1. INTRODUCTION

This manual provides essential information for the safe and efficient operation of your LG 9Kg DHV09SAB Dual Inverter Heat Pump Dryer. Please read it thoroughly before using the appliance and retain it for future reference. The LG DHV09SAB dryer features Dual Inverter Heat Pump technology for gentle, low-temperature drying, reducing creases and shrinkage. It also includes EcoHybrid functionality, allowing you to prioritize energy or time savings, and an Allergy Care cycle designed to reduce common allergens.

2. SETUP AND INSTALLATION

Proper installation is crucial for the safe and optimal performance of your dryer. Ensure the appliance is placed on a level, solid surface. The dryer is a freestanding, front-load unit.

2.1 Unpacking

- Carefully remove all packaging materials.
- Check for any damage during transit. Contact your retailer immediately if damage is found.
- Ensure all included components are present: User Manual, Hose, Stacking Kit (if applicable).

2.2 Location Requirements

- Install the dryer in a well-ventilated area.
- Maintain adequate clearance around the dryer for proper airflow and servicing.
- Avoid direct sunlight or heat sources.

2.3 Leveling the Appliance

Use a spirit level to ensure the dryer is perfectly level. Adjust the leveling feet at the bottom of the appliance as needed to prevent vibration and noise during operation.

2.4 Electrical Connection

Connect the dryer to a dedicated, grounded electrical outlet as specified in the electrical requirements section of this manual. Do not use extension cords.

2.5 Drain Hose Connection

Connect the provided drain hose to the dryer and route it to a suitable drain. Ensure the hose is securely fastened to prevent leaks.

3. OPERATING INSTRUCTIONS

Follow these steps for effective and safe operation of your LG dryer.

3.1 Loading Laundry

- Sort laundry by fabric type and drying requirements.
- Do not overload the dryer. The capacity is 9 kg.
- Ensure no foreign objects are left in pockets.

3.2 Selecting a Drying Cycle

Turn the cycle selector knob to choose the desired drying program. The control panel offers various options including:

- **Dual Inverter Heat Pump:** Provides gentle care with low-temperature drying, suitable for delicate fabrics and reducing shrinkage.
- **EcoHybrid:** Allows selection between energy-saving mode or time-saving mode, optimizing drying based on your preference.
- **Allergy Care Cycle:** Reduces 99.9% of live house dust mites, certified by BAf (British Allergy Foundation).
- Other standard cycles for Cotton, Synthetics, Delicates, etc.

3.3 Starting the Dryer

- Press the Start/Pause button to begin the selected cycle.
- The display will show the estimated remaining drying time.

3.4 LG ThinQ App Integration

The dryer is compatible with the LG ThinQ app. This requires a compatible smartphone (Android 4.1.2 or later, or iOS9 or later) and a mobile 3G/4G or Wi-Fi connection. The app allows for remote control and monitoring of your dryer.

4. MAINTENANCE AND CARE

Regular maintenance ensures the longevity and efficiency of your dryer.

4.1 Cleaning the Lint Filter

Clean the lint filter after every load to maintain drying performance and prevent fire hazards. The dryer features a Double Layer Air Filter for enhanced lint capture.

- Open the dryer door.
- Remove the lint filter, typically located inside the door opening.
- Remove accumulated lint by hand or with a soft brush.
- Rinse the filter with water if necessary, and ensure it is completely dry before reinserting.

4.2 Auto Cleaning Condenser

The dryer is equipped with an auto-cleaning condenser system. The frequency of this cleaning may vary depending on the size and initial moisture content of the laundry. No manual cleaning of the condenser is typically required.

4.3 Cleaning the Exterior

Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.

5. TROUBLESHOOTING

Refer to this section for solutions to common operational issues. If the problem persists, contact customer support.

Problem	Possible Cause	Solution
Dryer does not start	Power cord unplugged; Door not closed properly; Circuit breaker tripped.	Ensure power cord is securely plugged in; Close the door firmly; Reset the circuit breaker.
Clothes not drying properly	Lint filter clogged; Overloaded dryer; Incorrect cycle selected.	Clean the lint filter; Reduce load size; Select an appropriate drying cycle.
Excessive noise or vibration	Dryer not level; Foreign objects in drum; Shipping bolts not removed.	Level the dryer using the adjustable feet; Check drum for loose items; Ensure all shipping bolts are removed during installation.

Problem	Possible Cause	Solution
Error code displayed	Specific malfunction detected.	Refer to the full user manual for a list of error codes and their solutions, or contact customer support.

6. SPECIFICATIONS

Feature	Detail
Brand	LG
Model Name	LG 9Kg Dryer DHV09SAB, Dual Inverter Heat Pump, Black Steel
