a power adapter, illustrating the setup process.

OPERATING INSTRUCTIONS

1. **Device Compatibility:** This charger is designed for iPhone 13/14/15/16/17 series and AirPods with wireless charging cases. It is not compatible with Android phones (e.g., Google Pixel series) due to differences in protocols and hardware, which may result in slower charging or no charging.
2. **Magnetic Attachment:** Place your compatible iPhone (with a MagSafe-compatible case if applicable) or AirPods case onto the center of the charging pad. The magnetic alignment will ensure proper positioning for efficient charging.
3. **Charging Indication:** Your device's screen will indicate that charging has begun. For AirPods, the indicator light on the case will show charging status.
4. **Optimal Performance:** For best results, charge without a phone case. If using a case, ensure it is MagSafe-compatible, non-metallic, and no thicker than 2.5 mm.

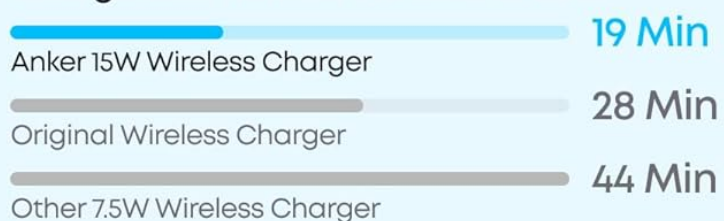

Fast Charging Only for iPhone

Designed for iPhone — **Not Compatible with Android**

2X
Faster*

Charge an iPhone 16 Pro Max to 20%

*Data based on internal testing, charging an iPhone 16 Pro Max from 0 to 20% compared to using a 7.5W wireless charger. Actual performance may vary based on usage conditions.

Image: An iPhone 16 Pro Max being charged wirelessly on the Anker Zolo Magnetic Wireless Charger, highlighting its 15W fast charging capability.

CHARGING TIPS

- **Made for iPhone and AirPods:** This charger is Qi2-certified and provides up to 15W of wireless charging for iPhone models. Due to differences in protocols and hardware, we do not recommend using it with Android phones, as charging power of non-iPhone devices may be lower than 15W, resulting in slower speeds.

- **Choosing the Right Power Adapter:** To achieve 15W max wireless fast charging, use a 20W or higher USB-C power adapter. Using an adapter below 20W may lead to slower charging performance.
- **Using Your Phone While Charging:** Using your phone during charging—for example, while streaming videos or gaming—generates additional heat, which may reduce charging speed. This is normal. The charging pad supports device use while charging, but for optimal speed and temperature control:
 - Try to limit high-intensity tasks and charge during lighter-use or idle periods.
 - For the best results, charge without a phone case. If using one, make sure it is MagSafe-compatible, non-metallic, and no thicker than 2.5 mm.

Improve Your Charging Experience

Experience faster charging with advanced 15W technology and Wireless PowerIQ, designed for your iPhone.

Note: Charging without a phone case offers better performance.

SAFETY FEATURES

The Anker Zolo Magnetic Wireless Charger incorporates advanced safety features to protect your devices and ensure reliable charging:

- **Qi2 Certification:** Ensures compliance with the latest wireless charging standards for safe and efficient power delivery.
- **ActiveShield 2.0:** This proprietary technology monitors temperature over 3,000,000 times per day, preventing overheating and extending battery life for your devices.
- **Optimal Heat Dissipation:** High-quality polycarbonate casing and a customized Qi2 charging module are designed to improve heat dissipation, maintaining optimal temperatures during charging.

SPECIFICATIONS

Feature	Detail
---------	--------

Model Number	B25M2
Brand	Anker
Wattage	15W (Max)
Qi Certification	Qi2 Certified
Cable Length	5 ft (1.5m)
Connector Type	USB Type-C
Compatible Devices	iPhone 13/14/15/16/17 Series, AirPods with Wireless Charging Case
Safety Features	ActiveShield 2.0 Temperature Monitoring
Color	Black
Item Weight	7 ounces
Package Dimensions	5.08 x 3.98 x 1.61 inches

TROUBLESHOOTING

- **Device Not Charging:**
 - Ensure the charging pad is properly connected to a functional USB-C power adapter and wall outlet.
 - Verify your device is compatible (iPhone 13/14/15/16/17 series or AirPods with wireless charging case).
 - Remove any non-MagSafe compatible or thick cases (over 2.5mm) that might interfere with charging.
 - Ensure the device is centered on the charging pad for proper magnetic alignment.
- **Slow Charging:**
 - Use a 20W or higher USB-C power adapter for optimal 15W fast charging. Lower wattage adapters will result in slower charging speeds.
 - Avoid using your device for high-intensity tasks (e.g., gaming, video streaming) while charging, as this can generate heat and reduce charging speed.
 - Ensure no foreign objects are between the device and the charging pad.
- **Charger or Device Getting Warm:**
 - It is normal for the charging pad and your device to become slightly warm during wireless charging.
 - If excessive heat is observed, ensure proper ventilation around the charger and device.
 - The ActiveShield 2.0 technology actively monitors and manages temperature to prevent overheating.
