SAFETY INFORMATION

WARNING: Be careful during the installation or assembly of the product.

- Ensure all parts are present and undamaged before assembly.
- Do not use power tools for assembly unless specifically instructed, as overtightening can damage components.
- Keep small parts away from children during assembly to prevent choking hazards.
- Assemble the bed frame on a soft, clean surface to prevent scratches or damage.
- Do not stand or jump on the bed frame.
- Ensure the bed frame is placed on a level surface to prevent instability.

COMPONENTS LIST

Package Contents

- Headboard (1)

- Footboard (1)
- Side Rails (2)
- Center Support Beam (1)
- Support Legs (8)
- Wooden Slats (12, connected by fabric strap)
- Hardware Pack (bolts, screws, washers, nuts)
- Allen Wrench (1)

Tools Required

- Included Allen Wrench
- Philips Head Screwdriver (recommended for faster assembly)

SETUP AND ASSEMBLY

Before You Begin

- Clear a spacious area for assembly.
- Lay out all components and hardware, verifying against the components list.
- Do not fully tighten bolts until instructed, as this may hinder alignment.

Step-by-Step Assembly

1. **Unpack and Identify:** Carefully unpack all components from the packaging. Identify each part and ensure all hardware is present.
2. **Assemble Frame Sides:** Attach the side rails to the headboard and footboard using the provided bolts and washers. Hand-tighten only at this stage to allow for adjustments.
3. **Install Center Support:** Secure the center support beam to the designated points on the headboard and footboard. Attach the support legs to the center beam, ensuring they are oriented to touch the floor when the bed is upright.
4. **Position Slats:** Unroll the wooden slats, which are connected by a fabric strap, and place them evenly across the bed frame. Ensure the slats are properly seated within the side rail supports.
5. **Secure Slats:** Using the provided screws, secure each wooden slat to the side rails. A Philips head screwdriver or power drill will make this step faster and easier.
6. **Final Tightening:** Once all slats are secured, go back and fully tighten all bolts on the headboard, footboard, and side rails. Ensure all connections are firm and stable.
7. **Final Check:** Verify that the bed frame is stable and level. Place your mattress on the secured slats.

OPERATING INSTRUCTIONS

Adjusting the Headboard Height

The Yaheetech Queen Bed Frame features a height-adjustable headboard, allowing you to customize it to your preference and mattress thickness. The headboard offers three adjustable heights: 42 inches, 44 inches, and 46 inches, accommodating mattresses with a thickness ranging from 10 inches to 14 inches.

1. **Loosen Bolts:** Carefully loosen the bolts that connect the headboard to the side rails on both sides of the bed frame.
2. **Adjust Height:** Gently slide the headboard up or down to the desired height. Ensure it aligns with the pre-drilled holes for the chosen height.
3. **Re-tighten Bolts:** Once the headboard is at the desired height, securely re-tighten all connecting bolts on both sides. Ensure the headboard is stable before use.

EFFORTLESS CLEANING

The 6" under-bed clearance allows most robot vacuums to pass through effortlessly.

MAINTENANCE AND CARE

Cleaning

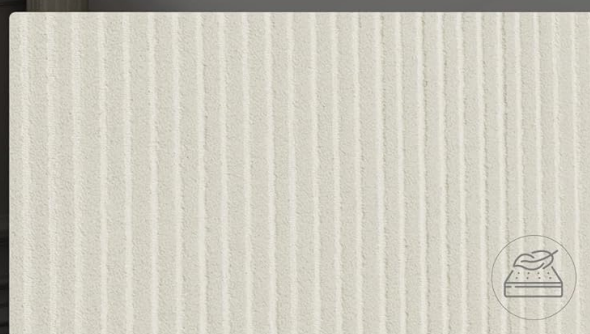

- For routine cleaning, gently wipe the chenille fabric upholstery with a soft, dry cloth.
- For spills, blot immediately with a clean, damp cloth. Avoid rubbing, as this can spread the stain.
- Do not use harsh chemical cleaners, abrasive materials, or excessive moisture, as these can damage the fabric and finish.
- The 6-inch under-bed clearance allows for easy cleaning underneath the bed with most robot vacuums, promoting a tidy living space.

General Care

- Periodically check all bolts and connections to ensure they remain tight and secure. Re-tighten if necessary to maintain the bed frame's stability.
- Avoid dragging the bed frame when moving it; lift it to prevent damage to the legs or floor.
- Ensure the bed frame is not exposed to direct sunlight or excessive humidity, which can affect the

fabric and wood components.

TROUBLESHOOTING

If you encounter any issues with your Yaheetech Queen Bed Frame, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose bolts or uneven floor.	Ensure all bolts are securely tightened. Check if the bed is on a level surface; adjust leg levelers if applicable.
Squeaking noises.	Loose connections or friction between parts.	Re-tighten all assembly bolts. Ensure slats are properly seated and not rubbing against the frame.

Problem	Possible Cause	Solution
Wooden slats do not fit or seem too short/long.	Frame not assembled squarely or incorrect orientation of slats.	Loosen frame bolts slightly, ensure the frame is square, then re-tighten. Verify slats are oriented correctly and the fabric strap is aligned.
Headboard is not at desired height.	Incorrect adjustment.	Refer to the "Adjusting the Headboard Height" section for proper adjustment steps.

SPECIFICATIONS

Feature	Detail
Brand	Yaheetech
Model Number	YT615136
Size	Queen
Product Dimensions (L x W x H)	81.5" x 62.2" x 46"
Color	Beige
Item Weight	65.5 pounds
Maximum Weight Capacity	800 lb
Special Features	Durable, Sturdy, Easy Installation, Wear Resistant, Adjustable Headboard
Assembly Required	Yes
