NAVEE S60

NAVEE S60 Electric Scooter User Manual

Model: S60

Brand: NAVEE

1. INTRODUCTION

Thank you for choosing the NAVEE S60 Electric Scooter. This manual provides essential information for the safe operation, maintenance, and care of your scooter. The NAVEE S60 is an all-terrain electric scooter designed for outdoor use, featuring a 60 km range, a maximum speed of 25 km/h, and a powerful 1000W motor. It is equipped with dual suspension, 10-inch tubeless tires, and a triple braking system for enhanced safety and comfort. With IPX5 water resistance and a maximum load capacity of 120 kg, the S60 is built for durability and performance.

2. SAFETY INFORMATION

Before operating the NAVEE S60, please read and understand all safety instructions. Failure to follow these instructions may result in serious injury or property damage.

- Always wear a helmet and appropriate protective gear (e.g., knee pads, elbow pads) when riding.
- Familiarize yourself with local laws and regulations regarding electric scooter use.
- Perform a pre-ride inspection: check tire pressure, brake function, and ensure all fasteners are secure.
- Do not ride in heavy rain, on icy surfaces, or through deep puddles, despite the IPX5 water resistance.
- Maintain a safe distance from other vehicles and pedestrians.
- The maximum load capacity is 120 kg. Do not exceed this limit.
- Avoid sudden acceleration or braking, especially at high speeds.
- Children should only operate the scooter under adult supervision and with proper safety precautions.

3. PACKAGE CONTENTS

Verify that all items are present in the package:

- NAVEE S60 Electric Scooter
- Power Adapter
- Quick Guide
- L-shaped Wrench
- Screws (x4)
- Instruction Manual (this document)

4. PRODUCT OVERVIEW

4.1 Components

The image below illustrates the main components of the NAVEE S60 Electric Scooter and its companion mobile application interface.

An illustration of the NAVEE S60 electric scooter, highlighting its overall design, handlebars, deck, and wheels. A smartphone screen next

to it displays the companion app interface, showing current mileage, speed, taillight status, and energy recovery settings.

4.2 Specifications

Feature	Specification
Model Number	S60
Brand	NAVEE
Motor Power (Peak)	1000W
Maximum Speed	25 km/h
Maximum Range	Up to 60 km
Max Climbing Angle	24%
Tire Type	10-inch Tubeless Tires (Synthetic Rubber)
Braking System	Triple (Front Drum, Rear Disc, Rear E-ABS)
Suspension	Front and Rear Rocker Arm Suspension
Frame Material	Carbon Steel
Maximum Load Capacity	120 kg (265 lbs)
Water Resistance Rating	IPX5
Dimensions (L x W x H)	120 x 60 x 130 cm
Weight	25.3 kg (55.8 lbs)
Special Features	Foldable

5. SETUP AND ASSEMBLY

The NAVEE S60 is designed for straightforward assembly. Follow these steps to prepare your scooter for its first ride:

- Unpack:** Carefully remove all components from the packaging. Retain the packaging for future transport or storage.
- Unfold:** Locate the folding mechanism (usually near the base of the steering column) and release it to unfold the scooter until it locks into the upright position. Ensure it is securely locked.
- Attach Handlebars:** Connect the handlebar assembly to the steering column. Use the provided screws and L-shaped wrench to secure it firmly. Ensure all cables are properly routed and not pinched.
- Initial Charge:** Before your first ride, fully charge the scooter's battery. Refer to the 'Charging' section for detailed instructions.
- Pre-Ride Check:** Before each use, perform a quick safety check: verify tire pressure, test brakes, and ensure all parts are tight and secure.

6. OPERATING INSTRUCTIONS

6.1 Charging

To charge your NAVEE S60, connect the power adapter to the charging port, typically located on the side of the scooter's deck. Plug the adapter into a standard wall outlet. The charging indicator light will show the charging status (e.g., red for charging, green for fully charged). Always use the original power adapter provided.

Sistema de Recuperación de Energía de Calidad Automotriz

Durante tu viaje, simplemente presiona el freno o suelta el acelerador, y el scooter activará automáticamente la regeneración de energía maximizando así el alcance total de tu scooter.

An illustration showing the high-security 18650 lithium batteries within the scooter's deck, which contribute to its extended range of up to 60 km.

6.2 Power On/Off

To power on the scooter, press and hold the power button on the handlebar display until the screen illuminates. To power off, press and hold the power button again until the display turns off. The display shows important information such as current speed, battery level, and riding mode.

6.3 Riding Modes

The NAVEE S60 offers three intelligent riding modes to suit different conditions and preferences:

- **Walk (W) Mode:** Designed for low-speed safety, ideal for navigating crowded areas or walking alongside the scooter.
- **Drive (D) Mode:** The standard mode for daily commutes, offering a balanced combination of speed and battery efficiency.
- **Sport (S) Mode:** Provides maximum power and acceleration, suitable for thrilling rides and climbing inclines up to 24%.

You can switch between modes using the control button on the handlebar display.

6.4 Braking System

The S60 is equipped with an advanced triple braking system for precise and reliable stopping power:

- **Front Drum Brake:** Provides effective stopping power for the front wheel.
- **Rear Disc Brake:** Offers strong and responsive braking for the rear wheel.
- **Rear E-ABS (Electronic Anti-lock Braking System):** Enhances braking stability and prevents wheel lock-up.

Always apply both brakes simultaneously for optimal stopping performance. Practice braking in a safe area to familiarize yourself with the scooter's response.

Sistema di Frenatura Triplo

Con freni a tamburo meccanici anteriori e posteriori, oltre al freno E-ABS posteriore, lo scooter assicura ai conducenti un triplo sistema di frenatura affidabile e sicuro, per un'esperienza di guida stabile.

This image illustrates the components of the triple braking system, including the front drum brake, rear disc brake, and the E-ABS system, designed for reliable stopping power.

6.5 Using the Mobile Application

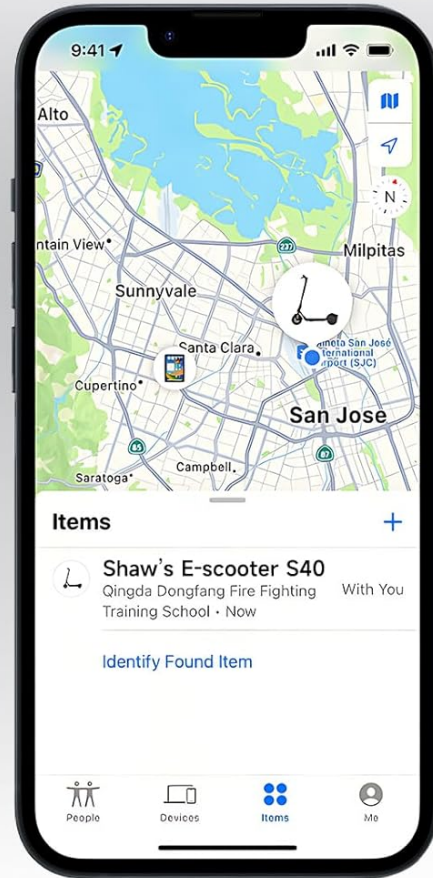

The dedicated mobile application allows you to monitor your scooter's performance and status. Features may include:

- Real-time speed and mileage display.
- Battery level and health monitoring.
- Riding mode selection and customization.
- Firmware updates.
- Integration with Apple Find My for location tracking.

Download the official NAVEE app from your smartphone's app store. Follow the in-app instructions to pair your scooter.

Gracias a la red de Apple Find My, puedes mantener fácilmente el seguimiento de tu scooter - incluso si está desconectado. Puedes localizar rápidamente tu scooter cuando sea necesario a través de la aplicación "Find My" en tu iPhone.

A screenshot demonstrating the integration with Apple Find My, allowing users to track their scooter's location even when disconnected.

7. MAINTENANCE AND CARE

7.1 General Maintenance

- Regularly check all screws and bolts for tightness. Tighten any loose fasteners.
- Inspect the braking system for wear and proper function. Adjust or replace components as needed.
- Keep the scooter clean and free of dirt and debris.

7.2 Tire Care

The NAVEE S60 features durable 10-inch tubeless tires designed for improved shock absorption and puncture resistance. Regularly inspect tires for signs of wear, cuts, or punctures. Maintain recommended tire pressure for optimal performance and safety.

Neumáticos Sin Cámara de 10 Pulgadas

Neumáticos más grandes mejoran la absorción de impactos y la estabilidad, ahora aún más duraderos con resistencia a la perforación de primera clase.

10"

Neumáticos Sin Cámara

This image highlights the durable 10-inch tubeless tires, designed for improved shock absorption and puncture resistance, ensuring a stable ride.

7.3 Battery Care

The scooter is powered by high-security 18650 lithium batteries and an automotive-grade energy recovery system. To maximize battery life:

- Avoid fully discharging the battery frequently.
- Charge the battery regularly, even if the scooter is not in use for extended periods.
- Store the scooter in a cool, dry place, away from direct sunlight and extreme temperatures.
- The energy recovery system automatically recharges the battery during braking or deceleration, extending your range.

Sistema de Frenado Triple

Equipado con E-ABS trasero y frenos de tambor delanteros y traseros, nuestro scooter proporciona una potente serie de frenado triple, asegurando una conducción estable y segura.

This diagram visually explains how the scooter's automotive-grade energy recovery system recharges the battery during braking or deceleration, extending the overall range.

7.4 Cleaning

Use a soft, damp cloth to wipe down the scooter. Do not use high-pressure water jets or harsh cleaning agents, as this can damage electronic components or paintwork. Ensure the charging port cover is securely closed before cleaning.

8. TROUBLESHOOTING

If you encounter issues with your NAVEE S60, try the following basic troubleshooting steps:

- **Scooter not turning on:** Ensure the battery is charged. Check all connections.
- **Loss of power:** Check battery level. Ensure the power adapter is functioning correctly during charging.
- **Brakes not responding:** Inspect brake levers and cables for damage or looseness.
- **Unusual noises:** Stop riding immediately and inspect the scooter for loose parts or damage.

For more complex issues, refer to the official NAVEE support resources or contact customer service.

9. WARRANTY AND SUPPORT

The NAVEE S60 Electric Scooter typically comes with a**2-year warranty** on spare parts. Please retain your proof of purchase for warranty claims. For technical support, warranty service, or to order replacement parts, please contact NAVEE customer service through their official website or the contact information provided with your purchase. Always provide your model number (S60) and purchase date when seeking support.
