### 3. PRODUCT FEATURES

- **Mini Mic, Pro Sound:** Ultra-compact and portable design delivering 48kHz/16bit studio-quality sound.
- **MFi Certified:** Apple-certified for secure recording with iOS systems, ensuring seamless compatibility and premium audio signal transmission without overheating or data loss.
- **4-Level AI Noise Cancellation:** One-click noise reduction with 32dB gain control and Smart Automatic Limiting function for clear recordings in noisy environments.
- **Extended 30-Hour Battery Life:** The compact charging case provides up to 30 hours of use. The receiver allows device charging during recording.
- **328ft Stable Transmission:** Plug-and-play operation with an uninterrupted 328ft connection range. LED indicators show working status.
- **AI Voice Filters and Effects:** Utilize the Maono Link app to switch between 4 unique voice filters and 4 voice-altering effects. Real-time adjustment of noise reduction and sound gain is also available.
- **Universally Compatible:** Includes MFi certified Lightning and USB-C receivers, compatible with iPhone, Android phones and tablets, Windows, and Mac PCs.

## 4. SETUP AND CONNECTION

### 4.1 Initial Connection

1. Insert the appropriate receiver (Type-C or Lightning) into your phone's charging port.
2. The transmitter and receiver will pair automatically. The blue light on the receiver will remain solid once

connected.

**Note:** If the receiver indicator does not light up after plugging it in, you may need to enable the OTG function on your Android device. Search for "OTG" in your phone's settings and enable it before use.

## 4.2 Manual Pairing (If blue light keeps flashing)

1. With the transmitter powered off, press and hold the power button for 6 seconds until the blue light flashes rapidly, indicating pairing mode.
2. After the receiver is connected to the phone, press and hold the pairing button on the transmitter for 6 seconds to enter pairing mode.
3. Once pairing is successful, the blue light on both the transmitter and receiver will remain solid.

# 5. OPERATING INSTRUCTIONS

---

## 5.1 Noise Cancellation

A short press of the noise cancellation button on the transmitter can turn the noise cancellation function on or off. When enabled, the indicator light will turn green. During use, briefly press the receiver button to switch between 4 noise reduction levels (Slight, Moderate, Strong, Super). The green light will blink for the corresponding number of times to indicate the selected level.

### 5.3 Maono Link App Control

Install the Maono Link app on your smartphone to instantly adjust Wave T1 mini settings or restore them to factory settings. After connecting to the phone, the system will request access permissions. Once confirmed, you will enter the settings interface.

- **Connection Status:** Check the transmitter's connection status and remaining battery level.
- **Input Level:** View the real-time input level status of the microphone.
- **Gain Control:** Adjust the output volume in real-time through the gain control.

- **Noise Cancellation:** Turn the noise cancellation function on or off and adjust the noise cancellation level (Slight, Moderate, Strong, Super) according to your needs.
- **Voice Coloration (EQ Presets):** Enable voice coloration to choose from four preset voice filters: Voice Enhancer, Warmth, Brightness, Huskiness.
- **Voice Changer:** Provides four choices of voice changing effects: Uncle, Goddess, Baby Voice, and Original.
- **Factory Reset:** Tap the top-right button to view device information or select "Restore Factory Settings" to resolve anomalies.

## 6. CHARGING

The MAONO WAVE T1 Mini comes with a compact charging case that provides up to 30 hours of extended battery life. The transmitters charge inside the case. The case itself is rechargeable via USB-C.

When using the magnetic charging cable, ensure you pay attention to the correct direction for insertion. Do not attempt to open the back clip or insert the charging cable in reverse, as this may cause damage.

Video: Illustrates the correct method for using the magnetic charging cable.

If the red light on a transmitter flashes slowly, it indicates low battery. Please charge the transmitter by placing it in the charging case.

## 7. TROUBLESHOOTING

- **Receiver Indicator Not Lighting Up:** If the receiver indicator does not light up after plugging it into your phone, try enabling the OTG function in your phone's settings before use. Search for "OTG" in settings, find the OTG settings, and enable the function.
- **Transmitter Not Pairing:** If the blue light on the transmitter keeps flashing, manual pairing is required. Follow the steps in Section 4.2.
- **Anomalies in Functionality:** If you experience any unusual behavior, you can try restoring the device to factory settings via the Maono Link app.

## 8. SPECIFICATIONS
