Qinliy Q108

Qinliy Replacement Pump for Wireless Cat Water Fountain Q108

Instruction Manual

1. Introduction

This manual provides instructions for the installation, maintenance, and troubleshooting of the Qinliy Replacement Pump, specifically designed for the Wireless Cat Water Fountain Model Q108. This pump is an essential component for ensuring continuous water circulation and filtration in your pet's fountain.

2. Safety Information

- Always disconnect the fountain from its power source before handling any internal components, including the pump.
- Ensure hands are dry when connecting or disconnecting electrical components.
- Keep the pump and all fountain components out of reach of children and pets when not assembled.
- Use only genuine Qinliy replacement parts to ensure compatibility and proper function.
- Do not operate the pump dry. Ensure it is fully submerged in water when the fountain is in operation.

3. Package Contents

- 1 x Qinliy Replacement Pump for Q108 Wireless Cat Water Fountain

4. Setup: Pump Replacement

Follow these steps to replace the pump in your Qinliy Q108 Wireless Cat Water Fountain:

1. **Disconnect Power:** Unplug the fountain from its power source and remove any batteries if applicable.
2. **Disassemble Fountain:** Carefully remove the top cover and any other components to access the pump compartment.

Image: A hand carefully lifting the top module of the cat water fountain, revealing the internal components. This step is crucial for accessing the pump for replacement or maintenance.

3. **Remove Old Pump:** Gently detach the old pump from its housing and disconnect any tubing or electrical connectors. Note how the old pump was oriented for correct installation of the new one.
4. **Install New Pump:** Place the new Qinliy replacement pump into the designated compartment. Ensure it is securely seated and all connections (tubing, electrical) are properly reattached.
5. **Reassemble Fountain:** Carefully reassemble the fountain components, ensuring all parts fit snugly.

Image: A hand carefully placing the top module back onto the cat water fountain, indicating the reassembly process after pump

replacement or cleaning.

6. **Fill with Water:** Fill the fountain reservoir with clean water to the recommended level.
7. **Reconnect Power:** Plug the fountain back into its power source. The pump should begin operating, circulating water.

5. Operating Instructions

Once the replacement pump is correctly installed and the fountain is filled with water and connected to power, the pump will automatically begin circulating water. The Qinliy Q108 Wireless Cat Water Fountain is designed for continuous operation, providing fresh, filtered water for your pets.

- Ensure the water level is always above the minimum mark to prevent the pump from running dry.
- Monitor the water flow to ensure proper operation.

6. Maintenance

Regular cleaning of the pump and fountain is crucial for optimal performance and hygiene.

6.1 Pump Cleaning

1. **Disconnect Power:** Always unplug the fountain before cleaning.
2. **Remove Pump:** Disassemble the fountain as described in the Setup section and carefully remove the pump.
3. **Disassemble Pump:** Gently pry open the pump cover and remove the impeller.
4. **Clean Components:** Rinse all pump components (cover, impeller, pump body) under clean running water. Use a small brush (e.g., a toothbrush) to remove any hair, debris, or mineral deposits from the impeller and its housing.
5. **Reassemble Pump:** Reassemble the pump, ensuring the impeller is correctly seated.
6. **Reinstall Pump:** Place the cleaned pump back into the fountain and reassemble the entire unit.

6.2 Fountain Cleaning

- Clean the entire fountain (reservoir, trays, filter housing) weekly with mild soap and water.
- Rinse all components thoroughly to remove any soap residue.
- Replace the filter and sponge according to the fountain's specific instructions (typically every 2-4 weeks).

7. Troubleshooting

If you encounter issues with your Qinliy Q108 fountain after pump replacement, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Pump not working	No power; pump clogged; impeller stuck; incorrect installation.	Check power connection. Clean pump and impeller. Ensure pump is correctly installed and connections are secure.
Weak water flow	Pump clogged; low water level; dirty filter.	Clean pump and impeller. Refill water to appropriate level. Replace filter.
Unusual noise from pump	Pump running dry; debris in impeller; improper seating.	Ensure adequate water level. Clean impeller. Check if pump is securely seated in its compartment.

8. Specifications

Feature	Detail
Model Number	Q108
Brand	Qinliy
Material	Acrylonitrile Butadiene Styrene (ABS)
Item Weight	0.11 kg (3.88 ounces)
Product Dimensions (L x W x H)	4.8" x 1.7" x 2.5"
