

## Flylin 2024384

# Flylin Electric Turkish Coffee Pot 600ml Stainless Steel Kettle User Manual

Model: 2024384

## IMPORTANT SAFETY INSTRUCTIONS

Please read all instructions carefully before using this appliance. Keep this manual for future reference.

- Do not immerse the electrical base, cord, or plug in water or other liquids.
- Ensure the voltage rating on the appliance matches your local power supply.
- Do not operate the appliance with a damaged cord or plug.
- Keep the appliance out of reach of children.
- Always place the appliance on a stable, heat-resistant surface.
- Do not fill above the maximum fill line to prevent boiling over.
- Unplug from the outlet when not in use and before cleaning.
- Avoid contact with hot surfaces. Use the handle.

## PRODUCT OVERVIEW

The Flylin Electric Turkish Coffee Pot is a versatile appliance designed for brewing coffee, tea, and heating milk. It features a durable stainless steel construction and a convenient foldable handle.

## Key Features:

- **600ml Large Capacity:** Brews 5 to 6 cups of coffee or heats a similar volume of other liquids.
- **Stainless Steel Construction:** Ensures durability, purity of taste, and resistance to corrosion and staining.
- **Foldable Anti-Scald Handle:** Heat-resistant handle for safe pouring and compact storage.
- **Easy One-Button Operation:** Simple and intuitive controls for quick brewing.
- **Multi-Purpose Use:** Suitable for Turkish coffee, tea, milk, and other hot beverages.

## Foldable Handle

The portable coffee machine comes with a heat-resistant long handle for an easy grip.

## SETUP

1. **Unpack:** Carefully remove all packaging materials and inspect the coffee pot for any damage.

2. **Clean:** Before first use, wipe the exterior of the pot with a damp cloth. Wash the interior of the pot with warm, soapy water, then rinse thoroughly. Do not immerse the electrical base in water.
3. **Placement:** Place the coffee pot on a flat, stable, and heat-resistant surface, away from the edge of the countertop.
4. **Power Connection:** Ensure the power cord is fully extended and plug it into a standard 110V US electrical outlet.

## OPERATING INSTRUCTIONS

---

### Brewing Turkish Coffee:

1. **Add Water:** Fill the pot with cold water, ensuring it does not exceed the maximum fill line.
2. **Add Coffee:** For traditional Turkish coffee, add finely ground coffee (approximately one tablespoon per cup) and sugar to taste. Do not stir immediately.
3. **Place on Base:** Position the pot securely on its electrical heating base.
4. **Start Brewing:** Press the power button. The indicator light will illuminate, signifying that the heating process has begun.
5. **Monitor:** Stay near the pot as Turkish coffee can boil over quickly. As the coffee begins to foam and rise, remove it from the heat just before it boils over.
6. **Serve:** Pour the coffee slowly into small cups. Allow a moment for the grounds to settle before drinking.

Image: A hand pouring freshly brewed coffee from the electric pot into a white coffee cup, demonstrating the serving process.

### Heating Tea or Milk:

1. **Fill Pot:** Add water for tea or milk to the pot, observing the maximum fill line.
2. **Place on Base:** Securely place the pot on its heating base.
3. **Start Heating:** Press the power button. The indicator light will turn on.
4. **Monitor:** Heat to your desired temperature. For boiling water, wait until it reaches a rolling boil. For milk, heat until warm but not boiling.
5. **Serve:** Carefully remove the pot from the base and pour.

# Multi Purpose

Electric coffee pot is a versatile coffee pot that can not only brew coffee, but also tea and milk, ensuring a quick brewing process, ensuring you can enjoy your coffee without a lengthy wait time.

Image: A visual representation of the multi-purpose functionality, showing the pot being used to prepare coffee, tea, and warm milk.

## MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the life of your appliance.

1. **Unplug:** Always unplug the coffee pot from the power outlet and allow it to cool completely before cleaning.
2. **Clean Interior:** Wash the interior of the pot with warm, soapy water and a soft sponge. Rinse thoroughly with clean water.
3. **Clean Exterior:** Wipe the exterior of the pot and the heating base with a damp cloth. Do not use abrasive cleaners or scouring pads, as they may scratch the stainless steel finish.
4. **Drying:** Ensure all parts are completely dry before storing or next use.
5. **Descaling:** If mineral deposits build up over time, fill the pot with a mixture of equal parts water and white vinegar. Bring to a boil, then let it sit for 30 minutes before emptying and rinsing thoroughly.

**Caution:** Never immerse the electrical base or power cord in water or any other liquid.

## TROUBLESHOOTING

| Problem                     | Possible Cause                                                                                                                                   | Solution                                                                                                                                                                                                      |
