6. MAINTENANCE

Proper maintenance will extend the life and appearance of your Flieks bed.

- **Cleaning:** Wipe the wood surfaces with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or polishes that may damage the finish. For the upholstered headboard, spot clean with a mild fabric cleaner as needed.
- **Hardware Check:** Periodically (e.g., every 3-6 months) check all assembly hardware (bolts, screws) and tighten them if they have become loose.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause wood finishes to fade or crack.
- **Avoid Excessive Moisture:** Protect the bed from excessive moisture and humidity.

7. TROUBLESHOOTING

If you encounter any issues with your bed, refer to the following common problems and solutions:

- **Squeaking Noises:**
Solution: Squeaking often indicates loose hardware. Re-tighten all bolts and screws on the bed frame and slats. Ensure the bed is on a level surface.
- **Trundle Not Sliding Smoothly:**
Solution: Check for any obstructions underneath the bed or along the trundle's path. Ensure the trundle wheels are clean and free of debris. Verify that the trundle frame is assembled correctly and not warped.
- **Bed Feels Unstable:**
Solution: Ensure all connections are fully tightened. Verify that the bed is placed on a flat, even floor. If the issue persists, disassemble and reassemble carefully, ensuring all parts are correctly aligned.
- **Damaged or Missing Parts:**
Solution: Do not attempt to use the product with damaged or missing parts. Contact customer support immediately for replacements.
