

## XIAOMI Xiaomi Mesh System BE3600 Pro (1-PACK)

# XIAOMI WiFi7 BE3600 Wireless Router User Manual

Model: Xiaomi Mesh System BE3600 Pro (1-PACK)

## 1. INTRODUCTION

This user manual provides comprehensive instructions for the setup, operation, and maintenance of your XIAOMI WiFi7 BE3600 Wireless Router. This device is designed to provide high-speed, reliable Wi-Fi 7 connectivity throughout your home or office, supporting multiple devices with low latency and advanced networking features.

## 2. WHAT'S IN THE BOX

Please verify that all items listed below are included in your package:

- Xiaomi Mesh System BE3600 Pro Router x 1
- Power adapter x 1
- Network cable x 1
- User manual x 1 (This document)
- Warranty card x 1

### 3. KEY FEATURES

---

- **High-speed Internet throughout the home WiFi speeds of 3570 Mbps:** The Wi-Fi 7 protocol allows higher speeds for increased throughput and offers advanced features such as MLO for multi-link operation, thorough use of channel resources, reduced latency, improved anti-interference functions and improved coverage over longer distances. Combined with wireless speeds of 3570Mbps\*, it easily enables the high-speed connections your family needs for devices such as smartphones, tablets and laptops.
- **Multi-link Operation (MLO):** Compared to traditional single-band connections, MLO allows devices to connect to two frequency bands simultaneously to achieve ultra-fast data transmission. This results in faster and more stable connections, ideal for downloading games or apps, browsing websites, or watching videos.
- **Improved OFDMA:** Thanks to OFDMA technology and advanced multi-RU allocation, bandwidth is intelligently allocated, which allows simultaneous high-speed Internet access for multiple devices.

- **Multi-pack option for flexible coverage solutions:** Uncomplicated setup of 2 and 3 sets are pre-configured and automatically join together to form a mesh network\* after switching on to ensure seamless coverage and excellent signal strength throughout the home.
- **Qualcomm quad-core processor:** The Wi-Fi 7 quad-core processor offers 120%\* more computing power. This enables up to 256\* devices to be online at the same time. The high-speed network connection with 2.5Gbps supports full use of a 2000Mbit broadband connection for ultra-fast Internet throughout the home.

## 4. SETUP GUIDE

---

### 4.1 Initial Placement

Place the router in a central location in your home, away from obstructions and sources of interference such as microwaves or cordless phones. For optimal mesh performance, ensure clear line of sight between multiple units if using a multi-pack system.

### 4.2 Connecting the Router

1. Connect one end of the provided network cable to the WAN port (usually labeled differently or colored) on your BE3600 router.
2. Connect the other end of the network cable to your modem's LAN port.
3. Connect the power adapter to the router's power input and then plug it into a power outlet.
4. Wait for the router's indicator light to turn solid blue, indicating it has successfully booted up and established an internet connection. This may take a few minutes.

*Figure 4.1: Side view of the Xiaomi Mesh System BE3600 Pro Router, showing its tall, slender profile and the blue indicator light.*

### 4.3 Connecting Devices to Wi-Fi

Once the router is set up, you can connect your devices:

- Locate the Wi-Fi network name (SSID) and password printed on the label at the bottom of your router.
- On your device (smartphone, tablet, laptop), go to Wi-Fi settings.
- Select the SSID of your router from the list of available networks.
- Enter the Wi-Fi password when prompted.
- Your device should now be connected to the internet.

## 5. OPERATING INSTRUCTIONS

---

### 5.1 Accessing Router Settings

To manage advanced settings, such as changing Wi-Fi name/password, setting up parental controls, or configuring port forwarding:

1. Open a web browser on a device connected to the router's network.

2. Type the router's default IP address (usually 192.168.31.1 or miwifi.com) into the address bar and press Enter. This information can typically be found on the router's label.
3. Enter the administrator password when prompted. If you haven't set one, it might be the default password printed on the router or you will be prompted to create one during the first login.
4. Navigate through the web interface to adjust settings as needed.

5.2 Mesh Network Configuration (for multi-pack systems)

If you have multiple Xiaomi Mesh System BE3600 Pro units, they are designed to automatically form a mesh network upon power-on. For manual configuration or troubleshooting:

- Ensure all mesh units are powered on and within range of each other.
- Access the router settings via the web interface as described above.
- Look for a "Mesh" or "System" section to view the status of your mesh network and connected nodes.

6. MAINTENANCE

6.1 Firmware Updates

Regularly updating your router's firmware is crucial for security, performance, and new features. You can usually check for and apply updates through the router's web interface, typically found under "System Tools" or "Firmware Update".

6.2 Cleaning

To maintain optimal performance, periodically clean the router. Use a soft, dry cloth to wipe down the exterior. Do not use liquid cleaners or aerosols. Ensure ventilation openings are clear of dust.

6.3 Restarting the Router

If you experience connectivity issues, a simple restart can often resolve them. Unplug the power adapter from the router, wait for 10-15 seconds, and then plug it back in. Allow a few minutes for the router to fully boot up.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
No Internet Access	Modem/ISP issue, incorrect cable connection, router not booted.	Check modem status lights. Ensure network cable is securely connected to WAN port and modem. Restart both modem and router. Contact your Internet Service Provider (ISP) if the issue persists.
Slow Wi-Fi Speed	Interference, too many devices, outdated firmware, poor router placement.	Move router away from other electronics. Limit simultaneous high-bandwidth activities. Update router firmware. Relocate router to a more central position.
Cannot Connect to Wi-Fi	Incorrect password, Wi-Fi disabled, device issue.	Double-check Wi-Fi password. Ensure Wi-Fi is enabled on your device. Restart your device and the router.

## 8. SPECIFICATIONS

Brand	XIAOMI
Model Name	Xiaomi Mesh System BE3600 Pro (1-PACK)
Item Model Number	RN09
Product Dimensions	17.8 x 7 x 21.7 cm
Item Weight	800 g
Colour	dark grey
Connectivity Technology	Bluetooth, Ethernet, Wi-Fi
Wireless Type	802.11.be (Wi-Fi 7), 802.11ac, 802.11ax, 802.11g, 802.11n
Frequency Band Class	Dual-Band
Voltage	12 Volts (DC)
Operating System	RouterOS
Special Features	Access Point Mode, Beamforming, Internet Security, LED Indicator, Parental Control
Compatible Devices	Personal Computer, Smartphone, Tablet
Recommended Uses	Business, Gaming, Home
