1. INTRODUCTION

This manual provides instructions for the assembly, operation, and maintenance of your YITAHOME 43.3x17.7x34 inch Elevated Garden Bed. Please read this manual thoroughly before use and retain it for future reference.

Product Overview

The YITAHOME Elevated Garden Bed is designed for outdoor planting of vegetables, flowers, and herbs. It features an ergonomic height, integrated water management, and mobility for versatile use in various outdoor settings.

Key Features

- **Effortless Water Management:** Includes a central divider for soil separation, a float system for water level monitoring, and side drainage holes for optimal moisture control.
- **Weather-Resistant Construction:** Made from sturdy resin to resist cracking and fading, ensuring long-lasting outdoor performance.
- **Ergonomic Design:** Stands at 34 inches tall to reduce bending and squatting during gardening. Equipped with four swivel wheels for easy repositioning.
- **Spacious Capacity:** Measures 43.3 x 17.7 x 34.1 inches, holding up to 21 gallons of soil. Features a bottom shelf for storing gardening tools and accessories.
- **Reinforced Support:** Three built-in support poles distribute soil pressure evenly, preventing side walls from bowing.

2. SAFETY INFORMATION

Please observe the following safety precautions to prevent injury or damage to the product:

- Ensure all parts are securely connected during assembly. Once snapped into place, some components may be difficult to disassemble.
- Do not overload the garden bed with excessive soil or weight beyond its stated capacity (21 gallons / 230 lbs).
- Place the garden bed on a level, stable surface to prevent tipping, especially when filled with soil and water.
- When moving the garden bed, ensure the wheels are unlocked and move it slowly to avoid sudden shifts or spills. Lock the wheels once in the desired position.
- Keep small children and pets away from the garden bed during assembly and when filled with soil to prevent accidents.
- Regularly inspect the garden bed for any signs of wear or damage. Discontinue use if structural integrity is compromised.

3. PACKAGE CONTENTS

Verify that all components are present before beginning assembly. If any parts are missing or damaged, contact customer support.

- Elevated Planter Box Components (Side panels, bottom panel, legs)
- Storage Shelf Components
- 4 Swivel Wheels (with brakes)
- Central Soil Divider
- Water Level Float System
- Drain Plug
- 3 Reinforcing Support Poles
- Assembly Hardware (if applicable, e.g., screws for wheels)
- Instruction Manual

4. SETUP AND ASSEMBLY

Assembly typically requires minimal tools, often just a rubber mallet for snug joints. Follow the pictorial instructions provided in your package carefully. Note that once components are snapped together, they are difficult to separate.

Assembly Steps:

1. **Unpack and Identify Parts:** Lay out all components and verify against the package contents list.
2. **Assemble the Planter Box:** Connect the side panels and bottom panel of the main planter box. Ensure proper alignment before firmly snapping parts into place. A rubber mallet may be used for tight connections.
3. **Install Support Poles:** Insert the three reinforcing support poles across the width of the planter box to prevent bowing.
4. **Attach Legs:** Securely attach the legs to the base of the planter box.
5. **Install Wheels:** Attach the four swivel wheels to the bottom of the legs. Ensure the locking

mechanism on the wheels is functional.

6. **Assemble Storage Shelf:** Connect the components of the lower storage shelf and attach it to the legs.
7. **Insert Water Management System:** Place the central soil divider inside the planter box. Install the float system for water level monitoring and ensure the drain plug is correctly seated in the side drainage hole.

5. OPERATING INSTRUCTIONS

Filling with Soil and Planting:

1. **Prepare Soil:** Use a high-quality potting mix suitable for your chosen plants. The garden bed has a capacity of 21 gallons.

2. **Fill the Planter:** Carefully fill the upper planting area with soil, leaving about an inch from the top rim. The central divider helps separate different plant types if desired.
3. **Planting:** Plant your desired vegetables, flowers, or herbs according to their specific requirements for spacing and depth.

Water Management:

- **Watering:** Water your plants as needed. The integrated float system allows you to monitor the water level in the reservoir below the soil.
- **Drainage:** The side drainage holes are designed to prevent overwatering. Ensure the drain plug is properly inserted to retain water for self-watering, or removed to allow excess water to escape.
- **Monitoring:** Regularly check the float indicator to understand the water availability for your plants.

MONITORING SYSTEM MAINTAINS WATER LEVEL

Drainage hole effectively regulates water volume and conveniently adds water

Image: A close-up view of the water management system, showing the float indicator for monitoring water levels and the drainage hole at the side for regulating water volume.

Mobility:

- **Moving the Bed:** Unlock the swivel wheels to move the garden bed to a desired location. This is useful for optimizing sun exposure or rearranging your outdoor space.
- **Securing Position:** Once in place, engage the wheel brakes to prevent unintended movement.

6. MAINTENANCE

- **Cleaning:** Clean the exterior of the garden bed with a mild soap and water solution. Avoid abrasive cleaners that may damage the resin material.
- **Drainage System:** Periodically check the drainage holes and float system for any blockages from soil or debris. Clear as necessary to ensure proper water flow.
- **Seasonal Care:** While weather-resistant, consider emptying the garden bed or providing additional protection during extreme winter conditions to prolong its lifespan.
- **Inspection:** Regularly inspect all connections and components for tightness and integrity.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Garden bed wobbles or feels unstable.	Uneven surface; loose connections; overloaded.	Ensure placement on a level surface. Check all assembly connections for tightness. Do not exceed the 21-gallon / 230 lbs capacity.
Water is not draining or draining too slowly.	Drain plug is inserted; drainage holes are blocked by soil or debris.	Remove the drain plug if continuous drainage is desired. Clear any obstructions from the drainage holes.
Water level float system not working.	Float mechanism is stuck or obstructed.	Check for soil or debris interfering with the float. Gently clean the mechanism.
Wheels do not roll smoothly or lock.	Debris in wheels; brake engaged; damaged wheel.	Clean any debris from the wheels. Ensure brakes are disengaged for movement. If a wheel is damaged, contact customer support for replacement.

8. SPECIFICATIONS

Feature	Detail
Model Number	MAYIHU5L2b
Dimensions (L x W x H)	43.3 x 17.7 x 34.1 inches (110 x 45 x 86.6 cm)
Material	Plastic (Resin)
Color	Grayish-white
Capacity	21 gallons
Weight Capacity	Approximately 230 lbs (when filled with soil)
Special Features	Weather Resistant, Wheels, Storage Shelf, Drain Plug, Water Level Indicator
Item Weight	27.1 pounds (12.3 kg)

21 Gallon
