- **Device not turning on:** Ensure the battery is charged. Connect the device to a charger for at least 15 minutes, then try powering it on again.
- **Apps crashing or freezing:** Close the problematic app and reopen it. If the issue persists, restart your phone. You can also clear the app's cache or reinstall it.
- **Poor network connectivity:** Check if your SIM card is properly inserted. Try toggling Airplane Mode on and off. If the issue persists, contact your network provider.
- **Battery draining quickly:** Reduce screen brightness, disable unnecessary background apps, and turn off features like Bluetooth or GPS when not in use. Check battery usage in settings to identify power-hungry apps.
