## MAINTENANCE AND CARE

Proper care will help maintain the appearance and functionality of your kitchen trolley.

- **Cleaning Surfaces:** Wipe all surfaces with a soft, damp cloth. For stubborn marks, use a mild soap solution and immediately dry with a clean cloth.
- **Worktop Care:** The rubberwood worktop can be periodically treated with food-safe mineral oil to protect the wood and enhance its natural luster. Avoid prolonged exposure to moisture.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, solvents, or ammonia-based products, as these can damage the finish and materials.
- **Check Fasteners:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary to maintain structural integrity.

- **Wheel Maintenance:** Keep the caster wheels free of debris to ensure smooth movement. If wheels become stiff, clean them and apply a small amount of silicone spray if needed.

## TROUBLESHOOTING

Here are solutions to common issues you might encounter with your kitchen trolley.

**Trolley is unstable or wobbly:**

Ensure all assembly screws are fully tightened. Check that the trolley is placed on a level surface. If on an uneven surface, adjust the position or use shims if necessary.

**Caster wheels do not roll smoothly:**

Check if the wheel brakes are engaged. Inspect wheels for trapped debris (hair, lint) and remove it. Clean the wheels and their axles.

**Drawer or cabinet doors do not align properly:**

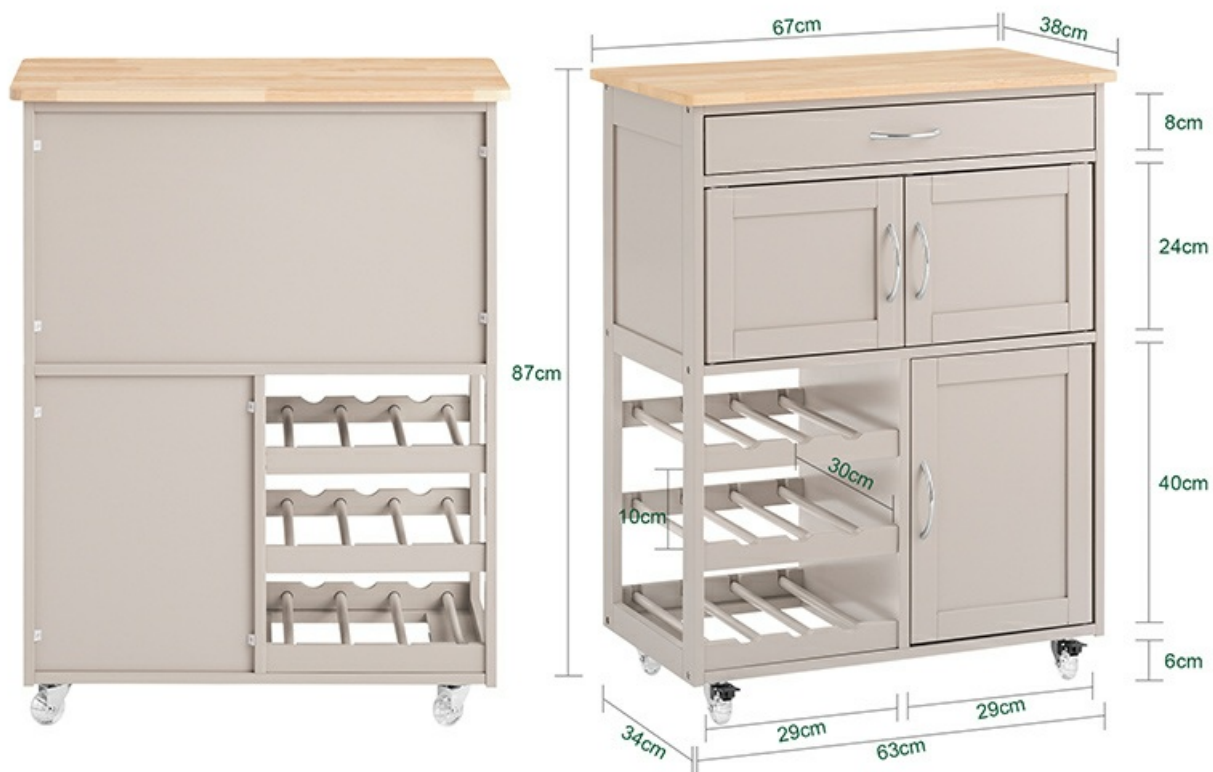

During assembly, ensure all panels are correctly oriented and secured. For minor adjustments, check the hinge screws on the cabinet doors; slight loosening or tightening can sometimes correct alignment. Ensure the trolley is on a level surface.

**Worktop appears dull or dry:**

Clean the worktop thoroughly and apply a thin, even coat of food-safe mineral oil. Allow it to soak in, then wipe off any excess.
