Sharp AQUOS XLED 4K Google TV & Austere Power Strip User Manual

MODEL: BNDL_4TC75FV1U-5SPS4US1

Brand: Sharp & Austere

1. Introduction

Welcome to your new home entertainment system, featuring the Sharp AQUOS XLED 4K Ultra HD Mini LED Google TV and the Austere 4-Outlet Power with Omniport USB. This manual provides essential information for setting up, operating, maintaining, and troubleshooting your devices to ensure optimal performance and longevity.

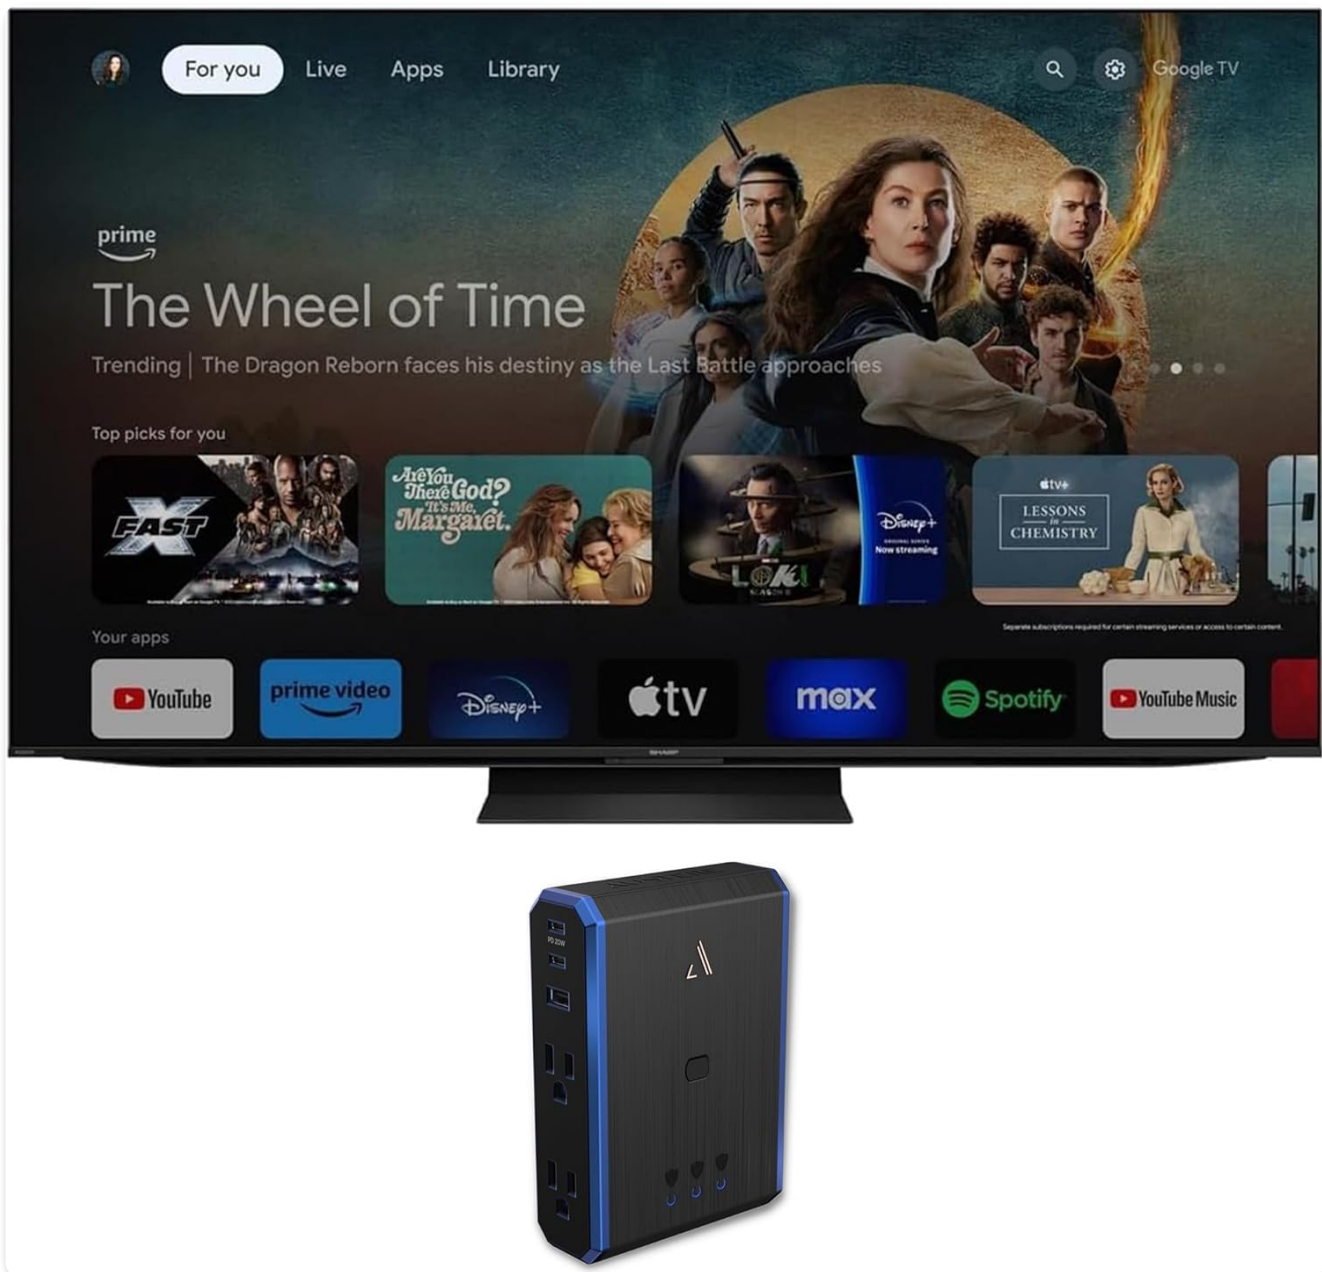

Figure 1: The Sharp AQUOS XLED 4K Google TV bundled with the Austere 4-Outlet Power Strip.

The Sharp AQUOS XLED TV combines advanced LCD and OLED technologies for extreme brightness and deep color contrast, powered by Google TV for a seamless smart TV experience. The Austere power strip provides robust power protection and rapid charging capabilities for your devices.

2. Setup Guide

2.1. Sharp AQUOS XLED TV Setup

1. **Unboxing:** Carefully remove the TV and all accessories from the packaging. Retain packaging for future transport or service.
2. **Placement:** Choose a suitable location for your TV. Ensure it is on a stable, level surface or securely mounted to a wall using a VESA 400x400 compatible mount.

Figure 2: Front view of the Sharp AQUOS XLED 4K Google TV, showcasing its sleek design.

3. **Connections:** Connect your external devices (e.g., cable box, gaming console, Blu-ray player) to the appropriate HDMI ports. The TV features 4 HDMI ports, including ALLM/VRR/eARC support.

Figure 3: Side and back views illustrating the various input and output ports available on the Sharp AQUOS XLED TV.

4. **Power Connection:** Plug the TV's power cord into the Austere Power Strip.

2.2. Austere 4-Outlet Power Strip Setup

1. **Placement:** Position the Austere Power Strip conveniently near your TV and other devices. Its low-profile design allows furniture to be placed close to the wall.

Figure 4: The Austere 4-Outlet Power Strip, showing its outlets and USB ports, and how it sits flush against a wall when plugged in.

2. **Power Connection:** Plug the Austere Power Strip directly into a grounded wall outlet.
3. **Device Connection:** Plug your TV and other electronic devices into the AC outlets on the power strip. Utilize the Omniport USB and PD 20W USB ports for rapid charging of compatible low-voltage devices like smartphones and tablets.

3. Operating Instructions

3.1. Sharp AQUOS XLED TV Operation

Your Sharp AQUOS XLED TV runs on Google TV, offering a personalized and intuitive user experience. Use the voice remote control to navigate, search, and access content.

- **Google TV Interface:** The home screen provides curated recommendations from your subscriptions and apps. Easily browse 10,000+ apps, 300+ free live TV channels, and thousands of free movies.

Figure 5: The Google TV interface on the Sharp AQUOS XLED TV, displaying various streaming applications and content recommendations.

- **Voice Control:** Press the Google Assistant button on your remote to use voice commands for searching content, controlling smart home devices, and more.
- **Casting:** With Chromecast built-in, you can cast content from your compatible smartphone or tablet directly to the TV.
- **Audio:** Experience immersive sound with the 2.1.2 Channel Speaker System, featuring 11 built-in speakers (4 tweeters, 6 mid-range, 1 subwoofer) and Dolby Digital Audio.

3.2. Austere 4-Outlet Power Strip Operation

The Austere Power Strip is designed for optimal power delivery and protection.

- **Power On/Off:** Use the integrated on/off switch to control power to all connected AC outlets and USB ports. This switch also functions as a circuit breaker.
- **Omniport USB & PD 20W:** These ports provide rapid charging for your mobile devices. The PD 20W port is especially optimized for fast charging of the latest Apple devices, achieving up to 50% charge in approximately 20 minutes.
- **PureFiltration:** Austere's PureFiltration technology cleans noise and artifacts from power lines, preventing them from impacting your connected devices and ensuring picture-perfect audio/video.
- **Surge Protection:** The power strip offers 3,000 Joules of surge protection, safeguarding your valuable electronics from power surges. Indicator lights on the unit confirm power, grounding, and surge protection status.

4. Maintenance

Regular maintenance ensures the longevity and optimal performance of your devices.

- **Cleaning the TV:** Gently wipe the screen with a soft, dry microfiber cloth. For stubborn smudges, slightly dampen the cloth with water or a screen-specific cleaning solution (avoid harsh chemicals). Clean the TV's exterior with a soft, dry cloth.
- **Cleaning the Power Strip:** Ensure the power strip is unplugged before cleaning. Wipe the exterior with a dry or slightly damp cloth. Do not use abrasive cleaners or immerse the unit in water.
- **Ventilation:** Ensure adequate airflow around the TV and power strip. Do not block ventilation openings.

5. Troubleshooting

If you encounter issues, refer to the following common troubleshooting steps:

- **No Power:**
 - Check if the TV and power strip are securely plugged into working outlets.
 - Verify the power strip's on/off switch is in the 'on' position and its indicator lights are active. If the circuit breaker has tripped, reset it.
- **No Picture/Sound:**
 - Ensure correct input source is selected on the TV.
 - Check all HDMI and audio cables for secure connections.
 - Restart connected devices and the TV.
- **Remote Control Issues:**
 - Replace batteries.
 - Ensure no obstructions between the remote and the TV's IR sensor.
- **Internet Connectivity Problems:**
 - Check your Wi-Fi router and modem. Restart them if necessary.
 - Verify Wi-Fi settings on the TV. Consider using an Ethernet cable for a stable connection.

6. Specifications
