MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your standing desk.

- **Cleaning:** Wipe the desktop and frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Cable Management:** Periodically check and organize cables to prevent tangles and ensure smooth operation during height adjustments.
- **Weight Limit:** Do not exceed the maximum weight capacity of 132 pounds. Overloading can strain the motor and frame.
- **Environmental Conditions:** Keep the desk away from direct heat sources and excessive moisture.
- **Fastener Check:** Occasionally check all screws and fasteners to ensure they remain tight. Retighten if necessary.

TROUBLESHOOTING

If you encounter issues with your FLEXISPOT Electric Standing Desk, refer to the following common problems and solutions.

Desk Not Adjusting Height:

- **Power Connection:** Ensure the power cord is securely plugged into both the desk and a working electrical outlet.
- **Cable Connections:** Check all cables connecting the control panel to the motor and power supply for secure connections.
- **Overload:** Verify that the weight on the desk does not exceed the maximum capacity of 132 pounds. Remove excess weight and try again.
- **Reset Procedure:** Consult your specific assembly guide for any factory reset procedures for the control panel.

Unusual Noises During Adjustment:

- **Clicking Sound:** A clicking sound, particularly when lowering, may indicate an issue with the motor or leg mechanism. Ensure the desk is not overloaded. If the issue persists, contact customer support.
- **Wobbling:** Ensure all assembly screws are tightly secured. Check that the desk is on a level surface.
