## WowCatch N386E

# WowCatch Flying Insect Trap (Model N386E) User Manual

Model: N386E | Brand: WowCatch

## INTRODUCTION

The WowCatch Flying Insect Trap is designed to effectively attract and capture various flying insects such as fruit flies, gnats, moths, and houseflies indoors. Utilizing UV light and a high-efficiency sticky card, this device offers a safe, odorless, and chemical-free solution for pest control in your home, kitchen, bedroom, plant areas, and garages.

## PACKAGE CONTENTS

Your WowCatch Flying Insect Trap package includes:

- 1 x Flying Insect Trap Device (pre-assembled with one sticky card)
- 4 x Refill Sticky Cards
- 1 x User Manual

# ITEMS INCLUDED

1 Device & 4 Sticky Cards

## SAFETY INFORMATION

- This device is non-toxic, odorless, and chemical-free, making it safe for use around children and pets.
- The device consists of a detachable housing and base. Handle with care to prevent the base from falling when detaching the housing.
- For indoor use only. Keep out of reach of children and pets when not in use or during maintenance.
- Ensure the protective film is removed from the sticky card before use.

- Premium ABS Material
- Solid & Durable

## INNOVATIVE SEPARATIVE DESIGN

### SETUP INSTRUCTIONS

Follow these steps to set up your WowCatch Flying Insect Trap:

1. **Unpack the Device:** Carefully remove the device and refill cards from the packaging. The device comes pre-assembled with one sticky card.
2. **Separate Housing and Base:** Gently detach the plug-in housing from the light base. The housing slides upwards to separate.
3. **Prepare the Sticky Card:** Locate the sticky card inside the housing. Carefully peel off the protective film from the sticky surface.
4. **Reinsert Housing:** Slide the housing back onto the light base until it clicks securely into place. Ensure the sticky card is properly positioned within the housing.
5. **Plug into Outlet:** Vertically plug the assembled device into a standard wall outlet. The UV light will automatically turn on, indicating it is operational.

# PLUG AND PLAY

**Attention:** This item has a detachable housing and base. Easy to replace the adhesive card while leaving the device plugged in.

## OPERATING INSTRUCTIONS

The WowCatch Flying Insect Trap operates continuously once plugged in. The UV light attracts flying insects, which then adhere to the sticky card inside the device.

- **Continuous Operation:** The trap provides 24/7 protection against flying insects.
- **Automatic Light:** The UV light automatically activates when the device is plugged in and the housing is correctly attached.
- **Turning Off:** To temporarily turn off the device without unplugging the entire unit, simply lift the plug-in housing from the base. This prevents wear and tear on your electrical outlet.

### MAINTENANCE: REPLACING STICKY CARDS

Replace the sticky card when it is full of insects or every 15-20 days, whichever comes first, to maintain optimal effectiveness.

1. **Detach Housing:** Gently lift the plug-in housing from the light base. The light will automatically turn off.
2. **Remove Used Card:** Slide the used sticky card out from the bottom of the housing. Dispose of the used card responsibly.
3. **Insert New Card:** Take a new refill card and carefully peel off its protective film. Slide the new card into the housing, ensuring it is fully seated.
4. **Reattach Housing:** Place the housing back onto the light base, ensuring it is securely attached. The light will turn back on.

## PLACEMENT RECOMMENDATIONS

For best results, place the trap in areas where you observe flying insects. Ideal locations include:

- Kitchens (near fruit bowls, trash cans)
- Bedrooms
- Plant Areas
- Garages
- Near exterior doors or entryways
- Any indoor area with flying insect activity.

## TROUBLESHOOTING

If your WowCatch trap is not performing as expected, consider the following:

- **No Insects Caught:**
  - Ensure the protective film has been completely removed from the sticky card.
  - Verify the device has been operating for a sufficient amount of time (at least 24-48 hours).
  - Relocate the device to an area with higher insect activity.
  - Check if the UV light is active. If not, ensure the housing is securely attached to the base and the unit is properly plugged into a functioning outlet.
- **Sticky Card Not Staying in Place:**
  - Ensure the sticky card is correctly inserted into the designated slots within the housing.
  - If the card still feels loose, a small piece of tape can be used to secure it, ensuring it does not cover the sticky surface or obstruct the light.
- **Device Not Lighting Up:**
  - Confirm the device is firmly plugged into a working electrical outlet.

- Ensure the plug-in housing is fully and correctly seated onto the light base. The light automatically activates upon proper assembly.
