## 4. SETUP

### 4.1. Charging the Camera

Before first use, fully charge the camera using the provided USB cable. Connect the USB cable to the camera's USB-C port and a power source (e.g., computer USB port, USB wall adapter).

### 4.2. Built-in Storage

The camera comes with 128GB of built-in storage. No external SD card is required for operation. The camera supports auto loop recording, which overwrites older files when storage is full to ensure continuous recording.

### 4.3. App Installation & Wi-Fi Connection

To access advanced features, live view, and easily transfer files, download the companion app. The app name is typically provided in the included user manual or on the product packaging. Follow these steps to connect:

1. Download and install the app on your smartphone (e.g.,
