4. SETUP AND INSTALLATION

This section guides you through the process of installing your new car stereo. It is recommended to watch the provided installation videos for visual guidance.

4.1 Pre-Installation Steps

- 1. Remove Decorative Panels:** Carefully pry off the plastic decorative strip around the original radio and the panels on the left and right sides of the steering wheel using a removal tool.
- 2. Disconnect Window Control Panel:** Pry off the window control panel and disconnect its wiring harness. Push the clip to the left to release it.
- 3. Unscrew Retaining Screws:** Unscrew the hidden retaining screw behind the window control panel and the screw located in the top dashboard tray.
- 4. Remove Original Radio:** Unscrew the four screws holding the original car radio in place. Pull out the old radio and disconnect all wires from its back.

4.2 Wiring Connections

- Power Cable:** Connect the appropriate power cable (with or without amplifier) to your car's wiring harness.
- GPS Antenna:** Connect the GPS antenna cable. It is advised to mount the GPS antenna to the A-pillar of the car.
- Microphone:** Connect the external microphone. It is advised to mount the microphone above the rearview mirror.
- USB Cables:** Connect the USB cables. Route them from inside the passenger glove compartment to the car's center console area.
- Rearview Camera:** Connect the rearview camera video input cable and its extension cable. Route the extension cable along the edge of the car seat to the trunk. Connect the camera to the extension cable and install the camera in your desired location (e.g., near the license plate). Ensure the side with the logo faces downwards. Connect the reversing wire from the car to the reversing adapter cable, and insulate the connection.
- Radio Antenna:** Connect the radio antenna adapter cable.

4.3 Final Assembly

1. **Install Frame:** Install the provided installation frame for the navigation screen. Ensure the round holes are facing upwards.
2. **Connect Head Unit:** Feed all connected wires from inside the frame to the outside. Connect all cables to the back of the head unit.
3. **Secure Head Unit:** Carefully place the head unit into the dashboard opening, ensuring all wires are neatly tucked away and not pinched. Snap the head unit into place.
4. **Reinstall Panels:** Reinstall the decorative panels and the window control panel.

5. OPERATING INSTRUCTIONS

Your AINAVITO car stereo offers a range of functions to enhance your driving experience.

5.1 Wireless CarPlay & Android Auto

Connect your smartphone wirelessly or via USB to access navigation, messages, music, and calls directly on the car stereo display.

6. TROUBLESHOOTING

If you encounter issues with your car stereo, please refer to the following common problems and solutions:

- CarPlay/Android Auto Connection Issues:** If your smartphone is not connecting, ensure Bluetooth is enabled on both devices and the correct app (e.g., Tlink) is configured on the head unit. Check USB cable connections for wired connections.
- No Power/Unit Not Turning On:** Verify all power cable connections are secure. Check the vehicle's fuse box for any blown fuses related to the stereo.
- Incorrect Time/Units:** Access the system settings on the head unit to adjust time, date, and measurement units (e.g., kilometers to mph).
- Canbus System Not Responding:** Ensure the Canbus decoder is correctly connected and configured according to the installation instructions. Incorrect wiring can lead to communication issues with vehicle systems.

7. WARRANTY AND SUPPORT

AINAVITO provides professional engineer guidance and customer support for any product-related questions, settings, or installation issues.

- **24-Hour After-Sale Service:** Our engineers are available 24 hours for after-sale service.
