MAINTENANCE AND CARE

Fabric Care

- **Regular Cleaning:** Vacuum the upholstered fabric regularly using a soft brush attachment to remove dust and debris.
- **Spot Cleaning:** For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner specifically designed for upholstery, testing on an inconspicuous area first. Avoid excessive rubbing.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fading.

Frame Care

- **Cleaning:** Wipe down the metal and wood components with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Hardware Check:** Periodically inspect all bolts and screws and re-tighten them to ensure the frame remains stable and noise-free.

TROUBLESHOOTING

Common Issues and Solutions

- **Charging Ports Not Working:**

Solution: Ensure the bed frame's power cord is securely plugged into a functional wall outlet. Check the connection of the charging station's internal wiring to the headboard. If the issue persists, contact customer support.

- **Bed Frame is Noisy or Squeaks:**

Solution: Noise often indicates loose connections. Re-tighten all bolts and screws on the frame, especially where the side rails connect to the headboard and footboard, and where the slats attach to the frame.

- **Missing or Damaged Parts:**

Solution: If you discover missing or damaged components upon unboxing, do not proceed with assembly. Contact Flolinda customer support immediately for assistance and replacement parts.

- **Unstable Frame:**

Solution: Verify that all parts have been assembled correctly according to the instructions. Ensure all fasteners are fully tightened. Check that the bed legs are evenly placed and making full contact with the floor.
